

essential modifications. Now, just in that manner, does there  
within one country, skilled, complex labor relate to unskilled,  
simple labor, the same can apply to the working day of different coun-  
tries. In this case the richer country exploits the poorer even in  
the case where the latter is the victor from exchange, as J.S. Mill  
developed it in his "Some Unsettled Questions."

Quotes R.L.: Imperialism is the political express of the process of  
accumulation in its competitive struggle with the rest of the non-  
capitalist world milieu on which no one has yet put his hands".

What about the occupation of the Ruhr, asks Bukharin & then con-  
cludes: Expansion of capital is determined by the ~~mass~~ movement of  
profit, its mass and degree on which the mass depends. The migra-  
tion of commodities and capital is subordinated to the law of the  
equalisation of the rate of profit. There is no doubt that it is  
necessary to consider this process from the point of view of the  
reprod. of the whole social capital. The formula here is

M-CMP P-C' - M'

The specific form of the competitive struggle which moves from cheap  
prices to violent means, including wars as the monopolistic structure  
of capitalism expands. The struggle for raw materials and export  
of capital under the circumstances of the monopolist control of  
the earth. War is the continuation of politics by other means.  
AND POLITICS IS NOTHING ELSE THAN THE METHOD OF REPROD. OF  
DEFINITE PRODUCTION RELATIONS, which are that of finance capital.

#### Ch. 5- Theory of the Downfall of Capitalism

NB says if you'll take the "3rd group" as the point of necessity  
for cap. then it will exist forever since the majority of the pop.  
are 3rd persons. Out of 1,700 mln. people, 900 mln. are Asiatics.  
Out of 430 mln. Chinese, 400 mln. are peasants. From 320 Indians  
17- mln. are "3rd groups" & even in Europe almost 50% of the popu-  
lation are peasants.

Nb continues to say that RL does not understand dialectics, what  
is meant by capitalist society is a unity of contradictions. The  
process of ~~reprod.~~ <sup>expanded</sup> is the process of expanded reproduction of these  
contradictions. If that is so, it is clear that in the end these  
contradictions must break out into the open the entire capitalist  
system. That precisely is its limits... The answer lies in the  
reprod. of l.p. When capitalism will have brought about a fall in  
the productive forces, when it becomes impossible to reproduce l.p.  
& l.p. cannot function, there arises the break of the social-  
productive apparatus, class opposes class on the opposite sides of  
the barricades.
