The 'state of civil siege' decreed by the Nazis in July 15 against 29 persons, in Norway on Wednesday is the latest admission that cluding leaders of the Socialist the 'New Order' is already crumbling in Europe. Preparations of the workers for strikes against the Nazi

Hitler tried to avoid the repetition of the Kaiser's "mistake" in the Ukraine - but he could find no way to neutralize the embittered masses of Europe.

With each day the German occupying troops are being more deeply engulfed in the rising tide of universal hostility which surrounds them. Meanwhile, the Nazi victories in the Soviet Union are producing millions of German victims. The mirage of easy conquest is fading while at the same time all Europe confronts the Nazi regime with the insuperable problems resulting from their previous conquests. From these factors must come eventually a break in the Nazi morale.

'Greer' Incident Serves Schemes Of War-Mongers

Argument About Who Shot First Covers Up Joint War Guilt Of All Imperialists

The latest interventionist argument is that the Germans "shot first" in the Greer incident.

On September 5 the United States Navy reported that a submarine of "undetermined" nationality had fired torpedoes at the U.S.S. Greer, en route to Iceland, the day before. "The Greer immediately counter-attacked with depth charges. Results are not

The same day President Roosevelt announced that the U.S. Fleet was searching the seas to "eliminate" the submarine.

On September 6 official quarters in Berlin announced that a U-Boat had been attacked by 'an unidentified destroyer' in the German blockade zone.

The same day the U. S. Navy denied the Berlin reports and reiterated that "the initial attack in this engagement was made by the submarine on the Greer. It was then, and not until then, that the Greer counter-at-

tacked." Since then there have been additional and increasingly heaten American and German imperialdenials and counter-charges on ism had been attacking each both sides.

N.Y. Committee Asks Fund For Cannon Campaign

There is only one anti-war candidate for Mayor of New York City, the Trotskyist Anti-War candidate, James P. Cannon. To carry through a successful campaign for our candidate, the New York Local of the Socialist Workers Party needs a sound truck and equipment, hundreds of thousands of leaflets, special tabloid editions of the MILITANT, portable platforms for street meetings, etc.

The Cannon-For-Mayor Campaign Committee is conducting a drive for finances to secure these necessary campaign materials. We are asking every member and sympathizer of our party to assist the campaign financially by contributing a minimum of one day's pay. These funds are needed at once, in order to put the election drive into high gear by October 1, the date for filing of the Cannon petitions.

Carey, as chairman, therefore

ruled this section of the resolution out of order. An appeal against this ruling was made, and the appeal was won by a roll-call of 714 to 450.

This vote was the first real test of strength between the Stalinists and Careyites. CAREY AND STALINISTS

During the ensuing several self, it became clear that neither the Stalinists nor Carey cared to by two-to-one majority. attack each other in a forthright

The Stalinists correctly argued that the anti-communist issue was baiting policies. From that standsupported by the anti-labor press, point, the vote was a blow to the the employers and reactionary But they deliberately avoided

any direct attack on the Hillmanites, Carey or the Roosevelt Administration as being the actual sponsors of this move in the UE and other CIO unions. The fire of the Stalinists was directed at the "Inter-Local Committee of Progressive Trade Unionists." an organization of Carey supporters, but never at Carey himself.

The Stalinists correctly charged that the proposal to discriminate against persons because of their political beliefs was a violation of the fundamental principles of trade union democracy.

But they did not show why Carey wished to put over this red-baiting proposal. They did not, for instance, point out that Carev's attack was directed, in reality, at those who were for militant labor action against the bosses, who were opposed to col government and who fought against the Roosevelt war pro gram. The Stalinists did not seek to discredit the real purposes of the red-baiters, but to smooth over the differences in order to

Carey and his followers, for against the union in accord with their part, could not point to anything in the present Stalinist program with which they disagreed. All their real differences had ceased to exist on June 22, when the Kremlin decreed full and unconditional support of the Allied imperialists.

CP "DEMOCRACY"

NOT FOR TROTSKYISTS

Haley "dramatically" confronted the convention with a photostatic copy of a pledge signed by several UE members who had attended a Communist Party training school in 1937. Haley did no: attack the nature of the pledge, but merely used the document as STALINISTS SUPPORT evidence that cerain UE members had been members of the Communist Party.

This pledge included agreement to build the Communist Party and "to drive the Trotskyists out of the labor movement."

The only thing which the document proved was not that members of the Communist Party should be excluded by constitutional ruling from the union or union posts, but that the Stalinist plea for "democracy" in the union was a fake, as evidenced by their program to drive the Trotskyists out of the unions

The Stalinist-sponsored resolution was finally voted on by a show of hands, and was adopted adopted, when he proposed that

So far as most of the delegates were concerned, this vote expressed an honest opposition to red-Hillmanite red-baiters and reactionaries and an affirmation of the progressive and democratic sentiments of the UE rank-and-

"WHAT ABOUT JACKSON?"

Nevertheless, the Stalinist "compromise" contained certain dangerous implications, as one dele gate, Edward Lopez of Bayonne New Jersey, pointed out. Lopez called attention to the phrase. 'acts against the nation", and asked Fitzgerald, the chairman of he resolutions committee:

"What about Jackson? He's been thrown into a Canadian concentration camp. If he's found guilty, will he be thrown out of the UE because he's against the interests of his country?"

This question referred to C. S fackson, president of UE District Council No. 5 in Canada, who vas thrown into a Canadian concentration camp several months ago after he returned from a UE conference in the United States He has been interned for months without trial, and the UE is conducting a fight for his release.

Fitzgerald "answered" Lopez's question with the single statement:

"That's Canada. This is the United States we're in."

The Roosevelt Administration Hillman, and all the bosses have already termed strikes and militant labor actions in the war industries to be "acts against the nation." And now they will be so termed by the Stalinists and Hillmanites in the UE.

The defeat of Carey on the redbaiting issue led to his defeat for The Careyites, through Clifford re-election at the afternoon ses-Haley, Local 1227, Long Island sion Wednesday. The combination of Stalinists and

"independent" Hillmanites was lems confronting labor in this war sufficient to elect Fitzgerald. The vote was 635 to 539. Carey received considerably more votes for president than for his posttion on the anti-communist issue This indicated that many delegates, as a result of the Stalinist cover-up of the anti-labor char acter of Carey's red-baiting, dic not think his red-baiting of enough moment to warrant opposition to his holding the highest office in the union.

CAREY FOR CIO POST

Immediately after Carey's defeat, Organization Director James Matles, one of the Stalinist leaders, proposed that the UE support Carey for re-election as CIO National Secretary at the coming CIO convention, Such a motion

was passed on Thursday morning. Carey, on his part, revealed how shallow was his cleavage with the Stalinists, when he seconded the nomination of the leading Staiinist in the union, Julius Emspak, for UE secretary-treasurer. Carey called for a unanimous vote for Emspak in the interests of "unity".

get his anti-communist program union locals be permitted to sea up their own qualifications for union officers. This was calculated to permit local unions to put anti-communist clauses in their local constitution. The convention supported a counter-proposal to this, brought in by the constitution committee, by a vote of 789 to 377. The constitution committee, Carey's own, abandoned his line at the Stalinists' "unity" plea.

ist-Hillmanite leadership simply smothered any possible real discussion on the war, the role of the Mediation Board, the right to strike, government strikebreaking, labor participation on government agencies, priorities unemployment, organization of the unorganized, etc

Such of these questions as were lealt with at all merely received passing reference in speeches on other questions or in resolutions hastily passed with little or no discussion, most of them lammed through at the very end of the convention.

The vital problems of priorities unemployment and the organization of the competitive shops, problems of extreme moment to the UE members, were passed off hastily in inadequate

and undiscussed resolutions. Every question, every probone reactionary aim: to line up the union behind Roosevelt's war program.

This convention has established definitely the fact that the Stalinists and Hillmanites, drawn together by fundamental agreement on the war, are in the process of establishing an alliance against the forces of John L. Desertions by both white and Negro soldiers have been increasing throughout the country, but these 60 men and their brothers in the 94th Engineer Battalion, had received particularly striking demonstration of "democracy" under the fascist-minded army officers.

The 94th Engineer Battalion is composed entirely of Negro sol diers but is officered by whites. The men were drafted mainly from Michigan, Ohio, Indiana and Illinois, but were transferred to of the Major's superior. Gen. Arkansas to participate in the Second Army maneuvers now being conducted.

The "lesson" is reported to have risen out of an incident in Little Rock, Arkansas, when a soldier was walking along the street with a young woman and happened to brush against a cop. The policeman immediately turned upon the Negro soldier and slapped him in the face. The soldier thereupon beat up the cop. Nothing more hapened in Little Rock but the news spread throughout the area.

POLICE CREATE TROUBLE

The following day some of the 94th Battalion soldiers went into Gurdon. Ark., during their time off. They were immediately subject to abuse from the local police and state troopers. They were not only segregated in the Negro section of the town, but forbidden to use most of the streets leading to and from that section. The state troopers attempted to run down the men with police cars, threatened them with guns and yelled insulting remarks at them. Defensive action by the soldiers was prevented by the arrival of white army officers who herded the men back to camp and declared Gurdon would henceforth be "off limits" and no Negro would be allowed to visit it. Prescott, Ark., about 12 miles from camp, was then selected as "suitable" for Negroes.

That night a state trooper approached the camp and beat up a Negro sentry on duty. The sentry carried a gun but had no ammu-

On August 13th the 94th Battalion was marching in formation along a highway between Camp Robinson and Prescott when several car loads of state troopers drove up and yelled at the white lieutenants to "get those niggers off the highway." The police then began to slap and shove the soldiers into a ditch on the side of the road. The two white lieutenants in charge of the Battalion protested that the police were interfering with military work. The police turned upon the lieutenants, called them "Yankee nigger-lovers," and slapped them in the face.

The soldiers were forced to continue the march in the ditch. sometimes through, water kneedeep.

DEMAND ARMS FOR SELF-DEFENSE

When the 94th got back to camp the seldiers demanded ammunition for their guns so that they could protect themselves from the bullets of the police. The officers told them that it was contrary to regulations, but assured them that "ample steps would be taken for their protection."

Throughout these incidents, both in Gurdon and along the road to Prescott, white military police armed with clubs and guns, were present. They never lifted a hand in defense of the seldiers.

Most of the soldiers, after leaving Camp Robinson, voluntarily surrendered themselves at northern military posts. They offered to return to Fort Custer in Michigan but begged not to be sent

What The Union Defense Guard Did

Its Function Was To Resist The Attacks Of The Fascist Gangs On The Union Halls

One of the charges in the indictment obtained July 15 by the government against 29 leaders of the Socialist Workers Party and the Motor Transport and Allied Workers Industrial Union, Local 544-CIO, is based on the organization of a Union Defense Guard in Minneapolis.

The nature of this guard was such that for this charge in the indictment as for most of the others, Roosevelt, Biddle and the FBI were forced to completely distort the facts to fit their needs which are, not to charge the defendants with what they really stand for, but to

frame them up because they op-Roosevelt is today devoting all

his energies to driving the country into a war which he claims is "against fascism." The facts show that the Union Defense Guard referred to was organized to defend the labor movement in Minneapolis against attacks by American fascist groups. That was its openly stated purpose and it was on the basis of this that workers joined the Guard.

But Roosevelt would not find it clear to the southern bosses that easy to win support for the perthe Negroes would be more fully secution of a group that takes home and really organizes to do something about it. That is why the indictment, while it is forced to admit that "ostensibly" the Guard would "be used for protection against violent attempts to destroy trade unions" tries to on the grounds that he had been cover up the facts by charging that it was "in truth and fact has not yet indicated just what designed and intended to be used ultimately to overthrow, destroy and put down by force the duly constituted, constitutional Government of the United States."

THE THREAT OF THE SILVER SHIRTS

The guard was organized by nembers of the Minneapolis General Drivers Union, Local 544, AFL, in August 1938, as the outgrowth and the answer to a series of vigilante and fascist threats of violence against Local 544 locally, and of actual vigilante attacks on unions in other parts of the nation during the summer of

The report went on to say that

ACTIVITIES OF THE GUARD

During the first few weeks after its organization, the Union Defense Guard met in the basement of the Drivers Hall. General discussion was held on the methods by which vigilante and fascist gangs carry out their terrorist attacks on workers' organizations. The members of the guard were thus able to familiarize themselves with the measures necessary for defense against such attacks.

The members of the guard were divided into small groups so as to facilitate rapid mobilization in the event of a surprise attack upon the unions. Most of the men went through simple calisthenics.

The members of the guard decided to acquaint themselves with the use of simple firearms so they knows that this guard was organ-During the latter part of Aug- ed attacks on the union. None of the guard members carried or possessed arms.

The four .22's and the target munitions were purchased by funds raised through the sale of tickets for a dance planned by the guard. On Dec. 17 the guard gave a dance at the Drivers Hall. The affair was open to the public and was recorded in the pages of the union paper.

Following the target practice in September, a test mobilization of the guard was held one evening, during which more than 200 union members reported. After the mobilization, all of them atended a local theatre. The union felt that the Sil-

tack on the union headquarters and the union leaders. This proved to be the case, for the Silver Shirts discontinued their public activities in Minneapolis.

WHAT HAPPENED TO THE GUARD

With the disappearance of the Silver Shirts, the main reason for the formation of the Union Defense Guard also disappeared. Target practice was discontinued. No other test mobilizations were held. Some of the members dropped away and gradually it became a social organization.

Once a year thereafter it would hold a public dance in the union hall. Yearly, guard members acted as ushers at Local 544's annual picnic in July, and at the union Christmas party for children in December.

The name Union Defense Guard was continued, mainly as a sort of insurance against anti-labor gangs getting any ideas about attacking the union hall. From time to time the idea of the Union Defense Guard was publicized in the union paper. For instance, a group of Coughlinite fascists tried to break up a meeting of the CIO Transport Workers Union in New York on June 16, 1939. The next week Local 66 of the International Ladies' Garment Workers Union addressed a proposal to the union's General Executive Board proposing that anti-fascist guards be organized in every local of the ILGWU throughout the country. These facts were duly recorded in the Northwest Organizer.

The last time the guard was active was in December, 1940, when guard members acted as ushers at the Christmas party sponsored by the Minneapolis Teamsters Joint Council at the city Arm-

Newark Socialist Workers Party Files Petitions For Breitman

NEWARK, N. J., Sept. 10. - More than three times the number of nominating petitions necessary to place him on the election ballot were today filed with the Essex County Clerk on behalf of George Breitman, Socialist Workers Party candidate for election to the New Jersey General Assembly.

A statement by Arthur Burch, Newark organizer of the Socialist Workers Party, declared that the election campaign would be so conducted "that every vote cast for Breitman will be a vote cast against Roosevelt's war program and his frameup prosecution of the 29 pro-labor, anti-war defendants awaiting trial in St. Paul."

Trotsky Memorial Speech by Farrell Dobbs

Address Delivered At The Minneapolis Memorial Meeting on Aug. 21, 1941

One year ago Comrade Trotsky sat for the last time at the work table in his Coyoacan study. He was a man without a country and at the same time a citizen of the world. Behind him were forty-four years of unceasing struggle in the interests of the world working class. He had never wavered from the decision which he made as a youth of eighteen to devote his life to the proletarian revolution.

He was co-leader with Lenin of the great October revolution which shines as the pole star for the revolutionary navigators of the world working class. It was Comrade Trotsky, our Old Man, who organized and inspired the Red Army which is now standing its ground so heroically before the guns of Hitler. It was Trotsky who led the Red Army to victory against the imperialist plunderers who tried to crush the October Revolution in its first hour of triumph.

Twice before, Comrade Trotsky had been exiled by the Czarist regime. Now, after the triumph of the Russian workers, he was again exiled from his native land, banned from the workers' state. This time at the hands of Stalin, the betrayer of October, the organizer of working class defeats. Together with his valiant wife, Natalia, Trotsky had borne the horrible grief of seeing his children, one by one, either murdered or driven to suicide by Stalin. His secretaries had fallen, one after another, victims of the mad dogs of Stalin's GPU. Trotsky had seen his co-workers of October, Lenin's central committee, the whole generation of old Bolsheviks dragged into the cellars of the Lubianka and put to death. Such were the evil fruits of the infamous Moscow "trials" through which Stalin sought also to slander the name of Trotsky and prepare the ground for his assassination. Trotsky knew all this; he understood it clearer than anyone else.

Undaunted By Persecutions

Yet he remained undaunted by these terrible blows. He did not permit it to interfere with his revolutionary work. He kept his eyes turned toward the future, toward the unsolved problems of the workers. He was very impatient with anything which stood in the way of this central task. He continued to analyze world events, to patiently explain to the workers the program necessary for a solution of their problems. He sought constantly for the widest possible forces with which to rebuild the revolutionary movement after the debacle of Stalinism. He was ever alert to ferret out and completely expose any trace of false ideology which might creep into the movement. At every opportunity, through all available mediums he vigorously sounded the clarion call to class struggle. Trotsky's was the greatest mind, his the stoutest heart of our day, and he was devoted unconditionally to the service of the world work-

One year ago this great revolutionary sat for the last time at the work table in his Coyoacan study. At his back stood an agent of the GPU. The murderous hand of Stalin had finally reached into the presence of Leon Trotsky. Stalin drove a pick-axe into Trotsky's brain, seeking to destroy that which he feared more than anything else in the entire world.

Then came the agonizing vigil, the desperate attempts to save his life, the hopes, the fears, the cruel grief of that short span of hours which seemed to pass more slowly than centuries. And finally the last fatal message: our beloved Old Man was no longer among the living.

Stalin's Guilt Has Been Established

The whole world knows today who killed Trotsky. He accused Stalin on his death bed. He had already proven Stalin's guilt in the events of the May 24 assault. The assassination and the subsequent efforts to protect the assassin have been typical of the widely known GPU methods. Stalin's motives are abundantly clear. His betrayal of the workers in the Soviet Union, China, Germany, France Spain; the entire working class

in the World War II - this endless chain of betrayals has driven Stalin to ever greater violence against the working class. He did not hesitate to murder the whole generation of old Bolsheviks, and he desired the death of Trotsky whom he feared more than all the others. The hatred of an apostate against those who represent what he once claimed to be, accounts in part for the sadistic violence of Stalin's methods.

Both Stalin and Trotsky will be remembered in the recorded history of mankind. Stalin will receive mention in a brief and shameful paragraph. He will go down in history as the greatest betrayer of all time, a super Cain, Borgia,

Comrade Trotsky will stand on an historical plane with Marx, Engels and Lenin. He will be loved as a champion of the toiling masses, a gladiator of the working class, a builder of the new society, one of the greatest creators of all time.

The death of Leon Trotsky has been a terrible loss. It came at a very critical juncture in history. The workers are again plunged into the bloodbath of imperialist war. They are again confronted with widespread treachery and betrayal by the leaders of their mass organizations. There is great need for the firm hand and brilliant mind of Trotsky. He could perform even greater deeds than those already recorded during the eventful years of his heroic

Stalin killed Trotsky and removed him from the scene of immediate conflict. But he did not, he could not destroy him. The whole of Trotsky is preserved in his writings. He has left behind all the necessary tools for the proletarian revolutionary fighters. We still have him to help us. It is only necessary to learn how to use these tools and then courageously to

Comrade Trotsky was a creator of profound ideas. But part of his greatness lay in the fact that he was not entirely a creator. He also could learn from others. He had nothing but contempt for the sniveling pride of the so-called independent thinkers, those little men who are too wrapped up in selfadmiration to learn the lessons handed down by their revolutionary forebears. He placed before everything else the need to learn from the great working class leaders. Trotsky built upon the ideas of Marx, Engels and Lenin. He learned to understand their ideas and to master their method. He took this knowledge and applied it in the modern conditions of the daily struggle. The power of Trotsky was above all the power of

The Struggle Against Stalinism

After the death of Lenin, the rising Stalinist bureaucracy plunged the workers' vanguard in the Soviet Union and throughout the world into a horrible swamp of confusion and disorientation. There was widespread demoralization among the Bolshevik cadres and a rapidly swelling casualty list of the moral victims of Stalinism. It was Trotsky who cut through all this with the sharp knife of Marxist analysis and exposed the reactionary character of Stalin's policies. It was Trotsky who came forward with a program that shone with the brilliance of the rising sun as it pierces a morning fog. Trotsky, the Marxist, the Leninist, brushed away the confusion, showed the way out and thus saved many of the best militants.

The degeneration of the workers' state under Stalin has led to a serious alienation of sympathy for the Soviet Union among the world working class. Renegades of all breeds and varieties have helped to increase this isolation of the Soviet

workers from their class. Many are the pseudo-Marxists who have tried to prove that Soviet Russia today is very little different from Hitlerite Germany. The crimes of Stalin against the workers of the world have in every instance served as the foundation for these foul theories, for this disorientation of

It was Trotsky who took the lead in the fight against Stalin inside the Russian Communist Party. Then, after the German debacle and the rise of Hitler, he explained the qualitative change which had taken place inside the Russian party: that it had become only a caricature of a communist movement. Therefore, Stalin must be overthrown by revolutionary means. It was necessary immediately to begin the task of reorganizing the revolutionary movement for a world struggle against Sta-

However, in sharp contrast to the charlatans who cleave to the false petty-bourgeois concepts of democracy and morality, who see Stalinism as the natural product of Bolshevism, who renounce Marxism only to turn toward the bourgeois democrats or the half-way house of a mythical Third Camp - in sharp contrast to all these philistines, Trotsky was able to chart a course of struggle against Stalin without turning his back upon the workers' state, the October revolution, Marxism. and the whole future of the working class. Trotsky taught the vanguard to struggle for the overthrow of the Stalin regime, but at the same time to stand for the unconditional defense of the USSR. True, he explained, under Stalin the Soviet Union has become a degenerated workers state, but that is a matter for the workers themselves to correct. Degenerated though the Soviet Union is, its economy is still based on nationalized property and monopoly of foreign trade. The capitalists have been and remain expropriated. This the workers must defend against all the imperialist bandits.

Trotsky's Last Great Struggle

The last great political battle of Comrade Trotsky's career was waged against the petty-bourgeois minority of the Socialist Workers Party. They tried to force the party to renounce the defense of the Soviet Union. They tried to turn the organization into the shambles of a social democratic debating society. In this fight Comrade Trotsky wrote a series of documents which must be carefully and thoroughly studied by every serious proletarian fighter. They are a virtual handbook on the most pressing problems of the day.

If Trotsky were in the Soviet Union today, or if the ideas of Trotskyism were being applied to wage revolutionary war against Hitler, the German army would literally melt before the political and military assault of the Red Army. The German workers would return home to settle accounts with their own fascist overlords and a gigantic revolutionary wave would arise to sweep the last remnants of capitalism from the face of the earth.

It was not only on the question of defense of the workers' state that Trotsky maintained theoretical clarity in the program of the proletarian vanguard. He took the lead in exposing the false and treacherous Stalinist policy of the "Peoples' Front" and all the other criminal maneuvers of the Kremlin bureaucrats. His brilliant pen poured forth devastating and unanswerable condemnation upon the anarchists and syndicalists for their miserable capitulation before the bourgeois democrats. He pilloried the decrepit social democrats for their bootlicking support of the imperialist war lords. He fought militantly and constantly against every deviation from Marxist policy in the

"No confidence in the bourgeois democrats!" thundered Trotsky. "No support of the democratic war mongers. War is inevitable and fascism a constant danger as long as capitalism exists. There is no course other than revolutionary proletarian struggle against capitalism." He explained this over and over, in connection with many different events, but he always hammered hardest on these fundamental points.

Trotsky and The Trade Unions In War

One of the last of his great contributions was the forging of a proletarian military policy for this bloody epoch of imperialist war: the military training of worker soldiers and worker officers under trade union control. Together with this

he left us an uncompleted but nonetheless important document on the whole trade union question. The capitalist class, with the aid of the Tobins, Greens and Hillmans, is seeking to bind the trade unions into the apparatus of state. The ruthless campaign of the dictator, Tobin, who is receiving the full support of the capitalist state in his campaign to smash the CIO union of the Minneapolis motor transport and allied workers is an eloquent example of what is in store for the workers under such an alliance between the government and the top officialdom of the trade union movement.

Pointing to the grave danger of this tendency toward subverting the trade unions into instruments of capitalist repression, Trotsky explains that if the trade unions are to be effective working class instruments they must be kept completely independent from the capitalist state. A second task, flowing from this need, he indicates, is constant vigilance and unceasing struggle to preserve trade union democracy.

Trotsky's mastery of Marxism, his ability to apply these ideas and methods in modern conditions gave him a superb power of analysis and a crystal clear vehicle of expression. His method was the scientific approach of dialectical analysis. He knew how to understand each event in the historical chain and how to place each event in proper relation to all other historic phenomena so as clearly to recognize the movement of the contending forces in the class struggle. Every proletarian fighter, no matter from what corner of the world he might come, would find in the course of a discussion with Trotsky a deeper and richer understanding of events in his own country and on the world arena.

There was nothing mystical about this power of Trotsky's. The fountain of knowledge from which he drew his wisdom is available for all. Even more than that, he has greatly enriched this treasure chest of revolutionary learning by his own contributions. None of us can be Trotskys. He was a giant, even among giants. There will be other and possibly even greater Trotskys. But that is not an indispensable minimum for success. We need only use to the best of our ability the tools which he left for us.

Why Roosevelt Attacks The Trotskyists

We have been charged by Comrade Trotsky with the responsibility of carrying out his testament: "I have confidence in the victory of the Fourth International. Go Forward!" Our work of the past year has shown that we have the ability to use his tools and to carry out his last command. Our party has grown. Our press has been greatly expanded. We have sunk our roots deeper and deeper into the ranks of the workers, and they have responded to our call in increasing numbers. The attention we are receiving from the capitalist government is eloquent testimony of our ability to go forward.

We carry on in times of great world crisis. Heavy responsibilities rest upon our shoulders. Roosevelt is striving mightily to plunge the American workers headlong into a shooting war. The war party of American imperialism is finding it very difficult to whip up mass enthusiasm for the war program. They sense in this attitude the dormant seeds of working class revolt. There is no way for them to tell how close to the surface this danger lies. The capitalist class has no confidence in itself nor in its outworn system. This is especially true of its most conscious section. They have a mortal fear of the workers. The Roosevelt administration is thus driven to lash out viciously against the anti-war forces, especially in the ranks of the working class.

We, the Trotskyists, have the high honor of being the first political party attacked through the police powers of the warmongering Roosevelt administration. We are the first to be indicted by the federal government. More than anything else this testifies to the growing power of Trotsky's ideas. The Stalinists call us fifth-columnists, agents of the fascists, and they urge Roosevelt to go the limit against us. But the bourgeoisie is not confused. They know what we are. They know that we stand in the vanguard of the protetariat. The capitalist state strikes first at the working class party which has the most correct, and therefore, to them the most dangerous, program. Roosevelt has struck first at the Trotskyists.

We do not shrink, we do not retreat in the face of this assault. We follow the example of our Old Man. We stand firm. Nor shall we flinch in the fight, whatever the odds.

Comrade Trotsky had unbounded confidence in the working class. He treated with contempt those mental incompetents who seek to fasten upon the workers the responsibility for the crimes of their leaders. Many are the brazen cynics who say that the workers get the kind of leadership they deserve. What monstrosities these pompous little fatheads are who speak with disdain of the heroic warriors who are the proletarian masses. Our Old Man set an example for us which we must never forget. He never blamed the workers for defeats. He sought always to draw for them the lessons of their experiences, to teach and inspire them, to give them proper leadership.

We Are Confident Of The Future

This confidence of Trotsky's in the workers was not based on superficial sentiment. He understood the dynamic power of the proletariat. He had learned well the lessons of the class struggle. At the time of his death he was writing an article on this very subject. He stated that it could be set down as an historic law that the mass radicalization of the workers must precede a fascist struggle for power; that fascism could conquer only if the proletarian vanguard failed to lead the radical masses to the overthrow of capitalism and the establishment of socialism. Such a stage of mass radicalization is high on the agenda of the American workers. We are determined that this historic opportunity shall not be lost. We follow Comrade Trotsky's example in our preparations and we go forward with his confidence.

We shall defend Marxism against all renegades and revisionists. We have nothing but contempt for bourgeois opinion. We will stamp out every trace of this alien class influence which may seek to penetrate our ranks on the escalator of petty bourgeois confusionism. It is our firm resolve to strive for the fullest assimilation of the ideas and methods of Trotskyism. These we shall develop in modern conditions and then

consistently apply them in struggle. Comrade Trotsky often quoted these words from Hegel: "Nothing great is done in this world without passion." In this bloody epoch of all-out struggle we stand and shall continue to stand in the front line positions of the class war. We take our places in the vanguard of the proletariat with absolutely no reservations. Nothing is more important to us. We entertain no petty thoughts of personal security in this world which is aflame with the death agony of capitalism. We fight with the burning passion of men and women who are conscious that the future of all mankind depends upon them. We struggle for the emancipation of the human race through the revolutionary working class. We are confident of victory.

The Labor Movement and the Draftees

To Win Their Support, The Trade Unions Must Fight For The Soldiers' Needs

By VICTOR ANDERSON

One of the important problems facing the American labor movement is that of its relation to the army. The induction of tens of thousands of young men into the armed forces makes of the army a powerful new force in society, one which will undoubtedly play an important role in coming social struggles. Unlike the old small professional army, the new and large army of draftees is exceedingly dynamic and all social events have immediate reflections within its ranks.

The strike in the North American Aviation plant has already made clear that the government will attempt to use the army as a lever against the working class. How far the government can succeed will depend

Unfortunately, the largest section of the labor movement is hardly aware of this problem. No important steps have been taken by any large union to demonstrate that the unions can and will lead the struggle for better conditions for the soldiers. Far worse than simple neglect, a large part of the reactionary labor bureaucracy has actively fought against any such campaign.

WHAT THE LABOR MOVEMENT CAN DO

What is it that the draftees want? The uppermost demand on the part of the draftees in the der to win over the sympathies of past few months has been that they should be released from service at the end of their year's term. A militant campaign by the labor movement against the draft extension would have made the union leadership extremely popular. The draftees are greatly dissatisfied with their wages. Negro Struggle

By ALBERT PARKER

The Kind of War That Negroes Can Support

The Negro people are not pacifists. They view with suspicion the current talk about a war for democracy that will be conducted by a Jim Crow army and navy that will use equipment and munitions made in factories that refuse to hire Negroes. Rightly so.

But the Negro people have been ready to fight in the past on behalf of progress for society. They fought bravely in the American Revolutionary War in 1776, when this country won its independence. They fought bravely and eagerly in the Civil War of 1861 when the unity of this nation was preserved, the political power of the South broken, and slavery abolished. Even in World War I, when they were told by their leaders that they would get their share of democracy after the war was won, they established an impressive fighting record.

Today they are justly suspicious about being fooled as they were in 1917. But they are ready to fight another war if it will be in their inter-

They are ready to fight against the anti-democratic forces at home, the ruling class that starves, cheats and insults them, that kicks them around, uses them and ignores them. In this war they will give their last drop of blood; no one will have to sell it to them with speeches: no one will have to try to sell them bonds to get them to give everything they have for its vic-

History will look back at it and call it another Revolutionary War, or maybe the Second Civil War, or the Third American Revolution. But the name won't bother the Negro people so long as they know it will overthrow the whole system of Jim Crowism in all its spheres and permit them to raise their children in security and equality.

Once a serious struggle begins, and the Negro people see on the banners of one army the slogan, "Full social, economic and political equality for the Negro people," they will rush to enlist in its ranks.

The Fighting Spirit Exists Now

How can we be so sure of this? Because of everything we see around us today. There are some who look at the Uncle Toms and misleaders of the Negroes, the men who sell themselves for a government job or even just a pat on the shoulders by their oppressors - and they say, "My God! What ever makes you think the colored people will ever wake up and fight for their

But we do not make their mistake of confusing the Negro people with a handful of treacherous and self-seeking lackeys who are only too pleased to have the world think they represent the Negro masses.

Even now, while the Uncle Toms, the Pickenses and Pattersons and Chaplain Robinsons, are doing their best to confuse the Negro masses, there is one example after another of what heroic far-sightedness the masses are capable of.

There is the example of the Negro March On Washington, and the little colored woman, 77 years old, who exemplified the response of the masses to a just fight. She lived in Florida and spent all her time selling buttons to raise money for the March so her people could have jobs and equality. She had money enough to get only as far as Savannah, Ga., about 700 miles short of Washington, but she swore she would get to the capitol even if it meant she would have to walk the rest of the way.

Of course, Randolph and White and the others called off the march, and she was probably a little discouraged. But Randolph and White cannot kill that fighting spirit.

There is the example of the brutality of the white MPs to the Negro draftees at Fort Bragg, and of Private Ned Turman who spoke up against it and was shot dead after he resisted attacks and cried, "I'm going to break up you MPs beating us colored sol-

True, there are men like Chaplain H. A. Robinson at the same fort, a Negro belly-crawler who tries to cover up and justify the murder of Turman, but he cannot cover up or destroy that fight-spirit of Turman's which sends an inspirational thrill through militant Negroes every time they think that here was a man who did not hesitate to die fighting for democracy.

Why has that war not begun yet? Surely the Negro masses know what they want. But the trouble is that the Uncle Toms work so energetically beclouding the issues that the masses don't know how to get what they want.

This is the task for the militant, class-conscious Negroes today. They must study the past experiences, they must learn what exactly they have to contend with, just what forces they must fight against, what methods they must use, who their allies and friends are. They must prepare themselves for leadership, and then go out and organize their brothers and sisters for this righteous war.

They will learn that their enemies are the capitalist class, the bosses, and their political organs, the Republican and Democratic Parties. They will learn that they can get even the smallest concessions from these enemies by only fighting with all their might. They will learn that there is another and a much stronger force that has reason to fight and hate the capitalist system, and that is the labor movement which is also oppressed and exploited by the bosses, and they will come to see that they must make common cause with the workers and fight side by side with them against their common enemy. And they will learn through their own experiences that the Socialist Workers Party, the Trotskyists, represent the most consistent force fighting against capitalism and Jim Crow.

Famous American Labor Trials The United States vs. William D. Haywood et al.

"THE CASE OF THE 166 WOBBLIES"

Sentenced to jail in United States Penitentiaries

Twenty-nine members of the Socialist Workers Party and of Motor Transport and Allied Workers. Local 544-CIO, are today awaiting trial in St. Paul on an indictment brought against them by the Department of Justice at the instigation of the warmongering national administration and some of the reactionary leaders of the American Federation of Labor. The developments in this Minnesota case bring strikingly to mind many of the similar circumstances surrounding the famous case reviewed

"We are not criminals and not in prison because we committed crimes or conspired to commit them. From the beginning iustice has been denied us and the truth of our case withheld from consideration of the public We are working men, conscious of our position in society and guilty only of championing the cause of the class to which we belong Our imprisonment was the starting-point of the open-shop drive, of the movement toward establishing the Industrial Court, the Landis Award, and the recent wage-cut, union wrecking campaign of the militant employing class Liberty is sweet to any man in prison, but not sweet enough to us to be purchased at the price of principle."

BACKGROUND OF THE CASE

President Wilson and the Congress of the United States had the homes of individuals with declared war on Germany. "Civil peace" was necessary, and that meant terrorizing the working class into acceptance of the war pounds" of printed material. A

At the same time shrewd little Samuel Gompers, boss of the AFL, pledged his organization to inal conspiracy". 100% support of the war and rushed to Attorney-General Palmer of the Department of Justtice with a proposition: Smash the I.W.W.

Gompers had tried vainly for years to combat the fighting philosophy of industrial unionism. Here was his chance to get rid of a rival and build himself up as a war-mongering "patriot".

Palmer agreed, and a wave of Department of Justice assaults began, aimed primarily at the I. W.W. but hitting an untold number of militant workers belonging to other organizations or simply fighting for decent working

5. conspired to execute a "certain scheme and artifice to defraud the employers of labor" by mailing propaganda materials (2,020 crimes - one for each piece mailed!). 😝

17,020 crimes were charged against each one of the 166 defendants!

Trials of the 166 I.W.W.'s took place in the Federal Courts of Chicago, Sacramento, Wichita, Omaha and San Diego, the largest number (113) going before jury in the court of Judge Kenesaw Mountain Landis in Chica-

Although the prisoners were theoretically on trial as individuals and not as members of an organization (the U.S. Department of Labor itself having found the I.W.W. to be a legal organization devoted to economic ends), every shred of evidence submitted dealt with the program and policies of the I.W.W. Judge Landis justified this procedure by claiming that the documents indicated the "frame of mind" of the defendants.

It was proven that the I.W.W. had conducted strikes; that it had sent \$3000 in strike relief to Bisbee, Arizona; that a pamphlet by Pouget entitled "Sabotage" had been circulated; that one of the organizers had suggested "a general strike" in defense against vigilante and government terror; that Bill Haywood had authorized a strike by telegram; that the defendants were almost all members of the I.W.W.

The fifth count of the indictment was stricken out at the opening of the trial and the other four were completely ignored so far as proof of guilt was concern-

THE DEFENSE

The General Defense Committee of the I.W.W. had to face as vicious a battle outside as the defendants did inside the courts. left in a ten-ton truck loaded with defense literature, envelopes, collection blanks and even a considerable - and to the Defense Committee, valuable - quantity of blank paper.

But the Defense Committee persisted and succeeded in raisng a magnificent defense fund.

SENTENCES

The Sacramento defendants were all found guilty and given heavy jail sentences. Some of the defendants in other cities were dismissed.

In Chicago, the case went to the jury on August 17, 1918. The twelve "good men and true" examined the 15,000 documents introduced by both sides as well the the 40,000-page record — and returned in 25 minutes with a verdict of "guilty on all counts".

Of August 30, Judge Landis passed sentence. Like sledgehammer blows came the terms: 20 years, 10 years, 20 years, 5 years, 20 years, 1 year, 20 years, 10 years—an aggregate of 878 years in jail for all the Chicago defendants!

Two prisoners - each having eceived the minimum of 1 year and 1 day - muttered in protest against the ghastly terms meted out to their comrades. Whereupon Judge Landies summarily changed their sentences to 20 years each. "The U.S. has seen fit to make me the judge in this case," was his retort to the storm of indignation raised by this ac-

SUBSEQUENT DEVELOP-MENT OF THE CASE

On July 28, 1919, Bill Haywood was granted bail and bonded out, leaving the country for the U.S. S. R. where he remained until his

The case was appealed to the Federal Circuit Court and on December 9, 1920 the sentences and fines on Counts I and II were struck out although a new trial was denied. The Stalinists and The Question of Aid To The Soviet Union

By JACK WEBER

The Stalinists and Aid To The USSR

From the very start Roosevelt has felt perfectly free to draw a sharp distinction between aid given to "democratic" England and aid given to Soviet Russia. Aid to England is given in accordance with the lease-lend act, which means without any expectation of payment, now or in the future, except in the exaction of imperialist advantages. Not the slightest move has been made by the President to have Congress include Russia in lease-lend aid. On the contrary, he has expressly announced that all aid would be "sold" at market prices.

The Stalinists wax loudly indignant at this treatment of the USSR by Roosevelt. They make "demands" on "their" government that this discrimination cease and that all-out aid be shipped at once in every form to the USSR. To make this demand the Stalinists naturally found it necessary to change their attitude to aid for Great Britain. Now they always couple the two together. After all, they feel, if they make no distinction between aid to one and aid to the other, -why should the U.S. government do so?

Stalin gave aid to the Spanish Loyalist government in the same way that Roosevelt proposes to give aid to Stalin. The analogy is quite exact in two ways. First of all, Stalin forced the loyalists to pay heavily in gold for the munitions so badly needed. Secondly the loyalists were blackmailed into making tremendous political concessions to get aid at all There is even another aspect to the analogy; namely, that Stalin waited with his aid until it became clear that the Popular Front Spanish government would actually put up some kind of fight and not succumb in short order to the fascists.

Roosevelt-Churchill are doing precisely this same thing with respect to Russia. Stalin must first demonstrate satisfactorily to the Allies that he can survive till the winter-time. All aid thus far (the world spotlighting of a couple of tankers with oil sent to Vladivostok merely serves to emphasize this) has been in the nature of a promise for the future. Moscow would like to see this aid expedited, naturally. But Roosevelt refuses even to hasten the projected meeting in Moscow to coordinate future plans in the military struggle. Stalin wants this meeting in September. Roosevelt says in October. Roosevelt wants the extra month to make sure Stalin can really survive that long before committing himself to anything real.

How the "Democracies" Will Aid The USSR

We Trotskyists certainly want to see every bit of aid go to Soviet Russia. But we are quite open-eyed concerning the aid given by the "democratic" imperialist nations to the Soviet Union. In the first place, these imperialists will give aid only as it suits their own interests. Right now, these imperialists congratulate themselves on the fact that the longer Russia continues the struggle, the longer the time given as a reprieve from attack by Hitler on England and the United States. Of course Churchill and Roosevelt take not the slightest interest in the survival of the Soviet state. This they tell us in so many words.

We do not follow the Stalinists in making "demands" on the United States government to give aid to Russia. We draw the same distinction from our side of the class line and the class struggle that Roosevelt draws between the imperialist countries and the Soviet Union. We refuse to be misled into political support of the "democracies" by the desire to see all aid given to the Red Army.

Long before the outbreak of the second World War, Trotsky showed the danger to the working class and to the USSR of giving any trust to whichever imperialist allies might find themselves on the same side as Russia in the coming war. Sooner or later in the course of the war these treacherous allies would turn on the Soviet Union and try to annihilate it as a workers' state. Instead of making demands on Roosevelt for aid, we should absorb, fully and in time, the lesson he and the others have taught the working class. That lesson is that the capitalists do not forget their class interests for one single moment, even in the midst of the most deadly danger.

The Blindness of the Stalinists

We must be vigilant to oppose what will inevitably come; that is, pressure by the "democracies" on Stalin for political and economic concessions as payment for aid. Stalin has agreed before the convening of any conference to the eight-point fraud of Roosevelt-Churchill. That agreement contains his promise that he will not use the "emergency" to aid any working-class revolution in western Europe. That means that if Germany should finally throw off the fascistcapitalist shackles, Churchill-Roosevelt would have a free hand to intervene and put down a working-class revolution.

Here we see the treacherous blindness of the Stalinists. Their readiness to sacrifice the future for the present, is the index of their utter pessimism and hopelessness. In England it is the Stalinists who demand that the government oust the more outspoken officials who state frankly that they would like to see Hitler and Stalin fight each other to the utter exhaustion of both. The democracies could then step in and finish off both enemies.

Instead of recognizing this as the true attitude of all allied capitalists, - what else could it be? - the Stalinists lull the workers with the idea that this is the attitude of only a few individuals. But if the British Stalinists wanted to assure full, unadulterated aid to the USSR. they would be mobilizing the British workers to take over the reins of government.

'Fortune' Says Bosses Must Learn More From The Fascists

America's Sixty Families are playing with the idea of resorting to fascist demagogy.

Fortune has the nature of a programmatic journal for the American bourgeoisie. The August issue of 178 pages is devoted to one single subject: "Total War for the U. S." A nine-point declaration outlines the problem: "This issue of Fortune is

based on the premise that, shootin the war...Yet, in a world of war, the U.S. yearns for peace - tomorrow morning." Its leading editorial, entitled "This Would Be Victory," sets the keynote for every article in the issue. The subtitle of the editorial is, "Whose revolution it is -Hitler's or ours? A few quotations with explanatory remarks will indicate the trend of thought: The editorial begins with the announcement that it "is total war ... a total effort in which the U.S. is blundering. We do not yet know what we are fighting for. And until we do know we cannot win." This is an outright admission of the failure to date of Roosevelt's war aims to convince the people. We are not fighting "to reestablish the past," continues the edi-

torial, for this is impossible. The article likewise discards Roosevelt's argument that we are fighting for democracy. "How do we know that the mechanism of international democracy, as we have used it in the past, will work in the future? The answer is that we know it will not work." Roosevelt has been telling us just the opposite.

A HITLER "REVOLUTION"

The CIO Organizes the teamsters

It must have been welcome news to the embattled motor transport workers of Minneapolis to learn that the CIO has launched a big drive to bring the drivers of Michigan into the CIO. The Minneapolis drivers, members of Local 544-CIO, have for three months been under the full fury of an attack by AFL Teamsters chief Daniel J. Tobin and his goon squads. Now Tobin must preoccupy himself with the CIO drive in Michigan, and that will make far easier the task of preventing Tobin and his friends in the state and national government from smashing Local 544-CIO in Minneapolis. All honest observers agree that Local 544-CIO has the allegiance of the workers in the industry and only by pouring hundreds of "organizers" from outside into Minneapolis has Tobin been able to maintain a semblance of a rival

The backbone of the CIO organizing drive in Michigan must of course be the United Auto Workers, whose officers are under instructions from the recent Buffalo convention of the UAW to aid the United Construction Warkers Organizing Committee in organizing the truck drivers. In a resolution welcoming Local 544 into the CIO, and condemning the federal indictment of the Local 544 leaders, the convention also approved "a nation-wide drive to bring democratic industrial unionism to the American motor transport workers" and "pledged its full support to the organizing drive of the UCWOC in this field."

Huge numbers of drivers are closely associated with the auto industry, including the "haul-away" drivers who take new automobiles from the plants. They form the first nucleus of the CIO Motor Transport Workers Union in the auto area. But a concerted drive will bring all the drivers of Michigan into the CIO. Many of them are unorganized to this day, despite the aid given by the UAW-CIO to the AFL Teamsters whenever called upon. Still others are suffering from the usual brand of Tobin unionism. The chief Detroit local of the Teamsters, for example, has been living under a perpetual dictator-receivership. In a word, the CIO has but to open its doors wide and show its readiness to protect the drivers from the terrorist gangs such as Tobin has loosed against the Minneapolis drivers, and the drivers, not only in Michigan but throughout the country, will be only too glad to avail themselves of the democratic industrial unionism of the CIO.

First Victims Of The New Stalinist Line

The first victims of the Communist Party's new warmongering line turn out to be members and sympathizers of the Communist Party itself. In betraying the interests of all the workers, the Stalinists have betrayed their own ranks as well.

The examples are numerous. In each instance, the Stalinist victims are like animals caught in a trap, but prevented by their own political line from condemning those who set the trap.

Several months ago, Morris Schappes, a New York college teacher, was framed up and convicted of perjury because he shielded fellow-members of the Communist Party during the Rapp-Coudert Committee's anti-labor drive in the New York public schools. Throughout his trial, Schappes correctly charged that this frame up and the entire activities of the committee were part of the anti-labor drive of the Roosevelt Administration bent on smashing all opposition to its war program.

However, when the time came for him to face sentence, Schappes could only plead that he had nothing against the interests of the country. Between the time of trial and the passing of sentence, the Stalinist line had changed. Schappes could not expose the forces responsible for his conviction for his "comrades" were in the same war camp as the prosecutors.

Prior to the calling-off of the Negro Job March on Washington, scheduled for July 1, the Communist Party loudly warned its Negro followers to beware of "backsliding" on the part of the pro-war sponsors of the March, who would grasp at the slightest opportunity to call it off. A week before the March was to take place, and while the Stalinist rank-and-file were putting on all possible pressure to ensure that it would not be sabotaged, the Kremlin decided to support the Allied imperialists. The March was called off. But the Daily Worker said not a word about this betrayal. The bewildered Stalinist rank-and-file had to do their own "explaining" to the disgusted Negro workers.

When Roosevelt smashed the North American Aviation Corporation strike with troops, early in June, the Stalinists could find no words harsh enough to condemn this act, and gave full support to the strike, which was led by their own members.

But at the United Auto Workers convention in August, the Stalinists joined in knifing the North American workers - including the Stalinist leaders of the strike - by denouncing the strike as "a mistake."

Members of the Communist Party and the Young Communist League who were drafted into the army had been assured by the Stalinist leadership that the party would fight for their interests as conscripted workers.

But when Roosevelt proposed to extend the service term, the drafted Stalinists were shocked to learn that the most ardent supporter of Roosevelt's proposal was the Communist Party.

The most striking of all these cases is that of Earl Browder, head of the Communist Party. When Browder was sent to the federal penitentiary on a frameup charge, the Stalinists cried:

"The decree against Browder is a sign of the wave of reaction in the country stemming from Wall Street for whom President Roosevelt is chief spokesman and war-party leader." (Statement of the New York State Committee, Communist Par-

Today, Browder is still in iail. But the Communist Party cannot tell the workers why. "Open the doors on Browder - Close the doors on Appeasement" cries the Daily Worker. It cannot say that it is Roosevelt and the war-mongers who put Browder in jail and are keeping him there. Now, it can only whine that Browder is the victim of the "appeasers."

The Stalinists lick the boots of American imperialism. But that doesn't save them from feeling the imperialist heel on their own necks.

The Great Hypocrite

A little over two months ago, when Negroes planned a Job March on Washington, Roosevelt got the leaders to call off the March by his promise that all employers getting contracts from the government would have to obey a clause in government contracts prohibiting racial discrimination in their employment policies.

The "joker" was that Roosevelt's executive order on this question provided no penalty for those employers who refuse to abide by this clause. The Fair Employment Practices Committee that Roosevelt set up to watch the operation of this clause has no power to do anything to employers who violate it. The record has been made by Roosevelt, but nothing basic for the Negroes was changed.

In the same pattern was Roosevelt's letter last Saturday about racial discrimination in governmental departments. Again there were only words, but nothing to indicate that Negroes will get jobs in these departments.

In his letter Roosevelt admits that there is a "lack of uniformity and possibly some lack of sympathetic attitude" by the department heads toward this problem — which is a polite way of saying that Negroes aren't getting jobs in most federal departments. Roosevelt says he wants "a thorough examination of their personnel policies and practices" so that the department heads "may be able to assure me that in the Federal Service the doors .of employment are open to all", etc.

Roosevelt does not demand that Negroes be hired in these departments. All he asks is that he be "assured" by Jim-Crowing department heads

that there is no discrimination. Negroes must see through Roosevelt's hypocrisy. They must realize that he and his stooges on the Fair Employment Practices Committee are only playing a game with the Negroes. There is only one way for Negroes to act - organize their forces for a finish fight against Jim Crowism everywhere.

Gen. De Gaulle Plans To Restore Monarchy

French Stalinists Disarm The Workers By Demanding 'Unity' With Both The 'Democratic' and Royalist Forces

By MICHAEL CORT

Pertinax, an authoritative French political journalist now 1 by considerable sections of the living in the United States, has publicly appealed to General working class. Charles de Gaulle to declare himself in favor of the "democratic Republic" form of government. This appeal will come as a shock to many who have always taken it for granted that de Gaulle and his "Free French" forces were battling for the "democratic way of life.'

In a signed article in the September 3rd New York Times, Pertinax admits that de Gaulle has been "pressed" repeatedly to declare himself in favor of the restoration of the Republic in France once Hitler and Petain are defeated, but that the General "has felt that the best course 9was to leave the whole question | case a symptom of the profound severely alone." Pertinax charges unrest of the workers and certain

Pertinax, a bourgeois liberal, is concerned however. He understands that the trappings of a monarchy hold little appeal for the masses. He hopes that the old democratic mirage will be able once more to lure the workers. He sees unmistakable signs that conditions in his country are ripening into a revolutionary situation. He hopes, with the help of the British and American capitalists to be able to channel the gathering wave - divert it from the direction of a workers' revolution. De Gaulle's monarchism is an embarrassment to the "democrats" at this point.

Last week three Frenchmen, held as hostages, were executed by the Nazis in reprisal for the wounding of a German sergeant by an unknown assailant. This week Paris was flooded with leaflets which warned the fascists that for every Frenchman shot the army of occupation would be killed in the streets.

FRENCH RESISTANCE INCREASES

But Petain's surrender to Hitler and his adoption of fascist methods have only served to further arouse the people. The release from Vichy prisons of socalled syndicalists and other anticommunists to serve as agentprovocateurs among the workers, the appeals for unity from renegade radicals and trade unionists, the gun and the whip and the guillotine - none of these devices have been effective in luring or frightening the desperate French people into passivity.

Hitler's invasion of the Soviet Union supplied a tremendous impetus to underground activity in France. The Stalinists still retain considerable forces and there can be little doubt that they were active in the mass wave of sabotage aimed at preventing the de-

The success of the campaign of sabotage against the Nazis can lead to increasing militancy on the part of the workers and open the possibility of bringing them into motion against the bosses.

For this the workers will need only a leadership and a program that will clearly label their enemy and organize the fight against him. The Stalinists have failed to supply that leadership and that

Maurice Thorez, General Secretary of the Communist Party over the illegal French radio station, said, "...all honest Frenchmen, regardless of party affiliations, political or religious convictions, must unite."

This is far from leading a class struggle against the boss class. The Stalinists unite with some of the bosses against others. They unite with the de Gaullists who are working for a return of the monarchy. This would mean if the Stalinist advice were followed - the tying of the workers to a force which is committed to the continuance of the capitalist system, and would lead inevitably to struggle by the Stalinists against the workers' revolution. Only a workers' revolution that will put an end to the capitalist system can put an end to Hitlerism and Petainism.

The French workers are at a cross-road. If they are to free themselves, they must remember the lessons of the Popular Front under Blum; the betrayal of the Loyalists in Spain; the passivity of the labor leaders in Germany when the bosses gave power to Hitler; and the butchery of the unsuspecting Chinese masses by Chiang Kai-Shek. All these drive home the point - the workers can place no confidence whatever in those sections of the ruling class that from time to time pose as hostage, ten Nazi soldiers of liverance of vital war supplies to as their ally. Where We Stand

The General Staff Of The Red Army

The magnificent resistance offered by the Soviet army to the Nazi attack is correctly attributed to the morale of the soldiers in the Red Army.

By Albert Goldman

The Stalinist leaders try to use this fact as proof that all that Stalin did before the war was justified - especially the arrest and execution of Tukachevsky and thousands of other leading officers of the Red

Politicians and journalists in the service of the "democratic" imperialists are also now singing the praises of Stalin. While they do not say that the execution of the leading officers was justified, they claim that the way the Soviet soldiers are fighting proves that the execution did no harm to the Red Army.

What a shameless misuse of the courage and sacrifice of the Soviet soldiers!

The fact remains that the Red Army has suffered serious defeats and has been compelled to relinquish huge and economically important slices of territory. It may be that by its fighting capacity the Red Army will succeed in stemming the advance of the Nazi army, and even of defeating it, if the German losses are great enough. But if that happens, it surely will not be because of Stalin and his general staff.

In a long war the economic superiority of Germany would be the decisive factor. But in the early stages of any war that factor is not decisive. The decisive factors at the beginning of a war are the number of men, the equipment, training and morale of the army, and the quality of the staff work.

Numerically the Red Army is larger than the German army. In equipment, both quantitatively and qualitatively, the Red Army is at least equal to the German army. In morale it is superior.

Why, then, should the Red Army be retreating? Why shouldn't the Red Army be on German soil rather than vice versa? Why should an army composed of such valiant fighters be losing so many bat-

The only answer possible is the inferior staff work of the Red Army command. Every other military factor favors the Red Army. The explanation for the defeats lies, therefore, in the lack of staff work and the lack of staff work is due to the execution of the leading army officers. That should be as plain as day to everyone not a Stalinist or a pro-war journalist interested in covering up the real defects of the Red Army.

Why The "Democrats" Are Pleased

Why are all the politicians and journalists, serving the interests of the "democratic" imperialists, so elated at the showing of the Soviet Army? Why are they so enthusiastic about the "successful" defense of the Soviet Union?

ferent from the standards of those sincerely devoted to the interests of the Soviet Union. The servants of the "democratic" imperialists are interested in the resistance of the Soviet Army to the Nazi imperialist army only insofar as that resistance is of aid to the "democratic" imperialists. Their hope is that the Soviet Army will exhaust the Nazi army and assure victory for the "democracies." At the same time they hope that the Soviet Army will itself become exhausted so as to leave the Soviet Union at the mercy of the "democracies."

To the "democratic" imperialists every week that the Soviet Army continues to fight means that much more time in which they can prepare and it means more losses for the Nazy army. What do the "democrats" care about the territory that the Soviet Union loses? What do they care about the enormous sacrifices which the Soviet people must undergo?

To the "democratic" imperialists the destruction of the Soviet Union would be welcome if only it does not take six weeks but sixteen weeks - better still if it takes a year and involves a winter campaign for the Nazi army.

The Stalinists Fall In With This

And the miserable Stalinists fall in with that attitude! They who boasted about the invincibility of the Red Army, they who proclaimed that the Red Army would be in Berlin before the Nazi army would take Moscow, are now proclaiming as victories the constant retreat of the Red Army.

And they dare to justify the murder of the leading officers! They forget to mention, of course, that it was Tukachevsky and his associates who mechanized the Red Army and who built the so-called Stalin line of fortifications.

The Red Army would in all probability be invincible, had not the Stalinist bureaucracy chopped its head off and left it in the hands of tenth-raters. One of the reasons that Hitler ordered the attack on the Soviet Union was that he knew how weakened the Red Army was by the acts of Stalin. The fascist imperialists, like the "democratic" ones, did not count on the spirit of the Red Army but, alas, they were right in counting on the weakness and incapacity of the Red Army staff.

The magnificent morale of the Red Army may yet prove the rock upon which Hitler will break his head. Hitler may be beaten ultimately because of the enormous losses suffered by his army in the campaign against the Soviet Union. Or it may even be that the Soviet Army, after exhausting the Nazi army, may actually drive the Nazi army back.

If that happens the Stalinists will boast that it was due to the execution of the leading officers. But the Soviet soldiers know better - they know that they are compelled to make such enormous sacrifices because of Stalin. |They surely know that they are compelled to retreat now, in spite of their resistance, because of Stalin.

Hitler's Program For The Soviet Collectives

On August 20, the Reich, the official organ of the German far removed from socialism and imperialists, announced to the world that the Soviet collective farms — the kolkhozi — would be retained in the areas of the Soviet Union occupied by the German troops. There has been no comment from the Kremlin. Nor has the Daily Worker seen fit to point out that so far as official Nazi propaganda is concerned this move represents a complete about-face.

lectives in favor of "freedom of the soil and individual property for the Russian peasant." Hitler had undoubtedly hoped to rally strain on German industry; that Russian peasants to his side by means of the self-same demagogic promise with which he had duped the German peasants to whom he had also originally promised land. Since June 22, when the Nazi assault was launched, the German press has waged a campaign attacking Soviet economy, and especially singling out the collectives as one "of the worst forms of 'economic' slavery' and as one of the extreme cases of Soviet inefficiency and mismanagement" (N. Y. Times, July 12).

A censored dispatch from Berlin explains the about-face as follows:

"It is realized that the maintenance of agricultural production at anything like its level in the Soviet days could be safeguarded in the German interests existing organization of agriculoutlines" (N. Y. Times, August | monstrous lie of Stalin's.

In other words, this move, on Hitler's part, represents a retreat in the face of insurmounttion of the local peasantry could tives, in and by themselves, are silent on this topic!

The Nazis had boasted hitherto ochretia that they would abolish the col- conceivably be rallied to the Nazi camp.

At the same time, Hitler runs the risk of placing a further would be involved in any attempt by Hitler to retain the collectives. For it is impossible to operate the latter without machines, tractors, oil, etc., so urgently needed by the war machine. Thus far from facilitating the tasks of occupation and economic exploitation, this latest plan of the German imperialists can in the long run only seriously aggravate them. Obviously, Hitler has no tives there are embryo rural other alternative.

But how is it possible for the Nazis to try this "experiment" with the collectives in the territory they occupy? Isn't this tantamount to the adoption even if temporarily-by the fascists of "socialist forms of economy"? Not at all.

Nothing could be further from the truth than the conception that in retaining the collectives only if, for the time being, the Hitler is gambling with socialism against his will. Historical events ture were preserved in its main are once again exploding another

form of large scale farming. They are no more incompatible with the capitalist mode of production than are, for instance, various types of cooperatives. Under Stalin's regime, the kolkhozi have remained far closer in type to pettybourgeois cooperatives than to the communal agricultural enterprises which are possible only under socialism. It is just for this reason, and this reason alone, that the Nazis can now even speculate on the possibility of utilizing the collectives to serve their purposes Within the kolkhozi as they are now constituted, their exists a pro-

"The collective farms...are to continue operation," states Berlin, "under managers who will be selected from the 'more expert and diligent peasants', according to the provisional orders cited" (N. Y. Times, September 1). This fancy formula of "more

expert and diligent peasants" is merely Hitler's way of designating the kulaks for whom the collectives have long provided a cover. Hitler's "provisional orders" reveal the class composition of the collectives for all those who have eyes to see. Only the blind can fail to understand that ed what the Stalinists have al-
