# **Striking Miners Stand Firm For Social Demands**

By Joseph Keller

APRIL 13-The 400,000 soft coal miners on strike since April 1 mean business about securing their precedentmaking social demands before they will even consider the question of wages. This was brought home sharply to the stunned mine operators when AFL United Mine Workers President John L. Lewis and the UMW negotiating committee dramatically broke

off negotiations on April 10 and stalked out of the conference room.

"We trust that time, as it shrinks your purse, may modify your niggardly and anti-social propensities," declared Lewis at the conclusion of a scathing statement he read to the operators just preceding his walkout.

From the very start of the mine union negotiations, the UMW representatives have insisted on the consideration of a series of life-and-death social demands going far beyond the wage ques-

#### WHAT DEMANDS MEAN

These are directed at eliminating the terrible toll of accidents in American mines; providing adequate health, medical and sanitation facilities in the filthy, decrepit company towns; ensuring the welfare of miners' widows and orphans; compensating the injured and their families; restricting the price-gouging in the monopoly company stores and strip mines in this area had stoprent-gouging on company-owned dwellings.

To all these vital demands of the miners the smug, grasping operators replied that the mine union committee was merely bringing up "time-killing trivia with the obvious intent of stalling negotiations and creating

#### a national crisis." TERRIBLE TOLL

These "trivia," as Lewis demonstrated at the very opening

country to be slaughtered, @ why should it be so difficult | ing to keep meat off the market. to buy meat?

Just a short time ago the major packers of the country workers it rightfully seems that were brought to their knees by Big Business and the government the strike of the packing house workers. The "big four" (Swift, Wilson, Armour, and Cudahy) were closed down by a national sabotage of their food supply by packing strike that shut down every plant in the country. This was the first strike of its kind were the packers faced with such CIO Veterans solidarity of the workers.

For two weeks the plants were In Buffalo shut down and finally the Federal government came to the aid of the packers and took over the

The workers went back to work with the promise that they would set a substantial raise. The Plans for a mass meeting of plants were then taken over by veterans as the first step in the government and operated under the regular supervision of the company. After a short time the government announced that the workers would receive a 16cent per hour pay increase at the same time that the packers would get higher prices.

To those who knew the industry it was clear that the price the unemployed veterans, and "relief" given the packers would an immediate end to the violaeasily pay for the 16 cent increase. Now the packers claim that price ceilings must be done away with and they must be assured a greater profit. They claim on the one hand, that black market operators are paying over the ceiling price for stock and on the other that price restrictions must be done away

TRUE PICTURE

Here is the true picture. The packers right now are deliberately not buying. Day after day the market reports in the daily paper report a bearish and an unsettled market, with, "the major packers not too interested." Just yesterday (April 9) the St. Paul Pioneer Press reports: "top-fed steers slipped to \$16.60."

How do the packers explain the fact that the price of cattle goes down when there is such a great demand for meat?

The answer is this. The American Meat Packing industry is STRIKING MINERS STAND FIRM waging a lockout against the farmers, workers and consumers. They are saying, "unless you give us a greater profit we refuse to process stock for you."

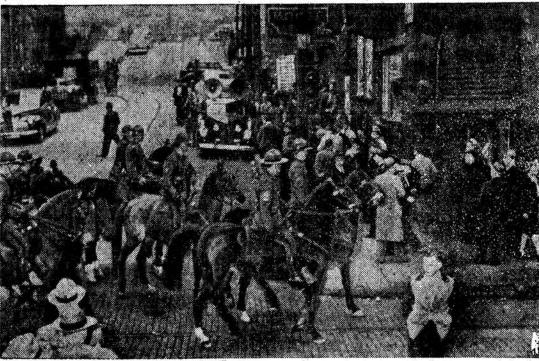

The purposes of the packers are: 1. To obtain a greater profit on their product. 2. To point many operators will not use their inferior in service and in goods a finger at their smaller competitors in the field, shift the blame on to them, and thus get government action to help crush the small operator. 3. To aim a demoralizing blow at the un-The companies have cut their payrolls more than 50 per cent. 4. To force down prices to the farmer.

EXPOSURE NEEDED

. It is high time for the workers to investigate this situation. The CIO Packinghouse Workers Union has publicized this false shortage, but not to the extent that it should have. The union should appoint a committee whose duties it should be to acquaint the public with these The profits of the meet packing industry during the war. 2. Their assets. 3. The owners and their big business tle-ups. 4. The amount of meat in cold storage.

The packing house workers are aware that all freezers in the plants and freezer space that can be rented are filled to capacity. The packers then are deliberately Pacific bet. 12th and 13th rest of American labor that may have far-reaching progressive not processing meat and conspir-

#### **Atom Bombs Cost** Million A Day

The United States government is spending \$400,000,000 a year to manufacture and improve atomic bombs, according to the United Press.

This \$1,000,000-a-day program is being financed out of the President's special war funds, which are in effect a blank Treasury check to be drawn on as Truman sees fit.

These tremendous sums being expended to stockpile atom bombs and to test their military uses indicate that President Truman's hypocritical professions of a desire for peace are really a smokescreen to cloak American imperialism's preparations for World War III.

# **Strikers Demand Control Over Japanese Plants**

(Continued from Page 1) tion the workers have tried to increase production after taking over the plants. Mainichi, which is bitterly opposed to such actions, is forced to admit that the workers have succeeded in achieving this goal in at least two plants. But, of course, it would require the extension and devlopment of workers' control throughout Japanese industry to show its real possibilities.

LABOR ENSLAVED

Japan's plutocracy opposes workers' control of production" on the ground that it violates their property "rights," and because it threatens to break their control over the economy of the country. They also wish to keep workers' wages at the inhumanly low level of the war and prewar periods.

### Not Really Imperialism

The United States will now surely have to take over trusteeship of the Marshall Islands lest another country observe the effects of the atom bomb on ships sunk there and thereby uncover secret information, according to 116 University PL, M. Y. 3, M. Y. Newsweek, March 25.

By Charles Carsten

The book "One World Or None" is a symposium which contains articles by eleven eminent scientists analyzing the dire threat of the atomic bomb. Among the authors are Prof. Albert Einstein, Dr. Harlow Shapley, Dr. Irving Langmuir and other men® renowned in the world of clude Russia from a "world"

These men are best qualified to speak and write about the scientific aspects of atomic energy. All of them are distinguished scientists and some were closely connected with the development of the atom bomb.

science.

They conclude that if the nations of the earth engage in an atomic armaments race it will end in a catastrophic world war, during which, as Dr. Philip Morrison states, "the cities of men on earth will perish." This is the actual danger.

#### SPEAKS FOR WALL ST.

But this is denied by none other than Elmer Davis. He sees a the March 30 Saturday Review nist (Stalinist) parties. of Literature, Davis asserts that "not the atomic bomb" but "the menace - of Russian aggression" is the main danger.

Until recently Elmer Davis was the director of the Office of War Information. In that job he laid down the World War II propaganda line for the U.S. intellectuals. Before and during World War II the army of authors, journalists and radio writers who supported American capitalism faithfully carried out the tasks assigned to them by Wall Street. They justified Washington's imperialist aims by painting up the war as a holy fight against fascism and sold it to the people as a crusade for the "Four Freedoms," etc., etc.

Their new task is to prepare public opinion for war against the Soviet Union. Here is the bill of goods Davis now proposes they sell to the public.

Among "present political realities," says Davis, "the biggest, most enigmatic, and most ominous-is Russia.'

"Not the atomic bomb," continues Davis, "has overshadowed international relations in the past months; it is the menacethe more menacing because nobody knows how much it really amounts to-of Russian aggres-

# Fighting High Prices

All through the war, despite government perurances that prices of consumers' goods would remain fixed, prices went up and up. Since V-J Day they have been slimbing at an even faster rate.

Wage increases wrested by labor on the picket lines from the corporations are rapidly being eaten away by further increases in the cost of living.

This mounting inflation is a direct consequence of the anarchy of the rotting capitalist system and its second destructive, ruinous imperialist war. It is being utilized by Big Business and its political agents to unload the whole burden of war costs upon the American people.

The greedy capitalists see in the present scarcities of consumers' goods the chance to grab off greater billions than their record wartime profits.

Roosevelt set up the OPA as part of his "equality of sacrifice" program which promised to hold down prices, profits and wages. In reality, wages alone were frozen while prices and profits soared.

Instead of stabilizing prices, the OPA became the government instrument for giving official sanction to price increases and enabling the corporations to pile up fifty-two billions in war profits.

Now the National Association of Manufacturers and other Big Business interests are determined to sweep away the last remaining restrictons upon their profiteering operations.

In an effort to appease the corporations and prolong its own existence, the OPA is granting one price increase after another, and removing price ceilings on thousands of items. But e successive surrenders serve only to whet the appetites of the capitalists who want nothing less than total abolition of the OPA and

all legal price-fixing. The Truman administration, backed up by the liberals, the labor bureaucrats and Stalinists, is still touting the OPA as the only effective way to curb inflation and fight higher prices. But the four-year record of the OPA conclusively demonstrates that this capitalistmanipulated agency in a capitalistdominated government cannot be relied upon to keep prices in check. The government's "price control" program is only a deception

of the masses. To protect their living standards against continually rising prices, the working people can depend only upon their own class forces and organizations. They can wage the fight effectively only through independent mass action.

First of all, labor must fight for a rising scale of wages which is automatically adjusted to every rise in living costs.

In addition, the unions should take the lead in organizing mass consumer committees composed of union members, housewives, working farmers and small shopkeepers. Unlike the profit-protecting OPA setup, these democratic consumer committees, guided by the needs of the masses, could proceed to enforce price-ceilings, ferret out black-marketeers, and expose Big Business profiteering.

### **Workers' Control**

The action of the Japanese unions in taking over and operating a number of factories under workers' control, reported in this issue of The Militant, shows how life itself verifies the program of Marxism. .

The N. Y. Times characterizes workers' control of production as "labor's new weapon." But this method of struggle is not so new in labor history. Marxists have advocated working-class control over production since the theory of scientific socialism was first formulated almost a century ago. This slogan was put into practice by the Russian workers after the overthrow of Czarism in 1917.

Following Marx and Lenin, the Transitional Program drafted by Leon Trotsky and adopted by the Founding Conference of the Fourth International in 1938, put forward this slogan as an indispensable means of labor's struggle. Workers' control of industry is incorporated into the program of the Socialist Workers Party and championed by The Militant.

The inability of decaying capitalist economy to survive without continuous catastrophic crises has become so obvious that even for-some kind of "control" over production. Naturally, they all stop short of any effective measures of control because they dare not encroach upon the power and profits of Big Business.

The abolition of "business secrets" is a prerequisite for actual control of monopolist industry by the workers. The GM workers took a step in this direction when they demanded in their recent strike that the corporation open its books to inspection by the union.

Now advanced Japanese workers, confronted by the capitalist sabotage of production, have taken a further step in breaking the monopolist grip upon the national economy by instituting their own control in certain fac-

Thus the Trotskyist program shows the workers the way to combat capitalist anarchy and insecurity.

# **Two-Party System**

CIO President Philip Murray in a press interview last week stated; "It is my own individual opinion that there will be no third party movement sponsored by the CIO. We'll content ourselves by working within the framework of the two-party system. We'll elect the best candidates and we'll support the cause of liberalism."

This, it will be recalled, is the position the CIO leaders took in 1944 and previous elections. In 1944 also, the CIO-PAC worked within the system of supporting only candidates of the two capitalist parties. The results of the election were then hailed as a "great progressive victory" by CIO-PAC leaders.

But what did it really lead to? Murray himself gave the answer at the recent CIO United Auto Workers convention when he complained we have "about the most reactionary Congress that we have had at any time during the last twelve years."

This process is evidently to be repeated again in 1946 if Murray and his associates have their way. The workers will be urged to vote for new "liberal" capitalist politicians in November 1946 who will then form the "most reactionary Congress" in 1947.

Labor will continue to be duped and betrayed until it breaks completely with "company unionism" in politics. It will stand politically helpless before the machinations of Big Business just so long as it is tied to the political machines, Democratic and Republican, of Wall Street.

The trade union militants must raise their voices vigorously against Murray's bankrupt political policy. American workers need a labor party to put their own representatives in office and to fight the political rule of the corporate profiteers exercised through the capitalist 'two-party system."

#### **Draft Extension**

Wall Street imperialism's program for the militarization of America and permanent peacetime conscription was given an impetus last week in both the House and Senate.

Acting on one of the main points of Truman's war preparation program enunciated on Army Day, the House Military Affairs Committee on April 9 approved a bill to extend the draft for another nine months. On April 11, the Senate Military Affairs Committee dorsed a full year's extension.

The Truman Administration, backed by the military caste, is putting all possible pressure on Congress to speed a three-point program of a continuing Selective Service, universal compulsory military training, and unification of the armed forces.

Both Democrats and Republicans support the program for Prussianizing the American people in readiness for a World War III against the Soviet Union. But because of tremendous popular opposition, Congress is attempting to slip the program over in a more piecemeal fashion.

As the N. Y. Times, April 14, admitted: "... Because the draft is a touchy issue in an election year Congress has handled it gingerly." Senators and Representatives seeking reelection fear to arouse too great a resentment in their constituencies by going all-out for permanent militarism—until after the votes are counted next November.

Thus both houses are trying to create the impression, by their time limitations on draftextension, that it is only a "temporary" measure. This is clearly the purpose of the House limitation of nine months. Congressmen cynically keep in mind that the original Selective Service Act was also passed as a "temporary wartime" measure.

Also with an eye to the elections, members. of the House have attached several amendments to the pending draft extension bill which would keep the draft machinery and laws intact but limit their operation until after the elections.

The House on April 13 approved amendments to "suspend" inductions between May 15 and October 15 and to fix a minimum age limit of 20 years for future inductees. Selective Service would remain and the age-limit could be lowered again whenever Congress chooses to claim an "emergency."

The American people should not be fooled by the apparent reluctance of Congress to push through Truman's full militarist program at this time. They should resist by every organized means the extension of the draft in any

Today, Congress wants only the "finger" of draft extension. Tomorrow, it will snatch ruthlessly at the whole "arm." For American imperialism is bent on nothing less than domination of the globe through overwhelming military force and another World War.

# PROBLEMS FACING **WAR VETERANS**

By CHARLES CARSTEN-

# Government Agencies Foster Jim Crow

While it is difficult for most veterans to find decent jobs, it is almost impossible for veterans of racial minority groups, regardless of their qualifications, to obtain anything but the most menial labor. Not only do private employers discriminate against Negro and other veterans, but government agencies follow the same vicious policies.

Moreover, according to surveys conducted by the American Council on Race Relations and the Urban League, the United States Employment Service, the Veterans Administration and other federal, state and local government agencies are actually encouraging discrimination and segregation.

Albert Deutsch, summing up the surveys in the April 8 PM, states that they "reveal mounting instances of Jim Crow barriers officially raised against Negro vets trying to obtain jobs, homes, schooling and business loans."

Here are a few examples of the discrimination practiced by government agencies as revealed by the Council's report.

In many cities the USES, a federal agency, follows a more brazen discriminatory policy than local agencies.

The USES office in Houston, Texas, following the Jim Crow practices of the south, segregates Negro and white applicants. The office reserved for "whites only" is large, furnished with chairs, and wellventilated. Negro veterans must enter the building by a side door, go into a dingy office that also serves as a storeroom, and stand in line while awaiting their turn.

In cities such as San Francisco, Los Angeles, Houston, Nashville and Atlanta, Negro and other veterans of racial minorities "are met with cold politeness, ridicule or general hostility by USES officials . . .

#### USES Won't Send Negro Applicants

An interviewer in the St. Paul, Minn., office admitted that in many cases, the USES refused to send qualified jobless Negro veterans to fill reported vacancies.

Following a policy typical of many other USES offices, the St. Louis office completely ignores any skills acquired by Negro veterans. They are asked what they did before they entered the Army and then put back in the same menial job classification.

Americans of Japanese ancestry were told on applying for jobs at the Seattle USES: "You boys might as well apply for unemployment compensation; there are no jobs for you."

The Council's report shows that this is a wellestablished policy. A clerk in the San Antonio, Texas, office of the USES said: "The placement department seems to do nothing but send" Negro and Mexican-American veterans "over to file unemployment compensation claims,

#### Training Not Given Minorities

In many cities on-the-job and apprenticeship training, to which they are supposedly entitled by the GI Bill, are denied veterans of racial minorities. While veterans of minority groups are hardest hit by the housing shortage and are forced into the worst dwellings, they are generally barred from emergency housing projects.

The Council's survey makes it clear that federal agencies, far from trying to stop discrimination and segregation, give the practice added impetus by their own policies and practices.

Men of racial minorities were told on being drafted into the Army and Navy that after they defeated Nazism, with its theories of racial superiority, they would enjoy racial equality. But on their return, instead of the promised "new world a' comin", they are hit by the same old vicious practices of discrimination.

# Vets' "Reconversion" From Heroes To "Bums"

Two young, jobless ex-servicemen stood before. Magistrate Alex Pisciotta in Long Island City Court on April 13. One of the defendants was Stephen Grattano, 22 years old of Brooklyn, a former infantryman who served in Italy and Germany. The other was Michael Szewczyk, 23, also of Brooklyn, a former marine, who fought at Iwo Jima and in the Solomons. Both had fulfilled their assignments to help win the war for "democracy," the "four freedoms," and "prosperity."

What was their crime? Both men pleaded guilty to charges of lighting and smoking a cigarette in the Queens Plaza Station of the Independent Line

The Magistrate, a former army major, sentenced the two men to pay fines of \$3 each, or a day in jail. Both men said they didn't have the money to pay the fines.

Then this Magistrate, who came back from cushy job in the army to a cushy job in civil life, lectured the boys and admonished them not to be "choosy" about taking jobs at hunger pay. Said he: "Why aren't you working?"

Szewczyk, jobless since last October, replied: "Well, the only jobs we could find paid \$20 or \$25 a week. and that's not enough."

Grattano, unemployed since his discharge in December, added that the only job which had been offered to him was the one he had before he entered the service in a box factory at \$25 a week. "That's not enough to support my parents," he explained.

The well-heeled Magistrate told them they were too "choosy." Then he laid down the law. "Yes come into this court and expect to be commended or given some sort of a citation because you are veterans." This, he said, only "discourages you from doing anything."

Szewczyk, who "found a few stray dollars" in his pocket, paid his fine and was released. Grattane was detained until the end of the court day.

The ex-soldiers of World War I, who became the jobless bonus marchers of 1932, carried slogens to Washington reading: "Heroes in 1917 - Bums in 1022."

But this process of veteran "reconversion" speedier today. Many of the World War II veterans can already carry slogans reading: "Heroes in 1945-Bums in 1946."

# Navy Gold Braid Privileges **Reigned Even In Combat**

Newark in the April 6 Militant clubs, but they had an Admirals' on the caste system in Noumea, club. Only four stripers and struck a familiar note. I remember the officer system there we wouldn't have resented these only too well.

Comething that Kirke may not provisions for the enlisted men know about the Navy Club at had been made. Noumea was that it (the one funds diverted from the enlisted to build up recreational outlets for GIs. The chaplain who protested this diversion was later removed to another station. I remember that when my ship was there after the invasion of Palau, this officer club burned. The Mob. 5. corpsemen just stood around and laughed and laugh- WORSE ABOARD ed. They didn't lift a finger to put out the flames. Only the laugh was on them, for within a week bulldozers and CBs were work and started rebuilding the

#### ASSIGNMENT-DEATH

We took on a few replacements at Noumea that time and I learned some more about this hell-hole. One of the new men had done five days p. & p. (bread and water to you) for trying to write home criticizing the officer caste. Another corpsman had the job of making a trip into town every night with the s'ation wagon to pick up the officers and nurses who were on ulations for the enlisted men drinking parties. One of the nurses who went out with a GI was transferred back to the States, and the GI was assigned to "special duties." This last is the term they gave to the extra hazardous pre-invasion jobs. It usually meant death and was common form of punishment.

Noumea wasn't the only place where this sort of thing went on. I remember when I first hit the replacement depot at Espirito my first job was putting in a bamboo finish in the officer's club. The First-Class in charge said men had been working on the action. This may have been true hard to stop once you get startclub for months. This was in in the army, but it wasn't in ed on this subject. One could go 1944 when the pushes were being the navy. Even after a "kami- on for hours relating incidents of their stupidity. # Pioneer **Notes**

Many orders have come in this week for copies of the new pamphlet Vigilante Terror In Fontana, by Myra Tanner Weiss. This pamphlet was published by the Socialist Workers, Party, Los

The tragic story of the arsonmurder of the O'Day H. Short family of Fontana California, as well as many other outrages perpetrated by vigilante terror groups against racial minorities in California is told here. But what makes the pamphlet especially valuable to worker-readers is that it does not simply set forth horrifying facts. It also presents a program of action with which this rampant vigilante destruction can be fought by organized labor. It is a pamphlet which should be read by every class-conscious worker.

Detroit had a good measure of success in selling Pioneer pamphlets at two meetings conducted by the National Association for the Advancement of Colored People, in that city., E. Brent

"I thought you would like to know that three people went out to cover the NAACP meeting at which Walter White spoke on March 21. Quite a bit was sold. The sales were as follows: 53 to Kill Jim Crow; 18 of Struggle ism on Trial (the four pamphlets Post-War World."

In her second letter E. Brent states:

"There was another NAACP meeting (the Youth Group) April 1. Senator Powell spoke. In spite of the street car strike there were about 400 people present. Comrades Logan, Mullot, Carli and I were there. Comrade Mullot passed out 340 Militants and quite a bit of literature was sold. Here are the figures: 53 copies of a Practical Program to Kill Jim Crow; 20 of Struggle for Negro Equality; 7 of Negroes in the Post-War World.

"We were sorry that the Fontana pamphlet did not arrive in the Fontana fire outrage and time to be sold at the meeting. but The Struggle for Negro Equality did get there in time. We easily could have sold our whole order of 200 copies of Vigilante Terror in Fontana if we had had them."

Vigilante Terror in Fontana, by Myra Tanner Weiss, 10c.

# Over One-Third Of \$15,000 Goal Is Reached In Fourth Week Of 'Militant" Fund Campaign

By Justine Lang Campaign Director

With real revolutionary will and spirit, comrades, friends and Militant readers responded enthusiastically to our call to reach \$5,000 by this week.

In fact, the \$1,000 weekly quota needed in order to reach our \$15,000 goal by June 15 has again been oversubscribed. This week, \$1,107.91 was sent in. This makes a to-

tal of 5,077.08 at the end of the fourth week of The Militant Sustaining Fund Drive. With 34 per cent of our goal already achieved, there is every indication that our halfway mark will also be reached in advance of schedule.

Branches of the Socialist Workers Party are demonstrating their solid support of this Militant Fund Drive by fulfilling their quotas as rapidly as possible. The average percentage at this point in the campaign is 30 per cent. Three sections, the New York Youth, Portland Rochester, have already completed their quotas and the two first have oversubscribed their original goal

In addition, 13 branches are above the average percentage ranging from 33 per cent up

The New York Trotskyist Youth Group is still in top place nationally, having gone over its quota by 107 per cent. Grace Wayne, Militant Campaign Fund Director adds: "We intend to maintain our top place right up to June 15, the closing date of the drive!

Any challenges to that ambi-

A great source of satisfaction as is the enthusiasm with our Militant readers, friends and sympathizers are rallying behind this Sustaining Fund Drive, as revealed in some of the mail quoted below: "TM WITH YOU!"

L. Lynn of Minneapolis: "At the entrance to our headquarters, have The Militant in a box by the door where it may be obtained free of charge. There is one friend who picks up The Militant every week from this changed to Buffalo-Lackawanna newsstand and periodically he comes up to the headquarters, latter branch. The comrades in presses a fifty cent piece into my hand and usually makes the comment, 'I get The Militant downstairs, I want to pay you their contribution." for it. I'm with you, but I'm

too old to be of any help." When the first notice of the Militant Sustaining Fund Campaign appeared in The Militant, he came up to the headquarters and told me he had read about the campaign. 'I'm on relief', he said, 'and I don't have much money, but here's a dollar for the Militant Fund.'

approached to contribute to the Militant Fund Campaign, a readpoor man, and have very little money. However, for a movement like yours I'm willing to sacrifice to the extent of giving \$5 to carry on the good work of The Militant."

Jeannette Kirk of Detroit writes: "To encourage comrades to pay on their pledges and obtain contributions so that we may send the money in as quickly as possible, we have initiated some friendly competition be-

By Felix Morrow

ATLANTIC CITY, Mar. 29-The UNRRA Council, delegations from 48 nations, in its March 15-29 session here, debated ways and means of feeding the 500 millions threatened by starvation.

But they were the debates | edge of the . . . standards used of an impotent body. For whatever was proposed here, the actual decision lay else-

But decisive power over the food of the world was not here. It is in the hands of a three-nation body; the Combined Food Board of the United States, the

United Kingdom (Britain), and When UNRRA figures are sent to the Combined Food Board, they are arbitrarily revised downward—unless the particular country happens to be a colony or semi-colony of the Anglo-

consideration at this moment for diplomatic purposes. As the retiring Director-General of UNRRA. Governor Herbert H. Lehman, stated here

Saxon empire or requires special

March 22: to the Combined Food Board on behalf of a considerable number of receiving countries . . . UN-RRA has absolutely no knowl-

by the Combined Food Board when it makes final recommendations for allocations. Thus UNRRA is unable to ensure any country dependent for food on UNRRA that it is getting fair treatment . . .

"It is imperative that each allocation of the Combined Food Board should be made public and at the same time the extent to which that allocation meets reasonable standards of consumption. It seems to me inevitable that suspicion and misunderstandin will grow in those countries whose people are threatenwith starvation if they are not given information by the Com-

bined Food Board which indicates the extent to which help been given to other countries. If we believe in a concept of a United Nations and in shar-"UNRRA submits requirements | ing equally the burden of this present emergency, then it is es-

> government should be known publicly.' Encouraged by Lehman, the Chinese delegate, Dr. T. F. Tsiang. against Board."

> "confessed his anger the Combined Food Of the rice available from the U.S. for the first quarter of 1946, the Board had allocated to China only 17 thousand tons, or one-third of the amc t allocated to Cuba or the Philippines. Thus U.S. imperialism demonstrated that it is better to live in American colonies than in China.

> The same lesson was driven home by British imperialism. All China is to get during 1946 only twice as much grain as the British Crown Colony of Hong Kong. Said Dr. Tsiang: "The Combined Food Board has allocated none of Burma's rice (formerly one of China's main sources) to China, while rice from Siam (another principal source) was allocated as follows: British Malaya, 58 thousand tons; Hong Kong, 30 thousand tons; British Borneo, 9 thousand tons: Netherlands East Indies, 55 thousand tons; Philippines, 8 thousand

sand tons."

The Combined Food Board's allocations in turn dictate the expenditures of UNRRA. As a result. British-controlled Greece is to receive \$27 per capita, while China is to receive \$1.25 per capita. In the light of the reports of Greek suffering, one can begin to imagine the plight of the Chinese and Indian passes in the hundreds of millions!

The Combined Food Board gave short shrift to the Polish resolution recommending that UNRRA allocations be accepted as final by the CBF. It likewise turned down-privately expressing astonishment at his gall -Lehman's proposal that allocations be made on the basis of the 1935-39 per capita consumption in each country.

Playing favorites has meant not only giving food to some, but also deliberately not making presible food exports from some countries "hich had surpluses. Two striking examples are Argentina and Ethiopia.

Lehman finally got up courage enough to announce that he was sential that the actions of each sending a special mission to Argentina to buy grain for UNRRA And this was only after Peron's victory had forces the U.S. State Department to abandon its previous policy toward Argentina. As recently as March 3, the N. Y. Times reported that grain was burned as a fuel substitute in Argentina, which had been prevented by the Truman administration from buying fuels here or chartering tankers to bring oil rom Mexico.

> On March 22 UNRRA delegates were handing around a letter appearing in the New York Times that day, from D. A. Talbot, an American, editor of the

tons; UNRRA for China, 18 thou- | Ethiopian Review published , by the government of that country It reported:

"Ethiopian grain is rotting while Europe starves, and there great reservoir of meats and fats which could be gathered

"One of the reasons why Ethiopian surpluses are not utilized s purely political . . . the desire of certain of Ethiopia's neighbors to check her economic development and keep her a perpetual pawn of European diplomacy . . . The purchase of Ethopian surpluses would aid considerably in providing the government with revenue . . .'

But British imperialism does " want the Ethiopian government to win such relative freedom f action. Hence Ethiopian grain rots.

To ease up the Anglo-U. S. nglehold, Lehman prorosed proadening of the Combined Food Board. In particular he demanded representation for UNRRA and the Soviet Union.

But the Russian delegation vas cold to the proposal. As the March 21 Daily Worker reports, Neither the USSR nor Ukraine delegates replied to the pro-

The reason is plain enough. Each member-nation of the CBF provides full figures on its food production.

But even the two "independent" Soviet republics, the Ukraine and Byelorussia, devastated areas receiving UNRRA aid, have refused to provide the CBF with figures. A restricted CBF report, given only to delegates, adduced this refusal - all other receiving countries provide figures - as the reason for difficulties in arriving at food allocations for those countries.

Here, as in every other sphere of "United Nations" activity, the Kremlin is confronted with an insoluble dilemma: how to cooperate while at the same time refusing its allies the data which they themselves offer to exchange with Russia.

On this dilemma Lehman's proposal to broaden the Combined Food Board foundered.

(This is the second of two articles on the UNRRA session. The first appeared here last week.)

# SHOP TALKS ON SOCIALISM The Things We Make By V. Grey Workers puzzle over the question: "When we can pro-

duce so much in the shop, how is it that we ourselves get so little? Certainly, we produce hundreds of times more wealth with the factories than our great-grandfathers did without them. But the things we produce do not belong to us. Somehow we can never buy back what we ourselves make. Sometimes we produce things that then rust in warehouses or rot on the ground. Sometimes all we produce goes up in battlesmoke. Sometimes we are idle and the factories remain idle too! Why?"

These questions can be answered in two sentences: The world's great productive system is owned by a little handful of people who run it for their own profit and not for people's use. And it can run at full steam and keep running only when society as a whole owns and operates it.

Yes, that is the answer. But how do we know it is the answer? We know the present system is rotten and useless by our own experience with depressions and wars. But we did not arrive at the above socialist answer through hopelessness and despair. The answer is the product of a reasoning process. It is a reasoning that conscious fighters for socialism should follow. It is a rather long chain of reasoning that Marx begins by analyzing the things we

Look around you in the house, and you will see the products made by us in the factories. Chairs, tables, sewing. machine, ice box, oil stove, cook stove, sink, toilet and bathtub—all factory products. Now look out the window. The lamp post, the cars and trucks on the street, the street itself-asphalt, car tracks, concrete or bricks, are

Even the food you eat was canned and preserved in the factory. And before that it was planted, cultivated and harvested by factory-made machinery. Workers, just like ourselves, make all these things-food, clothing, shelterand all. They make them in tremendous quantities in great factories.

So if we are to follow Marx's reasoning let us begin by looking at these factory products. The things we make -and the ways under which we make them-turn us into

The first thing we learn about these things is that ust looking at them does not tell us very much. Many of them look just like they did ages before the factories made them. Factories, as we have seen, are something new under the sun. And the factory worker is too. But many of the things we make in our new way were made by different methods thousands of years ago. Bread, for instance, used to be baked by slaves before the Bible was written or the pyramids were built.

Nevertheless, bread and other things we make today are very different from the same things made before the factory was born. Why? Precisely because we make them so differently. That is where the difference arises. A given thing could have been made by ancient slaves, by a shepherd girl in the medieval hills, by a semi-craftsman in a cotter's hut, or in a billion dollar factory with a hundred thousand pairs of hands whisking it along to the salesroom or warehouse. This difference in the method of production does actually stamp its difference on the product. But we discover this only if we probe beneath the surface.

Just by looking at it you might not think bread has changed very much in the last ten thousand years. But it has just the same. Capitalist bread contains something that primitive bread was quite innocent of. Capitalist bread has market value. For example, a loaf of bread contains 12 cents "worth" of value.

What the Difference Is

What's the difference? you might ask. Slaves' bread filled the slave's stomach so he could work for his master, capitalists' bread fills the worker's stomach so he can work for his boss. Both loaves are things to eat. Why get so technical? The bread must have been worth 12 cents ten thousand years ago-if there had been 12 cents lying around

But the 12 cents is something you exchange the bread for. If you could only make one loaf a day, and nobody else could do any better, you'd be a fool to exchange it for 12 cents or even \$12 because you wouldn't have any bread left to eat. You wouldn't produce it to sell in the first place. The idea of selling it or trading it would never enter your primitive head.

Besides, what would you do with the 12 cents anyway? Suppose you needed a couple of razor blades. Well, if they were made at that time it would have taken longer to make one than to use one up—so who would have one to sell you? Your 12 cents would be no good, even if it were "lying

The bread, too, would be "no good" from the point of view of the 12 cents. Or take it in its wider aspect: exchange could not exist. We thus see value expressed in exchange. And until there are enough goods exchangedand made to be exchanged—there can't be any idea of money or exchange value.

Under primitive conditions the loaf of bread is life itself. It's produced to feed the producer. It's as much a part of him as his big toe. And he would no more think of selling

Under capitalism, the loaf of bread, unlike a big toe, quite detachable. It can be sold. In fact all the bread is produced for just that purpose: to be sold. Instead of the baker being thought crazy if he sold his bread, he would be thought crazy if he did not. Under capitalism the goods must be sold—or the producers starve.

These goods-all the billions of units of factory products, all produced for a market—are called commodities. Karl Marx begins his famous book on "Capital" with the analysis of a commodity.

Ku Klux Rides Again

According to reports from far and wide, the nightshirt boys are at it again. In Atlanta, Georgia, they have officially re-registered as the "Knights of the Ku Klux Klan"

and have given notice that o they are ready to do business | lante Committee" if they did not as a "fraternal" organiza- move back into the Negro ghetto

Right after V-J Day fiery crosses were burned atop Stone Mountain, 20 miles from Atlanta. This marked the first open activity of this group of bigots since the outbreak of World War

Within the past few weeks the burning of crosses and similar activity has been reported from other areas. Ten miles outside of Miami, Florida on Highway 26 has been posted a large sign reading: "K.K.K. Welcomes You —J. B. Gordon, Klan No. 5, P.O. Box 337, Glenwood Heights, Miami, Florida."

Crosses have been burned in and around Chattanooga, Knoxville, Birmingham, Miami and Atlanta. In past years the burning of these crosses has signified that the Klan is mobilizing and preparing to set out on its nightly rides. On these occasions this "fraternal" organization terrorizes, burns and pillages racial or religious minorities or members of any group who differ with the reactionary program of the Klan. AT WORK IN COLUMBIA

In Columbia, Tennessee, scene of the recent anti-Negro pogrom, a large KKK was found inscribed -significantly-on the top of a casket in the undertaking establishment of one of the Negro citizens who was arrested and which place was pillaged by the Tennessee State police.

Last week the State Attorney-General of California revealed that his investigators had found the Ku Klux Klan to have been reactivated in Big Bear Valley, a resort section.

A cafe owner in this section quoted as saying:

We burned a couple of crosses. It brought results. It stopped the sale of at least one property." He added that members of a minority racial group had been ordered to leave the valley. A Lancaster, California, min-

ister, whom the Attorney General identified as a follower of Gerald L. K. Smith, was quoted "The Klan is here in Bear Val-

line on Americanism."

nearby is Fontana, California,

section.

According to the Pittsburgh Courier of April 6, the application blanks being circulated in Atlanta in the new membership drive read as follows:

"I, the undersigned, a native born, true and loyal citizen of the United States of America, being a white male, Gentile person of temperate habits, sound in mind and a believer in the tenets of the Christian religion, maintenance of white supremacy, principles of 'pure Americanism' do most respectfully apply for membership in the Knights of the Ku Klux Klan."

HOW TO COMBAT KLAN

What is the real meaning of this upsurge of ultra-reactionary forces? And how must we combat it?

Such groups as this with their fascist tactics are really stooges of the big industrialists and landowners. Their aim is to weaken and decimate the entire labor movement by setting race against race and religion against religion. They fan the flame of prejudice so that white Gentile workers, who comprise the majority of the exploited working class in this country, will become so engrossed in futile persecution of minority groups that they will forget their real enemy; the tiny group of capitalist and imperialist exploiters who own the factories and large farms.

Thus, although these attacks will be directed primarily against the Negro and the Jew and the Mexican and the Japanese-American, yet the real sufferer from such vigilanteism will in the end be all the workers, white and black. Thus it was in Hitler's Germany; thus they plan

it here. Therefore, it is necessary for these workers who understand this to unite and prepare to defend the minorities and thereby. themselves from the attacks of the "gallant" Kluxers and their kind.

We cannot put our trust in the capitalist government agencies to really stop them. Their feeble attempts are usually only ley to stay. We intend to form opportunist political maneuvers. restrictive covenants here and The workers must have their reelsewhere in order to hold the liable means of defense against the white supremacists and la-

before dusk, eddying down over the trestle, wirling around the empty cinder ladles on the

siding. Before long Number Three Furnace had faded back into the fog and become invisible, except for a hazy orange glow over on the east side, where they were flushing.

As darkness thickened in the blast furnace yard the fog settled more heavily, mixing into the night. Our ladles loomed suddenly at the end of the furnace, and we began drilling out the tap-

I said goodnight to Matt and Reuben and walked up the street, listening absently to the little rattle the handle of my lunch pail made at each step I took. Out of the fog spiraled a weary, dismal wail, the hoot of a narrow-gauge engine despairingly tugging at a too-heavy load of ingots.

ping hole for the last cast. The fire glow was

sone from Number Three. There was just fog.

"That's a steelworker," I thought. "The load's too heavy-but it'll pull it all the same." Once again that reeling shrick, followed by a frantic burst of chugging-and then a more orderly. more rhythmic chugging as the little engine got under way.

Darkness and fog softened the tough bleakness of the town. The streets were no longer dry, chipped concrete dusted with the rusty pourings of the furnace tops. The warped clapboards of the unpainted shacks hid behind the

A saloon door opened. Voices, laughter flowed out momentarily into the night and abruptly snapped into silence with the slamming of the door. A drunk muddled by and disappeared into the fog. There was a sharp scuffling of leather on concrete as he lost his balance, and a mumbled curse.

Once more the wail of the narrow-gauge cried through the mist, followed by the commanding blare of a diesel's horn. A dog yapped angrily as I passed a black alleyway.

The street lights glowed dimly, each one surrounded by a cottony ball of yellowish illumination. I walked more slowly. It had been a tough shift, and I was tired.

It seemed I had the streets to myself. Steel towns go to bed early, except for the saloons, night clubs, hamburger stands, and brothels, where they never go to bed in the darkness. Steel towns have to go to bed early, because tomorrow's dawn is always lurking ahead, and tomorrow's dawn must find the sweating thousands already on the job.

The sound of my footsteps came now more slowly. I held the lunch box under my arm, so it no longer rattled. Finally I reached the corner I knew so well. There was the house, the alley, and the back door and the kitchen window shining brightly into the fog,

There would be coffee, a couple of pieces of bread and peanut butter, and the latest Militant. Then there would be bed and sleep. I yawned and opened the back door.

# Notes Of A Seaman

Sandwiched in between news of budding dafsodils at Hyde Park and how she tidied up her efoset the other day, Mrs. Eleanor Roosevelt

carried a plea in her newspaper column for a merchant seamen's Bill of Rights similar to the GI

Once before, I remember, Mrs. Roosevelt joined a campaign to "do good" for the merchant seamen.

At the beginning of the war she and a number of others publicly expressed their sorrow that the seamen had to wear assorted articles of civilian clothing in displeasing disharmony instead of a uniform.

I never did read what her reaction was to the resounding and forceful refusal of union seamen to voluntarily put on a uniform. Various government officers who appeared at union meetings to convince the membership to accept uniforms got an earful of not exactly polite language. It didn't help even when certain material advantages were offered along with the uniform. The bait couldn't hide the hook.

Along with Mrs. Roosevelt the Stalinists in the maritime industry, who have taken an active role in the Bill of Rights campaign from its beginning, are pleading for justice to the merchant seamen, on the grounds of their patriotism. They ask that the seamen be paid off for loyal service in wartime with a Bill of Rights that would give them benefits such as the veterans are now receiving under the GI bill.

However the campaign for the bill has aroused very little interest among the seamen active in the industry. Petitions circulated aboard ships by the Stalinists were signed by everybody with "what the hell, I can't lose" attitude. In con-

Scourges Of Mankind

trast to the hysterical patriotism of the Stalinists during the war the average seaman had few illusions. He knew the reason he was out dodging torpedoes was that he couldn't avoid sailing. And most of the men had a pretty realistic idea of what kind of pay-off to expect at the end of the war. And they were right. The pay-off is here now and getting worse every

By Art Sharon

The proposed bill has no meaning to the men who must remain in the industry and face the attacks against his conditions and rights. In fact the bill serves to shift attention from the real and pressing problems of today and divert the struggle of the seamen into a side alley.

There is the need to remove the military control exercised by the hated anti-labor Coast over-but that control imposed during the war Harold C. Heiss, one of the spokesmen of the rail unions. is still here and as bad as ever.

There is the need to protect the foreign-born increases before the rail ar- | bor" not set the high pattern of seamen who are not citizens from the savage bitration boards. attack launched by the government and operators to keep them off ships. That is their reward for war service.

And not least among the problems faced by the seamen is the shrinking pay-off. With prices | nificent contribution to winning climbing steadily the present wage scale is mighty slim. A married seaman with a family can barely exist on the present wages.

Let the "friends" of the seamen and the "dogooders" busy themselves with pleas for justice to the merchant seamen. Let them secure the passage of the bill of rights. But for the active seamen there is today one main line of action. FUTILE PLEADING Together with his shipmates he has got to prepare himself for a serious showdown fight against the increasingly arrogant and hostile shipowners and their stooges in Washington, the Maritime Commission.

**Broken Up By Housing Crisis** SPECIAL TO THE MILITANT MINNEAPOLIS, Apr. 8 -

**Many Families** 

ed, ill-ventilated bedrooms,

in garages, attics and cars.

Other thousands, not consid-

ered homeless, live in similarly

The human misery which is a product of the housing crisis, is mounting steadily. Nerves are being shattered, divorces are on the increase, crime and juvenile delinquency are on the increase.

Hundreds of ads appear daily in the newspapers with desperate appeals for homes. There's the case of a navy veteran and his wife whose ad in the paper ran like this: "Desperate. Rescue us from our relatives. Our nerves are shot."

Investigation disclosed that this couple live in a small bungalow in south Minneapolis. There are three adult women in the house, including an aged mother, besides one young veteran who is going to school, and the other veteran, his wife and their two children. One of the women works at night. The aged mother is ailing. Sleeping conditions are intolerable.

"Everyone in the house, including the children, is a nervious wreck. I nag my husband and I'm afraid it will end up in a divorce," said the wife. They want to buy property but

they do not have money enough for the down payment. They had one answer to their

ad, a rental place in North

Minneapolis which she said "was not fit for pigs to live in."

FAMILIES SEPARATED Investigation of another ad

of them are doubled up with strangers and separated from

Ten to fifteen thousand of the forty thousand returned

The situation is bad and growing worse, aggravated by new releases and by evictions of veterans who were temporarily housed a few months ago.

ing houses which they cannot

On March 16 the Minneapolis Star-Journal reported: "Vet Trailer Camp Filthy, Wives Say." The article revealed that vets were paying \$40 a month to live in a "two room" trailer, and were walking half a block or more for toilet, lavatory facilities, and water supplies.

To serve at least 375 people in the camp, there are two lavatory buildings. There are two showers, two bathtubs, and three toilets in the women's lavatory which do for them and all the children. The tubs are without curtains, so they are used only for bathing the children. Shower curtains are totally inadequate. The thin curtains supposed to screen the toilets, are torn and

smeared with paint. Not only does all the water have to be carried to the housing units, but all wastes such as dishwater and slop-jars then have to be taken to the central units and emptied into the toilets. In some cases this is a halfblock walk each way.

There are three washing machines in the laundryroom and a time-limit schedule for the tenants which begins at five o' clock in the morning. Washing facilities and ice are

paid for separately. They bring the rents in some cases up to \$47 and \$48.

Tenants must pay a \$10 deposit against any damage that

might occur to the trailer. While the city sets up a \$150,-

000 fund for emergency housing. building permits jumped in January to show a 600 per cent increase over a year ago. But this is unnecessary building, includ ing bottling works (Coca Cola), luxury distributing plants, stores, bible schools, taverns, etc.

Where are the veterans houses? Small houses built for \$4,000 to \$5,000 have been sold thousand houses in process of Thousands of people are much being built range from \$7,000 to more" only through its own or- more desperate than these, but \$20,000. The veterans can't af-

# **Modern Gulliver Travels** Sees Lilliputian Congress

-By William Gulliver-

27-I, William Gulliver, am cial pleaders for the National a bench worker. I am interested in the extension of the Price Control Act HR 5270, rent control and the passage of the Patman Bill embodying proposals for the construction of 2,-700,000 homes for veterans who gave up their homes to go to war. That is how I happened to be in Washington today.

I discussed these matters with my fellow workers and was designated by them to go to the capital to see Congress about the situation. I plaged to fight for the bills as originally introduced with no exemptions, no loosening of price ceilings, no crippling amendments. I pledged to fight also for their enforcement, with the participation of committees of consumers, housewives That's more than regularly meet and labor unions to counteract the black market of the jobbers and growers' associations.

My errand was the result of a 'New York Goes to Washington People's Lobby," organized by the Stalinist-dominated New York City section of the American Labor Party. With 355 other delegates from ALP clubs and other organizations. I registered at Pennsylvania Station for the trip. We were subdivided into 47 smaller groups with a sub-leader appointed by the ALP. Each group was to visit New York Congressmen in their offices on Capitol Hill, or to call them off the floor of the house.

I PACK MY BAG Then, with a small bag con-

taining sandwiches, tooth brush and comb, I caught the 6:30 morning train and arrived at 10:30 at Union Station, Washington. Washington is a haven

Association of Manufacturers, the Cotton Growers Association, Real Estate Lobby and other Big Business pressure groups. They've been very busy. They secured over 75 per cent of all war contracts for 200 of the richest firms. They torpedoed the full employment bill, the FEPC, the 65 cent minimum wage bill, housing legislation, price control. They got tax laws passed which put the rich on public relief paid for by the poor people.

These lobbies get quick action. We heard, for instance, that the Used Car Lobby which does a big business in selling used cars at black market prices to suckers, called a meeting of congressmen and over 300 responded on the floor of the House.

I, Gulliver, went to the Senate gallery. I counted heads. Instead of the 96 senators supposed to be there, I saw 25. Senator Ellender of Louisiana, a plantation owner, was speaking against the 65 cent minimum wage bill.

ONE DOES LISTEN

I 1. 1st be honest. One senator was listening. Only 23 were leeping or nodding or just sitting and waiting for their paychecks. Sometimes one bestirred himself to call a page-boy in black knee breeches. That was to get some liquid refreshment. Senator Pepper of Florida

asked a juestion: Is it true that a large percentage of workers in Louisiana support families of five or six on \$16 a week income?

Ellender bellowed "Yes!" Pandemonium broke loose in italist Congress.

WASHINGTON, D. C., Mar. | for special-interest lobbies, spe- | the gallery, with Bronx-item cheering and Brooklynites whistling, until a Sergeant at Arms threatened to clear the galleries.

I went to the House of Representatives, too. From the gallery I counted 236 heads; 436 should have been on the job, say the payrolls.

HOW TO ROLL A LOG

Representatives like J. J. Delaney of Brooklyn, Lynch of the Bronx (supported by the Stalinists in the last election), Sol Bloom (too busy), and Rayfield were questioned by us delegates. They were more or less "on the fence," with elaborate plans for log-rolling — that is, plans to vote for exemptions they say they DON'T approve of, in order to get in exemptions they want.

Morgan of Rhode Island told us he was "for a fair shake of the dice," whatever that means. Butler of Buffalo is "for the bills BUT-"-while Campbell of New York said he'd "go down the line IF-" and another said he'd have to "study" the bills. This is "a day in action" of the

Congress of the decaying capitalist class rulers. This is the Congress within which the Stalinists propose a "liberal" capitalist coalition of Democrats and Republicans as their price for delivering the American working people into the hands of their class enemies on election day.

Reflecting bitterly on the report I'd have to make to the workers who sent me to Washington, and hot and tired from a hard day's lobbying, I started for home. And I, Gulliver, found I had a higher opinion of the

original Lilliputians than of the lilliputian politicians in this cap-

#### sain of secrecy. The entire cost of this research was covered by a government subsidy of only

Here are the answers.

come available.

The capitalist government subsidized and promoted the search to cure malaria as an integral part of its \$350 billion dollar war program designed to conquer and enslave the world.

The U. S. armed forces were dispatched to every corner of the globe during World War II. In the mosquito-infested and fever-ridden Pacific islands and other colonial areas, soldiers succumbed by the tens of thousands to malaria.

For the sake of military efficiency alone, the

Soldiers, you see, should die in combat from bombs and bullets—not from malaria! Thus it was only as a by-product of the imperialist war program that this new achievement

of medical science was made and has now be-

But this same capitalist government does not intend to initiate or continue any projects not directly needed for military purposes. It is ready and willing to keep on paying out tens States, that they keep an army of billions for bombers, tanks, guns, rockets and in the occupied countries in ordother instruments of death. It is spending over half a billion a year to pile up atom bombs. It can find plenty of money for these frightful man-made weapons of destruction. But it cannot and will not provide the means, the men, and the money to conquer cancer, tuberculosis, rheumatic fever and other biological enemies

The conquest of malaria provides another dramatic demonstration that through proper planning and cooperative research, one disease after another from which mankind suffers today can be eradicated. But the capitalist rulers of this country are not concerned with promoting projects of this kind that can benefit the masses. They are concerned solely and exclusively with enterprises which in one way or another can add to their profits and increase their privileged positions.

Medical science in conjunction with the other sciences has already indicated that almost all major diseases can be conquered and man's life span greatly lengthened. But before the scourge of disease can be expelled from the human body, the fundamental scourge of mankind today must first be wiped off the face of the earth. That social scourge—the breeder of wars, famine, pestilence and early death-is the decomposing capitalist system of production for

# "LABOR MUST FIGHT DRAFT,"

I have noticed lately in the papers talk about "indef-High Command ordered this obstacle removed. inite extension of the draft." There seems to be a lot of words wasted explaining just what this would mean, when manent conscription is what | concerned about, as a CIO-packit seems evident that per-9the Army is after.

Every soldier who like myself USED AGAINST LABOR was in occupied Europe saw the mass starvation there. It is absolutely necessary for the moneved interests in the United er to keep down the hungry pop-

ulations. Big Business is behind the movement for the draft extention because it has suffered a set-back in the recent strike wave. And this is what I am

inghouse worker, who has also served his time overseas.

A standing army of any size (which is what Wall Street is now after) will be used against the labor movement in the future as it has been in the past Just last fall the Army was used in the Chicago stockyards to put down trade unionists seeking a decent living—as "rioters." Organized labor must fight to

stop permanent conscription.
