## On Trial in L. A. By E. Smith

This trial occurs almost exactly three years after the "Foley Square" trial in 1949 in which 11 Stalinist leaders were convicted of similar charges, It is presumed that the Los Angeles trial will be the prelude to a whole round of similar trials of "lower echelon" Communist Party members. According to current estimates, the trial will last four to six months.

Judge Mathes threw out the initial indictment presented by the government and patterned after the "Foley Square" frameup. Mathes ruled that "specific ntent" of each defendant to engage in an illegal conspiracy was an essential requirement. This action led the government to change the original charge and to add "specific intent" to its bill of particulars.

Judge Mathes' ruling does not at all mean that he is that rare type of jurist who defends the Bill of Rights and especially the First Amendment which states that "Congress shall make no law . . . abridging the freedom of speech, or of the press." He, as his conduct already shows, would not be averse to emulate the career of Judge Medina, who was appointed to the Circuit Court of Appeals following the "Foley Square" convictions. Mathes has outdo even Judge Medina. Mathes acceded to the Justice Department demand and fixed the bail

## KOREA DISCLOSES "NEW PATTERN OF WARFARE"

New testimony on the frightful cost of U.S. "liberation" to Korea and the Koreans is given by Reginald Thompson, formerly Korean war correspondent for the London Daily Telegraph, conser-

in the Feb. 17 N.Y. Compass, demilitary:

"All the major towns of Korea Pusan have suffered the most terrible destruction; the slow and painful efforts at industrialization have disappeared; roads and lives and property." railways have been gravely damaged; hundreds of villages have been erased from the face of the earth and countless people, caught been reduced to ashes with their homes, or condemned hopelessly to roam the barren wilderness. Few of them know why."

Thompson points out that the U.S. was able to bring to bear on Korea a tremendous force of air and sea power, as well as tanks and heavy artillery, that was able to operate almost at will and without interference. "Never could modern weapons and 'total interdiction' have a better chance to prove themselves," says

NEW WAR TREND

From this observation of the unspeakable atrocities committed in Korea by U.S. imperialism, Thompson draws a general observation:

"Thus in Korea we see the new trend and pattern of warfare for the first time. In the 1914-18 war civilians were included. In the 1939-45 war civilians became equal targets with soldiers, Today civilians have become the main target. That is the meaning of 'total interdiction' and the atom bomb carries it to its conclusion.

This is the opinion which the people everywhere throughout the world have derived from the destruction of Korea. This is why they live in terror of U.S. "liberation." They know, as Thompson civilians and their means of support. In terms of warfare it is al-

#### TWO EXAMPLES

Two examples appeared in the press last week. One concerned a white man named Lawrence Burtoft, son of a tavern owner near Groveland, Fla., who is now serving as a private first class in the U.S. Army at Fort Jackson, S. C. The other was a white woman, Miss Sally Veatch, 26, a chool teacher at Wesleyan Colege, the daughter of a Methodist inister in Atlanta, Ga.

As a soldier, Pfc. Burtoft could ignore any subpoena calling on him to appear as a witness in the Groveland "rape" frameup trial of Walter Lee Irvin. No one had his home as a witness, no one Let us recall that prior to the forces to defend the South but himself. Yet he chose to testify.

And his testimony was damning to the authorities. He related how the woman who now claims to have been raped told him that night in July 1949 that she had been robbed and kidnapped by four Negroes, but that she said nothing whatever about being raped and certainly did not act as if she had ben treated with violence. He also testified she told him that she was not able to identify her kidnappers. #### BOOKS FOR NEGROES

Miss Veatch had a job as radio newscaster for Station WMAZ in Macon, Ga. Negroes in this city have been fighting for the right to use public library facilities, and recently attended a City Council hearing to present their case. Miss Veatch thought that the situation was outrageous. Speaking over the radio, she said so, and added:

"I am ashamed that such a meeting was necessary in Macon where Negroes must plead and demand access to books.

"If I were a member of a croup trying to get books to read, think I would have broken down the doors of the city library a long time ago."

The next thing that happened was that Miss Veatch had "resigned", from her radio job because she was not "objective" in presenting the news. It is important for us to be

aware of the other white South, the power to make him return to because from its ranks will come the forces who will join with the Negro people in ending the Jim Crow dictatorship that oppresses white as well as Negro workers and farmers. It is the duty of the American labor movement by organizing unsegregated unions and fighting to end Jim Crow domination and lynchterrorism - to create the kind of in which the other South will be able to speak and act openly and without fear of reprisal.

"Myron and Rebecca sold 30 Militants and 10 copies of 'The Struggle for Negro Equality' at a Concord NAACP meeting in Brooklyn; and George W. and Johnny sold 28 papers and two Negro Struggle pamphlets at Community Church protest meeting Friday."

Meanwhile the Downtown and Harlem comrades have been continuing their neighborhood work with sales of 12 papers, three 25c. subs, and two Negro Struggle pamphlets, in the past week at the Wald and East Harlem projects. Brooklyn has been doing consistently well on sub renewals with Julie the high scorer for last week. Carmen and Elaine report a good sale again this week at the New School. ### **Another 'Subversive' List Case**

The National Association for the Advancement of Colored People announced in a press release on Feb. 7 that Civilization, which remains one Secretary of the Army Frank Pace Jr. had rescinded an of the better studies of colonial order of the Army's Detroit Ordnance District listing the America produced by the liberal California branches of the NAACP as "subversive."

NAACP secretary Walter White wrote to Pace on Jan. 10, protesting the inclusion of the NAACP on any "subversive" list and asking for its prompt removal. On Feb. 5 Pace wrote back, saying the listing has been rescinded and adding: "The fine efforts of the NAACP to eliminate communism are well known to me. . . "

The incident is now closed, so far as White and Pace go. But it ought not to be forgotten, because it throws a great deal of light on the whole "loyalty" purge-"subversive" list-witch hunt program.

The NAACP was put on the blacklist without being informed in advance, without being given a chance to hear the specific grounds why it was listed, without having tels himself does not put it in the right to defend itself at a hearing. The same thing has happened to more than 100 other organizations and can happen to any organization.

Suppose the NAACP had not been removed from the "subversive" list — what could it have done to reverse a decision stigmatizing it in the eyes of the public? Very little, under the "loyalty" program regulations. Scores of the blacklisted organizations have found that out; they know from bitter experience that the "loyalty" program the revolutionary movement, the work out a deal with him whereby crown. offers them no genuine appeal against continued victimization by arbitrary bureaucrats.

The designation of the NAACP as "subversive" was not yet ready to blacklist the NAACP; they want first to condition the American people to accept the principle that blacklists are permissible, and at this stage of the game they confine the blacklist to the more radical (and therefore, they believe, the more vulnerable) groups.

But after this precedent is set, the witch hunt will be extended — to labor, liberal and Negro groups, including the NAACP. Today the NAACP is commended by the politicians in power for its "fine efforts. . . to eliminate and Mrs. Harry T. Moore and communism." But tomorrow the standards of "anti-communism" will change, and the NAACP's fight to end Jim Crow will be construed as "subversion" of the worst type.

The experience of Germany proved that if you let the witch hunters have a finger, they will try to snatch a whole arm. It can happen here too, and it will, unless the labor, liberal and Negro movements understand the of local, state and federal full implications of the witch hunt and take vigorous ac- authorities to apprehend and tion to stop it in self-defense. The main target of the prosecute the criminals, requires "subversive" list is not "communism" but the Bill of Rights | a more dramatic demonstration itself. Organizations that don't want to be blacklisted tomorrow must come to the aid of those that are being blacklisted today.

A lack of confidence in the trustworthiness of the Truman and Representatives. administration and politicians of both parties who give lip service to civil rights legislation was reflected in some statements of the officials of the conference. At one point it was heartily assented to by the conference.

C. R. Darden of Missippi was reporting how his delegation, unable to secure a meeting with their white - supremacist Senators, Eastland and Stennis, had spoken with Stennis' assistant, a Mr. Matthew. In reply to the argument that eight or ten filibustering Senators could prevent the majority from voting on civil rights legislation, Matthew was reported as saying that a majority of Senators could break such a filibuster if they wanted to. At this point in the report, cries of "That's right" were shouted from the floor.

The conference was attended by and represented 52 organizations claiming millions of members. However, the great bulk of the delegates were from the NAACP,

This should illustrate the present atmosphere in the United States for vour readers. . . .

Nobody is saying that things are as bad as in Hitler Germany or Soviet Russia. But they are bad enough. There is obviously an immense number of government agents whose job it is to engage in political snooping. Every employee of an industrial or scientific organization, down to the last janitor, has to apply for security clearance if some classified work is going on on the premises. He has to list all organizations he ever belonged to and he will not be cleared if there happens to be one on the Attorney General's list. He never will be missed.

Just think how many men must be employed to scrutinize these forms and how dangerous the mere existence of such an apparatus can be.

> During the Revolutionary War, Sam, Adams continued to serve as the mainstay of radicalism in Congress. He was a member of dozens of important committees, including the Board of War and the committee for disarming and suppressing the Tories, and he was chairman of most of the committees on which he served. Thomas Jefferson later wrote that Sam Adams "had a greater share than any other member (of Congress) in advising and directing our measures in the Northern war."

> Adams exercised his vigilance particularly against any attempts at a deal with the British. For example, when the Crown sent a commission here to initiate negotiations, Adams wrote an open letter saying there was nothing to negotiate. and that the British could solve all problems by withdrawing their troops.

"We are not so romantically fond of fighting." he wrote, "neither have we such a regard for the City of London, as to commence a crusade for the possession of that Holy Land." He then added: "To revive mutual affection is utterly impossible. case, the recent frameup convic- We freely forgive you, but it is not in nature that you should forgive us. You have injured us too much."

It is not the purpose of these articles to carry the narrative of the American Revolution into the war period. However, certain features of the war are indispensable for the full demonstration of points we have developed.

It has been our contention, throughout these articles that, contrary to the impression given in the school books, the revolution was made not by a united people but by a disunited people. This disunity, furthermore, was drawn along class lines. Thus the revolution constituted an internal unheaval that reconstructed American society in many important respects, not merely a colonial revolt against Britain.

The Great Tory Emigration

Let us begin with the startling facts of the Tory emigration during the war. It is not very well known that somewhere between 100,000 and 200,000 emigres fled the colonies during this period. The exact figures are not known, but none of the various estimates are below 100,000.

If we make a comparison between this emigration and the far better publicized flight of counter-revolutionists during the French Revolution , we are confronted with a surprising fact. A recent Harvard University study of the French emigration from 1789 to 1799 estimates that the total number of individuals who fled the Revolution during those years comes to slightly more than 129,000. Thus the emigration in the American Revolution was about the same size as the emigration in the French Revolution. However, the population of France from which the emigration was drawn was ten times the size of the American population; slightly over 28 millions as against only 2 3/4 millions.

It is quite likely, from all available evidence, that the Tory emigration from the American Revolution was the largest proportional emigration from a revolutionary nation in the history of revolution.

We come to the next question: Who were the American emigres? An authoritative historian has

"If we should investigate the Tory party in the several colonies in detail, we should be forced to the conviction that, in New England, it comprised in 1775 a very great share, probably more than half, of the most educated, wealthy and hitherto respected classes. In March, 1776, when Howe evacuated Boston, eleven hundred refugees sailed away with him. These eleven hundred, and the thousand or more who subsequently followed

them, bore away perhaps a majority of the old aristocracy of Massachusetts."

In New York, the same authority estimates: "In the height of the war at least, the bulk of the property owners belonged to the Tory party." He adds that in Pennsylvania, the situation was the same. The New York Chamber of Commerce, an association of wealthy merchants, contained among its 102 members no fewer than 54 Tories and only 21 Whigs, of whom most were conservative oppositionists, not radicals.

The prominence given to the name of John Hancock, partly by himself and partly by later historians who have tried to give the capitalist class a good "patriotic" record, has, we find once more, left a false impression. Esther Forbes, biographer of Paul Revere, remarks, for instance, that Hancock was the only prominent merchant to continue the line of the old Massachusetts merchant aristocracy after the Revolution. Most others were uprooted by the storm.

Tory Armed Forces in the Civil War

The fact that a huge portion of the previous ruling class was exiled (to Hell, Hull and Halifax, as the saying went in those days) and that another large portion worked as secret enemies of the new regime, surely speaks eloquently as to the nature of the revolutionary war. It was civil war as well as colonial. The composition of the British armed forces further reinforces this view.

Colonial Tory regiments formed by wealthy Tories and their hangers-on played an important part in the fighting. Most of the military operations of a distinctly civil war type, such as raiding and pillaging directed against the civilian population, burning of villages, harbor installations and ships, etc., were assigned to these Tory regiments. Johnson's "Loyal Greens," Butler's "Tory Rangers," and a regiment organized by the traitor, Benedict Arnold (who had been a New Haven merchant in civil life) played a large part in some of the bitterest fighting of the war: in the Wyoming Valley of Pennsylvania, the Cherry Valley of New York, and in the southern invasion

during the latter part of the war. There were close to 20,000 such Tory militianen, and at least 30,000 more Americans served directly in the British Imperial Army and Royal Navy. This total of 50,000 colonials who fought against the revolution is an imposing figure, when it is recalled that the forces at the disposal of General George Washington often fell below

James Truslow Adams makes the following startling statement: "Tories in great numbers did flock to the Royal Colors. Indeed it has been stated, although not wholly proved, that more colonials served in the Imperial than in the Revolutionary Army."

This claim is certainly false. Charles A. Beard estimates that in the course of the war, nearly 400,000 Americans were enlisted for some kind of service with the armed forces of the Revolution. But the very fact that American Torydom contributed so many counter-revolutionary soldiers as to make this claim possible underscores the civil war character of the fighting.

Popular Anger at the Tories

Nor was the civil war restricted to the formal military arena. Tories were tarred and feathered, their homes and other property destroyed, and some were even executed by the angry populace. The leading known Tories spent the war in prison; a Connecticut prison camp contained at one time, a former governor of New Jersey and the mayor of New York.

A complaint penned by Lord Dunmore, Royal Governor of Virginia, shortly before the fighting opened, gives a graphic picture of the development of the civil war. He wrote:

"A committee has been chosen in every county . . . which committee assumes to inspect the books, invoices, and all other secrets of trade and correspondence of merchants, to watch the conduct of every inhabitant without distinction, and to send for all such as come under their suspicion . . . to interrogate them respecting all matters which, at their pleasure, they think fit objects of their inquiry; and to stigmatize, as they term it, such as they find transgressing what they are hardy enough to call the laws of Congress, which stigmatizing is no more than inviting the vengeance of an outrageous and lawless mob to be exercised upon the unhappy victim. Every county, besides, is now arming a company of men, whom they call an Independent Company, for the avowed purpose of protecting their committees and to be employed against government if occasion requires."

The new revolutionary power had its birth in actions such as these, and the civil war that followed flowed directly from them. As we would expect, far-reaching social changes follow-

ed as a result of this war and revolution. (Next Week: The Revolution And Social Change.) Cleveland Call and Post which cited the example

The thing that makes this character, Donovan, such a serious problem for the workers is that he is not unique. Unfortunately, his thinking is typical of the whole stratum of labor bureaucrats who have forgotten, if they ever knew, that the unions have just one justification for existence - and that is as organizations through which the working people can further their own class in-

The Cleveland Call and Post was right when it pointed out that the growth of the bureaucracy has brought the CIO to a critical point. But the situation is as serious for white workers as for Negro workers, and the two must unite to get rid of the Donovans. They can only do this by their own organized effort, by building a new left wing leadership and returning the unions to the democratic control of the ranks - not by appealing to the Murrays and McDonalds or any others of the same stripe.

In many sections of the labor movement rank and file militants realize this and are organizing committees to defend their democratic rights - including their right to get rid of the bankrupt leadership that leads the labor movement from one blind alley to another, both economically and politically. It is in these rank and file opposition movements that Negro workers facing the particular problem of discrimination in the unions must look for allies.

Cry the Beloved Country

The best-seller Cry, the Beloved Country by Alan Paton reached the American screen recently. It received an enthusiastic reception by the critics. The N.Y. Times reviewer praised it as the first great film on the subject of racial conflict. Let me file a minority report, for although the merits of this movie become apparent early, its faults, which are subtler, become, in the end,

This is the story of a back-country native priest of South Africa, a member of the Anglican church, beautifully played by Canada Lee, the same fine actor who gave flesh and blood to the role of Bigger Thomas in Native Son over a decade ago. Now, Canada Lee portrays a sincere religious man who takes leave of his impoverished flock of Negro tenant farmers, to journey into the "civilized" jungle that is Johannesburg in search of his son and sister.

The best feature of the novel was the vivid description it gave of this dislocation in the lives of the natives, who comprise the vast majority of South Africa. Imperialism, with its exploitation of cheap labor in the gold and diamond mines, has uprooted, with terrible results, a long-established primitive culture. But the film underplays what the novel stressed.

Slickly skirted around, are those scenes which describe the young men being conscripted from the fields for long hard labor in the mines, then cast unmercifully adrift, broken in body and mind, into the slums of South African cities. The wives of these men are barred from living with their men during the years of mine labor and wait out the lonely, hungry days in the city slums. The priest's sister has to turn to prostitution to earn her bread.

Counterposed to the odyssey of the Negro priest is the story of the wealthy landowner of the same back-country area, This man's son has also fled his home to escape the parasitic, manorial life, and because he refuses to accept the injustices of his father's way of life. In Johannesburg this young man has achieved fame as a social reformer attempting to improve the conditions of the black millions.

The film tells primarily the story of the two elderly fathers, the Negro priest and the white landowner. As the camera follows the priest it cannot help but record the misery of native life in South Africa. This background material - the endless piles of wooden shacks, the native homes, and the faces within; faces shocked into dullness by unending pain and humiliation - actually shot in that country, remains stored in memory long after one leaves the theater.

But the filming of this reality is the only part of the truth that this movie offers. To dispel this visible indictment of imperialism, the movie makers immediately serve up in dramatic form the two old lies; social reformism plus the Sermon on the Mount. They unravel these panaceas on the screen with skill and talent. The son of the landowner, they imply, has found the way to overcome the inequality, poverty and hate - by building boys' clubs for the Negro youth. This is presented in all seriousness. So seriously, in fact, that it seems that the old landowner, a firm supporter of the status quo in South Africa all his life, recognizes the merits of his son's teachings after his son's death, and turns himself into an active supporter of this "new" idea.

The movie makers hammer on the theme that since the pressures of grinding poverty and rative boy, in a moment of fear and hate, to rob and kill, therefore, the solution must be - modern, progressively-run reformatories.

To the author's credit, his plot tears through this "uplifter" sham. But the one final answer both he and the film offer is the inherent goodness of man. The lion, represented by the few white colonial rulers, and the lamb, that is the oppressed black peoples, shall, one day, lie down as brothers in the gold and diamond pastures of South Africa.

This film thus distorts, confuses and hides reality. The truth looms large before the lens of the camera but the cynical palm of colonialism is quickly drawn over it. Watching this plot unfold, I thought of the headlines in the newspapers outside the theater, proclaiming the extension of the revolutionary wave of oppressed peoples to the heart of Africa. It is this wave and this wave alone that will smash for all time the exploitation of the native women and men of South Africa.

VOLUME XVI

SEATTLE, Feb. 13 - Coinciding with the final days of the mayoralty campaign of Daniel Roberts, Socialist Workers Party city chairman, the local appearances of George Clarke, party leader and editor recently returned from Europe, served as a highly successful climax to the efforts of the Seattle Branch to publicize the anti-war, pro-civilliberties program of the SWP before the people of Seattle.

Over 100 University of Washngton students assembled to hear 'A Marxist View of World Events." They listened intently as George Clarke clearly analyzed the class forces creating today's history and the irresistible global surge towards socialism.

Hailing the mushrooming revolts against imperialist domination by the colonial masses and the resistance of European workers to rearmament as practical confirmations of Marxist theory, Clarke urged unconditional support to these dynamic manifestations of the impending world conflict between progress and reacsaid. Clarke was the first scheduled speaker in a series of forums sponsored by the University Y.M. C.A. at Eagleson Hall. His appearance was advertised widely on the campus. For an hour after his talk, dozens of serious, sympathetic students gathered around Clarke and Daniel Roberts, who introduced him, to ask questions and discuss socialism. The next evening Clarke spoke

at a downtown meeting at Evergreen Hall in the Arcade Building sponsored by the SWP. A large audience of workers, Negroes, students, and housewives, many of them new to Marxist ideas, listened to Clarke speak on "The Coming International Showdown" with the same eagerness and intensity shown previously by the students. Daniel Roberts also spoke on "Civil Liberties and the

The partial victory in this dispute has encouraged a bolder, more aggressive stand on the part of the workers.

The present flurry of strikes omes in response to the intensification of the speedup brought in the wake of mass unemployment among the auto workers. However, the hopes of the auto corporations that the unemployment would weaken the resistance of the workers have been shortlived. In fact, the unemployment has tended to promote greater resistance to the speedup as the workers see a double threat to their conditions and security.

In the meantime, all that the auto workers have gotten so far to meet the unemployment problem is a lot of talk. In spite of hurried trips back and forth to Washington by Reuther and others and the establishment of several committees to "investigate," job prospects for Detroit's unemployed continue dim. Nothing has been done to alleviate the plight of the jobless and it is announced that increased thousands will be added to the unemployed by April.

# **Johnstone Fired**

DETROIT - The removal of Art Johnstone, Director of the UAW-CIO General Motors Department, was announced last week in a letter to General Motors locals by UAW president Walter Reuther. Johnstone, who had been Director of the General Motors Department since 1948, was a consistent supporter of the Walter Reuther administration.

The action by the Reuther leadership comes in response to long - standing dissatisfaction of General Motors workers with the functioning of the union in the General Motors set-up. In Reuther's announcement of the removal of Johnstone "ill health" and "policy differences" are given as the explanation.

#### GREATER CRUDENESS

However, while Johnstone ranked high among the Reuther way" of unionism as opposed to labor force for a showdown with bureaucrats for his open company - minded and conservative policies, he differed from the others in the leadership only in his greater crudeness and lack of polish in carrying out Reuther's policies. Jack Livingston, Vice-President of the UAW, who has now been appointed Director of the General Motors Department, is the recognized leader of the most conservative forces on the UAW-CIO Executive Board.

In view of Johnstone's complete and consistent support of Reuther and his policies, his removal is viewed as an attempt by Reuther to find a scapegoat to pacify General Motors workers.

As one General Motors Local union officer put it. "We are happy to be rid of Johnstone. But we must yet get rid of Reuther and his policies which Johnstone so faithfully supported."

SCHUYLER STRIKES OUT - George S. Schuyler, Pittsburgh Courier columnist, wrote on Feb. 16: "Dr. W.E.B. When the same law was used to jail Trotskyites . . . the good Doctor was silent!" Schuyler couldn't be wronger if he tried. Dr. DuBois not only was not silent when the government jailed Socialist Workers Party and CIO leaders under the Smith Act, but he joined the Civil Rights Defense Committee formed to help them.

CEYLON IS OPENLY selling rubber to China, for which it "has forfeited American Point 4 aid," George Weller, Chicago Daily News correspondent, reported from Ceylon on Jan. 25. This flouting of the UN's demand for a rubber blockade against China, he says, is due to the high profits the rubber brokers make from the sales and to the pressure of "Communist and Marxist nationalists" in the Ceylon Parliament.
