Why Britain Is Bargaining With India

The British ruling class is now powerless to stem by force the surging tide of Indian emancipation. Freedom for India lies within the grasp of the 400 million people of that oppressed country.

But what it can no longer successfully retain by force, the British ruling class now hopes to hold by cunning, by bargaining and by promises.

From Downing Street come hints of inducements and concessions to India. Feelers are being put forth designed to determine how little the British ruling class will have to pay for India's support of the war.

Downing Street is tendering offers of a "greater political voice" for the people of India, "dominion status" — in short, anything but the removal of the British yoke from India.

Chiang Kai-shek, misusing the prestige of the Chinese masses who have fought so gloriously for their national independence against Japanese imperialism, is enlisted as an "honest broker" by the British ruling class. He is sent to India to convince the masses of the magnificence of Britain's offer.

Likewise the American ruling class rushes to add its assurances that India's independence is close to its heart. The American capitalist press suddenly raises a loud "anti-imperialist" chorus. The New York Times speaks of the "faded trappings of imperialism." Writers like Walter Lippmann and George Sokolsky, spokesmen for American capitalism, who never before have spoken on behalf of freedom for colonial peoples, now "insist" the British government must make "concessions'

British imperialism offers its worthless IOU's to India. And Chiang Kai-shek and the American capitalist class offer to act as co-signers for these promissory notes, as though this might give them added value in the eyes of the Indian masses.

Some Indian elements — the native capitalists and landowners — undoubtedly will be willing to accept these latest promises and compromise proposals from Britain in return for a few privileges for themselves. They have always considered themselves to be the "junior partners" of the British rulers. They are as horrified as the Colonel Blimps at the idea of an India free of British rule - an India where there would no longer be British guns to support the native capitalists and landowning princes against the masses.

But the Indian workers and peasants will not be sidetracked from their struggle for freedom by any bargains, compromises and clever maneuvers. The shoddy offers of Downing evitably to a new and greater Street will not induce them to sacrifice their tremendous manpower and resources in a war for the British ruling class.

The masses of India know that those who now keep them enslaved are speaking of concessions only in desperation. They know that the promise of "independence" is being made merely to maneuver them into saving the hide of the British master class. They know that the British ruling class has no intention of freeing them, that as soon as it has the power to do so, it will tighten their shackles once

The struggle for the national independence of India is not dian people for national indethe battle of the Indian masses alone. It is as much the struggle he workers everywhere, and of the British workers in par-

The salvation of the British working class is indissolubly bound up with the struggle for national independence for India. The British workers must cement a firm alliance with the Indian masses to wage a common, victorious war against world

capitalist reaction. That alliance can never be achieved so long as the class which has brought centuries of oppression to the Indian people remains in power in Britain. The British ruling class can never win the friendship and loyalty of the people of India. The British rulers only alienate the colonial masses and make impossible an alliance between them and the British masses.

Such an alliance can be realized only when the British workers take their fate out of the hands of the Colonel Blimps, the Churchills and all their reactionary tribe, and establish their own Workers' Government.

A Workers' Government in Britain would remove of a superficial character, and tally different from his — and from the ruling class the control of the means of production and determination of domestic and foreign policy. It would demonstrate to the people of How Stalin Greeted Red India that they are fighting with the British workers in a common cause against a common enemy. It would immediately proclaim the unconditional national liberation of India.

Then, in the name of a genuine alliance of the oppressed masses everywhere, it would call upon the Indian people, the versary of the Red Army, Stalin did not dare tell the world workers and peasants of the whole earth, to mobilize themselves what the Red Army really is and what it is really fighting for. into an unconquerable army of hundreds of millions, to join it | The Red Army was born under the banner of international in a struggle against fascism and all other forms of capitalist solidarity and the struggle for socialism.

Is Silent About Uninterrupted **Profits Of Bosses** "3 High Purposes" Would Leave Workers

Helpless Against the Open-Shop Employers

Much of President Roosevelt's radio address of last Monday night was aimed at bolstering the morale of the American people, badly shaken by the Anglo-American defeats in the Far East. But the most important and most emphatic portion of his speechand recognized as such by the leading capitalist newspaperswas the program he enunciated on domestic policies, particulary as these applied to labor.

Introducing and keynoting this program was the sharp injunction: "...there is one thought for us here at home to keep

If he did not dimaterial gain out of the war. rectly specify this, it was because Roosevelt, however, had nothing he did not wish to be accused of attempting to impose a partial attitude on a presumably impartial Board in the very midst of negotiations.

GIVE UP CONVENIENCES

His final "high purpose" was: 'We shall give up conveniences and modify the routine of our lives if our country asks us to."

Anything that a worker gives up must come out of his living necessities. The only things he has which he can sacrifice are part of his food; clothing, recreation, medical care.

But what "conveniences" will the capitalists have to give up? Most of their profits go into banks and government bonds. Rising prices and scarcity do not exhaust their huge incomes. And even if the bosses did have to give up a little, it would mean not a lowering of their living standards, but that they would have a little less to put in the bank. All such "sacrifice" would mean to them is less in their capital

The United the disease of capitalism in de Soule states what he thinks ought war is already a revolution, that States, with its highly productive cay. The health of the social system to be the aims of the present war it is being fought on two fronts! technology, and conditioned by tem can be restored only by the and the construction of a "New the world economic crisis, could not possibly stay out of a war higher stage of socialism. But The complete bankruptcy of his whose outcome was bound to influence, its entire future.

George Soule and his fellow New Republicans cannot stomach the unvarnished truth. They seize on more idealist grounds to motivate their support of the war, In his article, Lessons Of Last Time, in the Feb. 2 New Republic, Soule says: "The issues of the present war are far simpler and clearer than those of the last

These issues, he says, have to do with fascist brutality which Soule is forced to admit that this was not seen as the menace it was from the very start. Soule skirts carefully around this histhreatens to destroy civilization. skirts carefully around this historic truth. He does not wish to be led to the heart of the entire matter.

Eascist brutality was applaudskirts carefully around this his-

Fascist brutality was applauded and aided by the capitalists of It first world war would be followed by ization against Bolshevism. was not Stalin, but Churchill who hailed "that great man, Mussolini," and who spoke with respect of Hitler.

So long as fascist brutality was confined to the punishment of the working class, monopoly capitalism and all its henchmen in other countries made no complaints. Only when "fascist brutality" reached beyond its own borders to threaten the interests of the others, did the ."democracies" discover its menace to civilization. Soule notwithstanding, we may cross off fascist brutality as the cause of the war.

THE DEEPER CAUSES

Simple and clear as the causes of the present war would seem to be, Soule is obviously not satisfied with his own explanation He seeks deeper causes. He is forced to trace Nazism back to the frustration of Germany resulting from the peace imposed by the victors of the first world war. This is a partial explanation, a half-truth. Soule wishes to evade the question hidden in any discussion of social problems, whether the discussion concerns the war, fascism or democracy.

Was Nazism inevitable in Germany? An honest discussion of that question would show where one stands on the main issue of our epoch. The Weimar Republic was doomed by the forces playing within German society. Those class forces (how Soule skates around ideas to evade the class issue!) pitted the workers against the capitalists in the struggle for power. Let us ask a simple question. Since Soule hates fascist brutality, would he now say that looking back he would have preferred the workers to have carried through the proletarian re-

volution? The capitalists of France answered this question for themselves in the present war. They preferred to capitulate to the brutal fascists than to have the workers of France come to power. Are the English and American capitalists different from the French? We venture to say that if they were faced with this same choice, that between defeat by Hitler and proletarian revolution, they would act no differ-

this man who has the effrontery to tell us that the second world "First is the military fight ative world order, the military

thought they might be able to world order to continue. They seems not to discourage them in the Who is to inaugurate the "re-

ing participant for such a short time To Control Shipping Too Similarly, high officials have been dealing with the post-war problem have made it clear that in their opinion it will be necessary for a considerable time after the war to control not only the raw materials but the shipping of the world for the good of those nations - and those nations alone who are prepared in keeping the peace.

"Mr. Churchill has thus cooperated with Mr. Roosevelt in setting up machinery to control most of the strategic raw materials and shipping of the world not only for the duration of the war but for the days after the war."

Reston concludes his article by saying this plan for "Anglo-American cooperation" after the war has not been wholly and completely worked out, but that "the higher one goes in the ranks of the Administration the more talk one finds of this war-time machinery's forming the basis of some kind of solid, practical, economic collaboration for peace."

In short, it is already obvious that the promises of the Atlantic Charter are following the same path as the promises of the "Fourteen Points", only perhaps at a more accelerated pace.

When Churchill spoke to Congress, he said that five or six years ago it might still have been possible to avoid the war if the United States and Britain had insisted on disarmament and if they had made available to Germany "those materials, those raw materials, which we declared in the Atlantic Charter should not be denied to any nation, victor or vanquished."

But if the struggle over raw materials (and shipping to transport those raw materials) led to the second world war, is it not clear that the course now proposed for the "United Nations" will lead in the future along the path of renewed economic warfare that is certain to result in a third world war?

Why Churchill Is "Cantankerous"

It should not be assumed that Churchill was reluctant to discuss the post-war problem because he had a different program than Roosevelt's. He was "cantankerous", actually, because he realizes that Great Britain is fated to play a secondary role after the war, that United States capitalism will hold the upper hand in the event of a victory by the "United Nations"; he prefers to "wait and see" before committing himself.

Ray Tucker, a Washington columnist,

gave a partial indication, in his Jan. 25 other papers, of why Britain hesitates to commit itself on post-war questions:

"The Mikado's unforeseen eruption Dec. 7 spoiled the smartest game of international poker Uncle Sam ever hoped to play. The emperor's subsequent successes may also have robbed us of chips we had planned to use at the peace ta-

"The inside story", as he calls it, "reads like fiction":

"William Yandell Elliott, an economic adviser at Office of Production Management, had framed the blue-prints for formation of an Anglo-American cartel dominated by the United States. The Elliott corporation would have obtained control of many key resources of the British, Dutch and Free French empires as well as those produced in this country - our claim to majority ownership, according to the Harvard professor's formula, to depend on the billions of lend-lease funds we are advancing to our friends. Some return was forecast for our vast investment. Our post-war supervision over this pooling of the world's gold, food, rubber, tin, oils, fats, sugar, petroleum, etc., would have provided us with some ace cards in any final dickering with the Allied victors and Axis vanquished."

That this proposal was not an individual and isolated idea is shown in Tucker's statement that "it tickled the fancy of materialistic and starry-eved fellows as close to the White House as paper on the wall."

Seed of Future Wars

Tucker concludes, "Now the deal is off because Messrs, Hirohito and Tojo occupy the lands to which we hoped to stake a claim. And the 'scorched earth' retreat from that area may make them a liability rather than an asset after the war." If the only reason that "the deal is off" is because Japan temporarily controls some of these areas, and because of a "scorched earth" policy which notoriously has scorched very little earth. then probably the deal is not off after all, and certainly not permanently.

But whatever the outcome of this particular "deal", it is obvious from the way the war is being run, and from the conflicts between the "United Nations" themselves, that as long as capitalist policies and rivalries rule the world, the seed of future wars is present and will be nourished.

THE BILL **OF RIGHTS** IN DANGER!

Labor Needs Its Own Military Policy

Walter Reuther, director of the General Motors Division of the United Auto Workers, suggested on Feb. 22 that members of labor unions be given military training "to assist the Army in the event of enemy attacks on coastal cities and defense production areas.'

Leaving aside Reuther's motivations in making this proposal, there is no question but that in this period workers in civilian life require military training for the protection of their own class interests. Most workers will agree that military training is a handy thing at a time when all the important questions of the day are being decided arms in hand.

But under what conditions shall the workers in the trade unions receive military training? Who shall control the program? Shall workers receive only the training given to privates in the Army or shall some of them receive more specialized and intensive training in the military arts enabling them to become military leaders, that is, officers? What shall be the relations between the workersoldiers and the worker-officers? How shall such a program be financed?

The answer to these problems, which are certainly as important as the recognition of the need for military training, can be found in the program, long advocated by THE MILITANT and the Socialist Workers Party, for:

"Military training of workers, financed by the government, but under the control of the trade unions. Special officers' training camps, financed by the government but controlled by the trade unions, to train workers to become officers."

Just as the workers look to the trade unions to protect their interests on the economic field, so should they look to them to protect their interests on the military field. Far better for them to receive military instruction under the democratic control and direction of their own trade unions than under the direction of the brass hats whom they have learned through experience to suspect as hostile to the interests of the labor movement.

If the units of workers are to be effective as a trained force, they must also provide for special training of workers as officers. Such training will take more time and cannot be given in afterwork hours. Special camps must be set up where selected workers can become trained as officers capable of leading their brothers in battle.

What would be more democratic than to have the worker-soldiers choose their own officers, as they do the trade union officials? Where could they find people more devoted to their interests, more trustworthy, than the same shop-stewards and union militants who lead them in their everyday struggle for better conditions?

As for finances, what proposal could be more logical than to ask Congress to appropriate the necessary money? When Congress can spend more than a hundred billion dollars in the name of a war against fascism, why shouldn't it be called on to spend a few million dollars to enable the training of a force that would be the strongest possible guarantee against the establishment of

fascism in this country? Our program for military training has been based from the beginning on the understanding that workers must learn how to use the advanced military techniques used by their enemies. Superficial critics of this program used to sneer that we needn't worry, the government would see to it that

the workers would get such training in the army; they chose to ignore the special problems created for the workers in the new situation of world mili-

But now that the spread of the war has led to a growing realization of the need for military training of the workers in civilian life as well as of the soldiers, who can honestly deny that our program alone provides protection of the special class interests of the workers? Who now will deny that the workers would have been much better off today if the trade unions and other workers' organizations had adopted such a program long ago?

Anti-Labor Offensive

It was necessary to read a bit between the lines of President Roosevelt's speech Monday night to see that his main emphasis was directed against labor and its demands for higher wages and the

But it is not necessary to read between the lines of the statements of Roosevelt's subordinates and Congressional supporters to understand that the Administration is supporting an intensive drive against the rights and conditions of the working

An Associated Press dispatch on Feb. 25 reported that a "drastic 'work or fight' " law may soon be sought "by the Administration" at the behest of "officials charged with responsibility for allout production" — the corporation agents of the War Production Board.

Price Administrator Leon Henderson, and his assistants, have been publicly urging against any general wage increases in the face of rising prices, and Henderson has bluntly demanded that the War Labor Board deny the general wage demands of the CIO.

On the heels of Roosevelt's speech, Democratic poll-tax Representative Howard Smith on Tuesday announced in Congress that he would sponsor a measure to suspend the Wage-Hour Law for the duration of the war. And the press reports that he is receiving wide-spread Congressional support for his proposal.

All facts point to an intensive co-ordinated antilabor drive of the corporations, capitalist press and Congressmen, to whose fire Roosevelt's speech added much fuel.

Significantly, every blow is being directed at labor. None are being struck at the monopolists and war profiteers. Under the pretext of war-time necessity, the employing class is striving to put over the union-smashing, labor-crushing program it could not realize in peace-time.

War Secrets And Civil Liberties

The Department of Justice on Feb. 16 sent to Congress a proposal for a law making it a penal offense for any one to make public, without authority, "any file, instrument, letter, memorandum, book, pamphlet, paper, document, manuscript, map, picture, plan, record or other writing" designated by any government agency as "secret" or "confidentiàl", or even to divulge its "substance, purport, effect or meaning.'

This was so obviously a measure which could be employed to censor and silence discussion of any report, document or activity of the government and any individual in the government, that even reactionary Congressmen and the entire capitalist press condemned it.

Attorney General Biddle, who had sent the bill to Congress, was called on Feb. 24 before a hearing of a Senate committee. Although he had sought to sneak the bill through in its most drastic form, Biddle yielded a bit under pressure and told the committee that if it wanted to modify the bill that was its privilege. "I am bringing this baby to your doorstep.'

The Senators, of course, held no objections to the main purposes and basic contents of the bill. They sought merely certain emendations which would enable them to say what they had to say.

But these modifications would in no wise eliminate the central vicious feature of the bill, which could still be employed as an instrument to keep from the public not only military secrets but also information which might draw criticism and popular opposition.

This bill was drafted years ago, but the favorable opportunity did not arise to present it until the current war situation made it possible to introduce it in the guise of a measure to safeguard military secrets.

That this is not, however, and never was the primary intent of the bill is indicated by I. F. Stone, in the New York newspaper PM, Feb. 18, who disclosed that "a high official of the Justice Dept., whose name I cannot disclose, said this bill had nothing to do with the war effort and had been under discussion by an interdepartment-'al committee for several years. This official said the bill antedated the war."

Even if this bill should not be passed, the fact that Biddle and the Department of Justice have sponsored it constitutes a timely warning to the American masses of the dangerous channels in which the Administration's mind is travelling.

(Continued from page 1) policies; it shows that fundamentally his program is no different from Churchill's.

THE "RADICAL'S" APPEAL

All Cripps had to say to the German workers was that Hitler faced "certain defeat" eventually. He declared that the workers of the USSR and Britain are ready to do their utmost to achieve this, and predicted that although Britain had lost its domination of the seas in the Southwestern Pacific, "the Allies will regain their superiority."

In other words, he did not say a single thing that could possibly arouse the German workers thing that Churchill himself said many times. Apparently, now that he holds a cabinet post, he is quite content to forget about an immediate clear enunciation of peace aims.

As a matter of fact, the probable effect of Cripps' speech was: to throw the German workers into greater despair and passivity. They fear that a victory by England will result in another Versailles Treaty and the same kind of suffering they had to endure after the first world war.

And when the "socialist" ed "the most dangerous revolu- to change this policy either. tionary in England", has nothing more to say about what will happen to the German people after the war than Churchill or Eden, and has nothing really to tell the war, their fears are increas-

Prime Minister Of An Empire In State Of Decay

By M. STEIN

Churchill's Vote of Confidence

"When I was called upon, nearly two years ago, to be Prime Minister there were not many applications for the job." Thus spoke Mr. Churchill on Jan. 27 before the House of Commons when he demanded a vote of confidence.

Churchill's monopoly attitude to the post of Prime Minister would have been impossible even in the first quarter of the present century. The young, vigorous, yet untried, rising Labor Party was in the field, ready to assume leadership, and holding out the promise of Socialism to be established in a legal, parliamentary. . . British way.

How Times Have Changed. . .

And to go a step further, such an attitude was inconceivable in the decade preceeding the present war. By this time, it is true, the Labor Party had had its turn at the helm of the Empire. It betrayed its Socialist promises, brought discredit on itself, was swept out of office through the faked "Zinoviev letter" which the honorable Tories, all coming from good families, of course, did not hesitate to use. The Labor Party was in addition split and beheaded by Ramsay McDonald and his ministerial friends who went over lock, stock and barrel to the Con-

Even though parliamentary life was dull in this period - between the debacle of the Labor Party and the outbreak of the war - there were plenty of candidates for the job of Prime Minister. The truth is, the qualifications for this job had been lowered considerably. The primary task of a Prime Minister was to sit tight. The work of the foreign office was carried out in routine fashion by the professional secretaries and diplomats. The other tasks were even more so a matter of administrative

There were such matters as Italy's assault on Ethiopia, the Spanish Civil War, Japan's attack on China. But the British genius for compromise always found a solution- let the rival imperialists take what they want, and as long as it isn't a chunk of the British Empire, a face-saving formula will be found some-

If Churchill bestirred himself and made a speech in the House of Commons about the speed with which Nazi Germany was arming itself, and about the resultant danger to the British Empire, it was easy to answer him. All one had to do was to point out that Henderson, Ambassador to Germany, was Hitler's bosom friend, that he was being feasted by Goering; where this did not suffice, a whisper into the ear of those who really counted, that Hitler's war preparations were really directed against the Soviet Union, was enough to do the trick. This was the era in which a Baldwin could do equally as well as a Chamberlain or for that matter anybody else on the roster of Conservative members of Parliament who might be picked out of a hat.

Then came the blitz and the storm. Poland was overrun by the Nazi war machine. That was explainable. Poland was an inland country pretty well encircled by Germany and there was no way of reaching it with aid. At least this was a good excuse. But following the fall of Poland, Norway fell, despite British aid. It is true this too was no chunk of the Empire, but it certainly was a blow to Imperial

Churchill's Unique Qualifications

The early Allied defeats resulted in the rise of Churchill to the post of Prime Minister. For who was there among the politicians more eminently qualified than he?

He was the most gifted speaker in the House of Commons. One does not need great eloquence in proclaiming victories - they speak for themselves. But one needs the gift of a Churchill to explain away defeats. Churchill will go down in history as the greatest post-mortem speaker of all time. Is there anything that can compare to his famous speech about "blood, toil, tears, and sweat"? The fact is that in this speech he outdid even himself. After Dunkirk came Greece, Crete and now Singapore.

His Singapore post-mortem speech was only a pale shadow of his previous orations; but perhaps he can be forgiven for this, perhaps he felt the situation too deeply and too personally. Just try to put yourself in his position. How would you feel about the loss of one of the richest jewels of the Empire which is under your stewardship, especially when there is so little promise for a turn in fortune?

It makes good rhetoric when you stand before Parliament and point to America and its tremendous industrial resources; point to Russia and the glorious victories of the Red Army; point to China and its tenacious fight for independence. But the honorable members of Parliament know that the Red Army is not fighting for the preservation of the British Empire; that if anything, China's struggle for independence is a bad example for the oppressed masses of India; and if one heeds rumors, he might entertain a germ of a doubt as to whether Wall Street is entirely unselfish in its solicitude for the British

Who represents the greatest menace to the Empire - its enemies or its allies? This question looms bigger to the M.P.'s as times goes on. But here again Churchill and his unique position provide them with the only ray of hope they can see.

Churchill knows his indispensability and he makes the most of it. This is why he can stand up before the august body of Parliament and say: "The House would fail in its duty if it did not insist on freedom of debate and a clear, honest, blunt vote thereon." Ordinarily, these words would be merely an expression of a democratic platitude. On the lips of Mr. Churchill, they become a grim joke. He knows what all the members of Commons know, that they have no alternative but to vote for him, so what's the use of talking. And when Churchill continues, "It is because things have gone badly and worse that I demand a vote of confidence," he is sure he'll get it. And then to emphasize his obvious contempt for his parliamentary colleagues and the predicament they are in, Churchill adds: "No one should be mealymouthed in the debate. . . no one should be chickenhearted in the division lobby."
