PUBLISHED WEEKLY IN THE INTERESTS OF THE WORKING PEOPLE

Vol. XVI - No. 29

THE

NEW YORK, N. Y., MONDAY, JULY 21, 1952

PRICE: FIVE CENTS

(Following is the full, advance text of the acceptance speech Farrell Dobbs, presidential candidate of the Socialist Workers Party. It is scheduled to be delivered over a CBS nationwide radio hook-up, Saturday, July 26, 1952, from the SWP convention hall. - Ed.)

You've been listening to many politicians who want your vote in November. You've heard all of them promise to work for peace. They make that promise because they know that genuine and lasting peace is the most cherished hope of the American people. You've heard Democrats and Republicans argue -

in the name of peace - whether we should concentrate on a big air force or a big ground force. You've seen them combine to draft our youth and

spend billions to stockpile atom bombs and build military bases throughout the world. You've seen Democrats and Republicans work together to make alliances with foreign rulers who are despised by

the rank and file of all humanity. These are not peace moves. Armies, weapons and military alliances are intended for war and for no other pur-

We have already been thrust into battle in Korea in violation of the constitution of our country. Republicans call it Truman's war. But you can't name one prominent Republican who demanded this illegal war be stopped. The truth is the Republicans and Democrats are equally responsible for two years of destruction and slaughter in Korea. To them this so-called police action is merely a dress rehearsal in preparation for war on a world scale.

This drive toward war stems from a fundamental antagonism between two classes, an antagonism that exists within nations and flows across international frontiers. On one side stands the class of wealthy bankers, industrialists and landlords; on the other the class of those who toil, in the city and on the land.

The toilers of the world are fighting for a full share of the products of their labor. This demand is reflected in the great steel strike here in America; in the British Labor Party demand for more bread and less bullets; in the present struggle to nationalize the tin mines in Bolivia under workers' control; in the fight to expel foreign exploiters from China. To achieve their goal the working people want a government of their own choosing.

The wealthy classes, led by the American capitalists for whom the Democrats and Republicans speak, are trying to suppress these revolts of the toilers by force and

That is why American troops were rushed into Korea on the side of Syngman Rhee. That is the reason for the (Continued on page 2)

# Delegates Convene to Draft Election Platform, Nominate 1952 Presidential Ticket

By Joseph Keller

NEW YORK, July 17 - Launching its socialist antiwar election campaign, the Socialist Workers Party today convened its 15th National Convention to draft a 1952

election platform and to nominate its presidential and vicepresidential candidates. Delegates and visitors from all parts of the United States attended the openng sessions here at the Cornish rms Hotel.

Farrell Dobbs, who headed the WP's first national ticket in 948, will undoubtedly be the party's choice once more to carry its banner as the working-class opponent to the presidential candicates of the Democratic and Republican parties of Big Business. Dobbs came to the convenion fresh from the fight he has been leading in Michigan against the Trucks Police-State Law, After having ruled the SWP off the Michigan ballot under this law, state officials were forced a few vecks ago to restore the party's callot listing.

In contrast to the Republican nd Democratic conventions where Big Money dictates to the delegates, the SWP is a gathering of workers who, in an uncorrupted atmosphere, freely discuss and the China seas to Central Eurmake their own decisions.

A stirring convention keynote from Indo-China to Bolivia . was struck by Vincent R. Dunne, all of western Europe and the SWP National Labor Secretary British Isles" - the world is and famed Minneapolis labor "pregnant with a new social orleader, in an address broadcast der. Its goal is to abolish the extonight over a Mutual national ploitation of man by man, and to adio network. He appealed to place ownership and control of the American working class for natural resources and the tools of "the formation of the independent industry in the hands of the workanti-war political movement of ing people.'

the American working people." "Our country is the last bulwark of the outlived and dying system of world capitalism," said

# Way of Life

# Magic Money

The other day I read a column about stock ownership by Max Lerner in the N.Y. Post. He winds up: "I have myself never owned a share of stock in my

life. But as soon as I can save up some money, I intend to start. I asked. "How do people get so been bitten by the great American dream: To have your money tively, while you doze in the sun."

Now I'm not much of a dreamer, but for hard-headed practical purposes, that's the best dream change it into something else." I ever heard of. I don't know how inists resorted to the tradition- nothing but money at work: money raising me a fine truck garof duds for the family, money polishing the car; in short, money making my living for me "silently and effectively."

The next day I laid off work, went downtown and drew my lit-

## A DISAPPOINTED MAN

I put the money back in my pocket and went back to town, a disappointed man. The next day when I went to work, I stopped local imitators of the Moscow in the office to see my boss. He uing to claim they have "docu- to make it do all sorts of things: "What d'ya wanta get so smart The as sole substantiation of his mentary proof" implicating the work, talk, grow, etc. I told him

accordance with the cynical view notion about 'money working for floor and do some work. D'ya you' is just a manner of speak- think I'm made of money? D'ya that the bigger the lie the ing. As a matter of fact, when it think money grows on trees comes to work, money is in the same class as platinum-blonde of money, but of flesh and blood gold diggers and angora cats. All like me. Money doesn't grow on it can do is lay around and look trees, or anywhere else. Money

"What's the angle then, boss?"

The boss leaned back and got expansive. I could see he was on work for you, silently and effec- his favorite topic. "Money," he said, "is like a perpetual motion machine. The only way to make it work is by magic. You got to "Like what," I asked.

## GETS VAGUE

Here the boss started to get vague. He even seemed a little embarrassed, like a man who suddenly realizes he's been talking too much. "Oh, you know, stuff and things."

"I get it," I said. "Machinery. You have to buy machinery with

the money."
"Well —" his embarrassment hung on.

"And materials for the machnes to work on." I thought I was really cooking now.

He hemmed and hawed a little bit, and finally gave it to me straight. "Look, I've been around money, machinery, materials and them do a tap of work. The only seen do any work is people.

# I started to see daylight. "You

mean, anybody who has money off the labor of other people? There was a sudden change in the boss. "Listen," he shouted. for? It won't do you any good to know so much. Now quit stand-He laughed. "Well now, that ing around here. Get out on the

# "Property Rights First"

Buried inside a steel strike story in the July 14 Christian Science Monitor, a conservative capitalist paper, we find a convincing, if unintentional, admission of the truth about where the patriotism of the corporation owners starts and stops. Roland Sawyer, the Monitor staff correspondent in Pittsburgh, writes:

"However, in a struggle of the intensity of the present one, in which the issue has become one of who is running the mills, the management or the union, NATION-AL DEFENSE COMES SECOND. (Our emphasis). The steel companies fought the President's seizure order on the issue that he had seized private property without warrant and won."

We leave aside the question of the falseness of the issue of the strike as raised above. We are interested in the statement of the extent of the so-called patriotism of the steel barons who have been screaming "bloody treason" against the union for daring to strike for its just demands. When it comes to what the steel companies a left liberal, not a Marxist." consider a threat to their property interests, then "national defense comes second.'

"National defense" has long served the exploiters of labor as an excuse for opposing unionism and denying whether my May 19 Militant arunion demands. The industrialists and bankers and their political agents and propagandists never cease to demand in the May 26 N.Y. Daily Compolitical agents and propagandists never cease to demand pass, had anything to do with it, "stern action" against the unions, particularly during but several of the liberal and strikes, in the name of "national defense."

For the capitalist, "national defense" is always equat- obliged to devote considerable ed with his own interests. These interests are not at all complex. They are tied up with one very simple thing profits. He is for the "national defense" of his profits and his means to increase profits. We have always contended that the patriotism of the capitalists goes no deeper than their portfolios of stocks and bonds and their bank accounts.

There are repeated examples in history where the capitalists of a nation have even opened the doors to an enemy imperialist army rather than yield an iota of their property rights to their own people. The French capitalists invited the German army in to crush the French revolutionary workers during the Franco-Prussian war and job of exposing the lies, deceprepeated their treachery in 1940 with Hitler. The U.S. tions, contradictions and atrocimonopolies maintained their cartel agreements with the ties perpetrated by the Washing-German and Japanese capitalists right through World War II.

American workers should examine with a sharp and ers of the only prominent, inde- reans invaded South Korea 'enwary eye this slogan of "national defense" as used by pendent, liberal, professional couraged politically by silence, inthe big corporations and their political tools. Whether as a pretext to break a steel strike or to invade a Korea to put down a national independence struggle against foreign imperialism, "national defense" is a disguise for dismisses the official Kremlin ac- The review complains that "the the result of an "unprovoked agthe self-interest of the tiny ruling capitalist minority. But the capitalists will invariably find that "national defense comes second" when it stands in the way of their dominant slogan: "Our property rights first,"

# **Lewis and Labor Party**

Editorial policies of John L. Lewis' United Mine NOT FOND OF STONE Workers Journal are of interest to militant workers, because Lewis, having become critical of both capitalist parties, often has shrewd observations to make about them. He has hit them on more than at length at Stone's book is more But, while the UMW Journal has both old parties well- one sensitive spot. He has de- revealing of the Worker's antiticketed, it provides no hint of an answer to the question: Where do we go from here?

A good example is the editorial on "Platforms: Promises Versus Performance" in the July 1 issue. It says: "With the Chicago-bound delegates of both major parties prepared to take part in the quadrennial festival of drafting platforms and nominating candidates, it is instructive to look back at the record." The editorial then goes on:

"Judging by the fury of campaign oratory, the onlooker might suppose that the two parties are poles apart, that anything favored by one is anathema to the other; yet their most recent platforms contain language that is strikingly alike on many points. Except for the customary viewing with alarm directed at the other side, the platforms, when they get to the affirmative, talk in phrases that are common to all politicians, regardless of party."

The editorial then points out that the 1948 platform of both parties contained "wide assurances" to labor, but that in the case of both the Republicans and the Democrats, promise was better than performance. It says:

"Neither Republicans nor Democrats made any really serious efforts. . . to live up to the pledges of their 1948 platforms.

"The labor sections of those platforms were dishonored. . . . So, when we read again the fair words of the platforms that will issue from Chicago in a few days, let us not be taken unawares or be too easily beguiled by highfalutin' promises. Let's study the record and hold accountable the politicians of both parties who have betrayed their pledges and the voters. Platforms should be built not merely to run on but also to stand on - after election."

That is a good sentiment. But good sentiments don't get the labor movement anywhere. The whole political problem that confronts the labor movement is: What is the alternative to accepting fine-sounding promises year after year, and seeing them broken after each election?

The Socialist Workers Party proposes a labor party. Such a party, being strictly accountable to the union movement, would have to live up to its promises. Its officers, its candidates, its program, would be drawn straight from the ranks of the labor movement. This party could be a party that would take its platforms seriously.

The trouble with the Democratic and Republican parties is that they are conscientiously dedicated to serving a certain master: the capitalist class. That is why they break platform promises. A party founded, not on a capitalist, but on a labor basis, could initiate a great new trend in American politics.

# Korean War--Its Class Origin And Nature: A Marxist Analysis

As I explained in my May 19 Militant article in defense of I. F. Stone and his book, The Hidden History of the Korean War, was not then attempting a critical Marxist analysis of Stone's views. I felt it my first duty to demonstrate that I stand unconditionally on his side against those who are out to destroy him because he has had the honesty and guts to investigate with open eyes and to speak up against the crime of U.S. imperialist invasion of Korea.

I also wanted to emphasize the positive and courageous contribution Stone has made in producing the first serious, factual, booklength study of the U.S. intervention on behalf of Syngman Rhee's dictatorship.

My article made it clear, however, that I am not in accord with all of Stone's analysis of the Korean events. I stressed our differences by stating that Stone wrote from the "point of view of

For weeks after its release on May 5, Stone's book was ignored by almost all of the liberal and radical publications. # NEW YORK TB CASES

By Harry Ring

Despite enormous progress in the diagnosis and treatment of tuberculosis, the number of cases in New York City in 1951 exceeded those of the depression year of 1931.

According to the annual report of the New York Tuberculosis and Health Association, the number of known TB cases in 1931 was 17,645. On December 31, 1951 the figure stood at 17,911.

Of course, the population increased during the past 20 years, so that the percentage of cases declined. But the report drives nome the lesson that all the wonder drugs in the world cannot landlords provides the fertile cope with the primary cause of breeding ground for TB, the cap-TB - poor housing and lack of italist politicians in City Hall are proper food. This dread killer is responsible for the utter lack of truly the poor man's disease.

THE MILITANT

There were no big changes made in policy or perspectives of the organization. In ordinary times this might not have too much significance, and in a period of reaction like the present it might be considered gratifying by some that the Association did not succumb to the tremendous pressure on all institutions to conform to the line of the government on foreign policy and to silence all criticism at home.

But these are times that require more than standing still. Militant leadership and a correct program of struggle are the burning needs of the Negro movement for equality. The convention did not provide them.

On the credit side of the ledger, we may note, as we predicted in this column some weeks ago, that the rosy glow of polyanna confidence that Jim Crow would fade away, was finally dispersed. In contrast to the last few conventions, a more realistic view of the situation in the struggle against segregation and discrimination was presented. "1951, The Year of the Hate-Bomb" was the title of the 76-page annual report this year, and the theme of the keynote address.

Instead of placing the accent on a few court victories here and there, Roy Wilkins, the NAA-CP administrator, pointed out that "Cases involving the violation of Negroes' rights in 1951 were probably more shocking than during any other year in recent history."

Also on the positive side was his de-emphasis on the bogey of communism. Placing the government witch-hunt of both the administration and the McCarthyites in proper perspective, he said: " . . . the hatebombs this year will fail. . . because we are men and not children. . . . Be-

cause we refuse to be hushed by the false and hysterical cries of 'communism.'

On the negative side of the convention's actions, the criticisms of the abuses under the Loyalty Program were weakened by endorsement of the program, and by the reaffirmation of the In the same way, every other reform proposal CCF Scores NAACP's anti-Communist resolutions of 1950 and

was made meaningless by being tied to support of the capitalist system and government. Political action, under the guise of non-partisanship which endorses no party or candidates, remains capitalist political action. The NAACP simply proposes to provide a gauge of legislative demands by which members may evaluate the candidates of the Democratic and Republican parties.

How much of a farce this non-partisanship is was revealed by the fact that it is Truman's civil voting day and it is still not rights program that provides the basis for judging candidates, Wilkins said:

"Whatever one may think about the Man from Missouri in the White House, he has set up an uncompromising yardstick on civil rights by which both major parties and all candidates can be measured."

It was this type of indirect Democratic politics at the convention as well as in NAACP policies and statements that gave rise to the biggest fight of the convention, except one that never reached the floor: the conflict between the libera retired Federal Judge J. Waties Waring, formerly of South Carolina, and Walter White over NAACP policies and perspectives.

Waring failed to make a scheduled speech as the convention, and while no one would give an official explanation, the reason reported in the press was that a feud exists between the two men and their factions on the Board of Directors. Waring objects to the NAACP leadership's policies of gradualism in fighting segregation, and of playing Democratic politics.

While these charges are certainly valid, even this feud has not brought forth the type of leadership in the NAACP that Negro advancement requires at this time. No one from the Waring group came forward with a proposal for independent political action, for a break with both Democrats and Republicans and the formation of a labor party with a radically different program.

Until such a course and such leadership emerges, the NAACP can at best, only mark time.

# Emptor Caveat

It's a fortunate thing that the State Department salesmen for "our way of life" aren't working on a commission basis. If they were, the rapidly dwindling export market for the 1952 model "American freedom" would certainly make it tough for them to maintain the standard of living to which they are accustomed.

For some time they have been trying to convince the public that the drop in sales is due to unethical competitors that are slandering and misrepresenting their product. "This international communist propaganda about witch hunting, thought control, loyalty purges and Jim Crow terror," they concede, "isn't helping the foreign market any, but when we get a customer right into the store to inspect the merchandise first hand, we close a sale every time."

The fact is, however, that over-the-counter sales aren't standing up either. The most recent shopper to edge his way out of the store with a cagey "sorry to take up your time, but not right now," is Kingsley Martin, editor of London's New Statesman and Nation. He reports his impression of U.S. "freedom" merchandise in the July 5 issue of his paper:

"Nothing astonishes the European visitor more than evidence of fear. . . the awkward hush that may fall over a dinner table if someone ventures a 'subversive' remark: the unhappy position of a professor who is suspected of once having heen associated with someone who had signed a document that was also signed by a communist.'

Martin tells the following story to illustrate his opinion of what is happening to American freedom. It is both ominous and ludicrous:

"An American citizen who worked closely with the Administration during the war was recently asked to deliver a four weeks' course of lectures for a thousand dollars to an institute of higher learning. He accepted, pleased with the honor and the fee. He received a fourteen-page questionnaire which, he was informed, must be completed in every detail before he could be allowed

"There were about 800 questions. They included medical queries - I noted them down myself about whether he had 'terrifying nightmares' or was addicted to bedwetting. He was asked whether he had ever 'received literature' from any of the Attorney General's subversive organizations (it would indeed have been suspicious if he had not). Every possible detail of his public and private life, that of his father and mother, that of his wife and her father and mother had to be given. To complete this part of the questionnaire alone, as he said in his letter of refusal, would have taken a month's research.

"The last question read: Are there any unfavorable incidents in your life not mentioned above which may be discovered in subsequent investigation, whether you are directly involved or not, which may require investigation? If so, describe. If not, answer 'No.'

"He was informed that the correctness of his answers would be investigated. I should like to and that to omit some 'unfavorable' incident upset our whole system to have self does not appear in the text. promises of reform was strikingmight well be accounted perjury.

"My friend, being a man of independence and integrity, refused to complete this preposterous questionnaire and lost his job and the honorium attached to it.

"American purges," Martin concludes, "are not to be confused with those of the Soviet Union, heresy. But the principle which shocked the West- parties, but spoiled all chance of the victory over fascism and held ern world about Soviet trials appears to be also a thumping CCF victory. "In- out the promise of an enduring at work in the U.S."

An obviously careful shopper, Mr. Martin does well in his inspection of U.S. "democracy" to follow the classic commercial maxim: Caveat emptor. Let the huver heware!

# Gas Steal The

By Glenn Kerwin

Close to a million natural gas consumers have been robbed of several million dollars by the gas companies in New York City and vicinity since the changeover from manufactured to natural gas. This was revealed by facts disclosed in the daily press last month.

The newspapers pointed out that up to 56% of the gas meters in use in residences where the change-over has been made are over 2% fast. Some are as much as 20% fast. As a result, the companies have pocketed millions in payment for gas that was never used - in fact, that never left the companies' holders.

Lack of oil vapor in the natural gas tends to have a drying and stiffening effect on the sheepskin diaphragms through which the gas passes within the meter. The diaphragms become unable to pass as much gas as they should in a given cycle. The meter dials, calibrated to show that a given volume has passed through per cycle of the diaphragm, now indicate in a majority of cases larger volumes than have actually passed through the meters.

The newspapers did not give the entire pic-. ture and, indeed, tried to cover up for the companies. For example, the June 9 N.Y. World Telegram headlined an article in part: "Utility Firms Blameless." This is a lie. They are com-

Throughout the country, every gas company that has changed over from manufactured to natural gas has discovered a large percentage of resulting fast meters. It has also been discovered that a proper system of oil-fogging the natural gas greatly reduces the number of stiff diaphragms and corresponding fast meters.

Although knowing these facts, the companies in and near New York City did not install systems of oil-fogging, or installed ineffective systems, or installed oil-fogging after most of the damage had been done.

The data on the percentages of fast meters was prepared by the companies involved. Since they are not prone to emphasize their own demerits, it is likely that the actual percentages As the newspapers indicated, a consumer in

N.Y. state whose meter is tested and found to be

over 2% fast is legally entitled to a refund of

the money overcharged. However, the papers did

not tell of the insidious methods the companies use to avoid paying refunds.

A consumer who complains of high gas bills may on request have his meter tested by the company or the Public Service Commission. However, before the complainant has a chance to request a meter test, the company frequently purposely removes the meter, repairs it and then uses it on another consumer's premises.

However, a subtler means is more generally used for swindling on refunds. It is legally required that every gas meter in use be completely repaired by the gas company that owns it at least once every seven years. Normally this law is fairly strictly observed because it acts in the interest of the companies, since the average meter runs slow or even ceases registering if kept in continuous service more than seven years. But since the introduction of natural gas, many consumers have noticed their meters have not been replaced even though they have been on the prem-

ises well over seven years. These meters at first run fast, Then, after many months of rapidity, the combination of stiff diaphragms and old age cause the diaphragms to crack up and start running slow. This is generally about the time the consumers start complaining of high bills and request meter tests. The tests reveal, of course, the new slowness of the meters and the companies keep the money

they stole during the period of rapidity. The Public Service Commission is supposed to regulate, among other things, the gas utilities. However, like all such agencies of the capitalist government, it acts chiefly to protect the interests of the companies. It is not surprising that the PSC chairman is Benjamin F. Feinberg, the former state senator who authored the infamous witch-hunt law that imposed thought-control on all the school teachers in New York State. He was hard on "Communists," but he and his PSC are now mighty soft on utilities robbing the
