DOBBS DEMANDS HANDS OFF EGYPT!

All the recent capitalist propaganda about Western imperialism and colonialism being a thing of the past, a phenomenon of the 19th Century, has gone down the drain with the invasion of Egypt. There is nothing in the last national independence. For eight century's long list of colonial wars and imperialist landgrabbing that is any cruder than the current British-French-Israeli war against Egypt.

The facts are plain: British and French imperialism in collusion with the Israeli government made plans for an tionists have been wounded or armed attack on Egypt. British and French forces were concentrated on the nearby island of Cyprus which Britain holds only by a reign of terror. Israel began a total military mobilization. When everything was ready the Israeli army diers and students councils. The invaded Egypt, heading toward Suez.

Israel quickly "accepted" the British-French ultimatum which would give it possession of the whole of Egypt's oil-rich Sinai peninsula. Egypt refused and appealed in vain to the United Nations. Thereupon Britain and France began bombing Egypt and KREMLIN SLANDER rushing troops to the area.

The brutal aggression against Egypt and the slaughter that the imperialists have begun is motivated by imperialism's desire not only to control the profitable Suez Canal but to smash the mounting national independence move- volt by the new leader of the ment of the Arab people which has been inspired by Hungarian government. On Oct. Egypt's nationalization of Suez.

Eisenhower's statement was "neutral" on the side of British-French imperialism. He went out of his way to declare that they had "the manifest right" to invade Egypt. As the New York Times (Nov. 1) reported: "The President's long discussion of the Middle East crisis appeared designed in part to explain, if not to justify, the attacks on Egypt by the three powers."

The fact is that American financial and armaments aid, as in the case of the French war against the Algerian people, alone makes possible the British-French war against Egypt. American workers should demand that U.S. imperialism immediately cease subsidizing the attack upon the Egyptian people and that the U.S. Sixth Fleet, with its 20,000 sailors and marines, be immediately brought home from the Mediterranean.

Calls for Withdrawal Of U.S. Troops, Fleet From the Middle East

NEW YORK, Nov. 1 - At tonight's wind-up campaign rally of the Socialist Workers Party in this city, Presidential candidate Farrell Dobbs denounced the

British - French - Israeli invasion? of Egypt as a bare-faced imperialist move to steal the Suez Canal from the Egyptian people and to smash the independence movement of the Arab people.

Dobbs called upon American workers to support Egypt's defense of its national rights. He demanded that Washington immediately withdraw the Sixth Fleet from its threatening position in the Mediterranean Sea and end the military and financial aid to French and British imperialism which makes the invasion of Egypt possible.

The SWP Presidential candidate declared: "The Israeli army's invasion of Egyptian soil is obviously part of a plot with the British and French imperialists to afford them an excuse, no matter how flimsy, for seizing the Suez canal. The hypocrisy of the imperialists stands revealed. In order to regain control of the profitable Suez Canal and to insure their grip on the oil fields of the Middle East the governments of France and Great Britain have not hesitated at the crudest military aggression, armed violence and the breaking of promises contained on that worthless scrap of paper Socialist Workers ticket in this known as the UN charter."

The right of national self-determination is, of course, a democratic and not a socialist principle. But genuinely democratic principles are supported and realized in our era only by the revoluitonary proletariat; it is for this very reason that they interlace with socialist tasks. Russian Revolution Anniversary

Thirty-nine years ago, on Nov. 7, the Russian Revolution, under the leadership of the Bolshevik party, brought victory to the workers, soldiers and peasants, and ended the rule of landlords, foreign imperialists and domestic capitalists.

Despite its subsequent Stalinist degeneration this mighty revolution still lives. Indeed, we are witnessing its regeneration now, with the Polish and Hungarian revolutions marking a milestone in the process. "Proclamation in several cities [of Hungary] of revolutionary councils of workers, students and soldiers deputies," writes Paul Wohl in the Oct. 29 Christian Science Monitor, "was a tribute to the original idea of the Russian revolution."

"The most indubitable feature of a revolution," wrote Leon Trotsky in the preface to his monumental work, The History of the Russian Revolution, "is the direct interference of the masses in historic events. . . [Revolution is] the forcible entrance of the masses into the realm of rulership over their own destiny."

The Russian masses entered this realm in 1917. They secured their rulership, when the workers' councils (Soviets) became the government and when capitalism and landlordism were abolished.

Despite emergency measures imposed by civil war, by foreign intervention and famine, the Soviet government from 1917 to 1922 was undoubtedly the most democratic the world has yet seen. But with the growth of Stalinism, the workers were driven from the "realm of rulership over their own destiny," by a privilege-seeking bureaucracy. The revolution

2. Resurgence in

In the countries of Eastern Europe, the bureaucratic tyranny is hated for what it is - foreign oppression. The ouster of Russian soldiers and the cancellation of Moscow's unjust economic exactions becomes the precondition for wiping out bureaucratic tyranny. Hence the slogan for national independence was raised as the rallying cry for the revolution in Poland and Hungary.

But which way shall the nation go after the power of the Kremlin oppressor is broken and the security police is put to rout? This can be settled only by the struggle of antagonistic class forces now emerging on the open arena.

Pro-capitalist restoration elements have appeared on the scene in Poland and Hungary. But they are in a distinct minority. Far stronger forces impel the national liberation revolution in Poland and Hungary on the socialist road.

(1) The working class played a leading role in the uprising during the course. of which it created workers' councils. (Soviets). The working class imparts a socialist direction to the struggle for national liberation. Indeed, this is the only way in which the national independence aspirations of an entire people can find any real solution.

It is true, that the peasants are abandoning the collective farms in Hungary, and this return to small-scale individual farming is a retreat from socialized property forms. But the peasantry is no more able in Hungary to chart a road for the nation than it has in any previous revolution in history. Decisive political power is lodged in the cities where the industrial proletariat predominates. The specific weight of the working class far outweighs that of the peasantry.

The bureaucracy had hopelessly alienated the peasant by compulsory collectivization. By placing itself at the head of the national liberation struggle, the working class can win the allegiance of the peasants. If they succeed in replacing the bureaucracy in power, the workers will be able to guide the peasantry to a socialist course through a wise policy of persuasion and economic benefits.

(2) The specific weight of the working class, once organized, is great in any country. In Hungary and Poland, the working class is now emerging as an organized force (through its councils) on the basis of the nationalized property relations, and this factor increases its strength many fold. The established property relations are those (in their foundations) proper to a socialist state. Social being determines social consciousness. The determination to retain the socialist property forms, i.e., the nationalized property, was confirmed by all perceptive capitalist observers, who agree that the insurgents consistently advocated democra-

Thus, the conviction that the East European risings will find a ready response from the Soviet working class reinforces I will support your struggle for the attractive power of the socialist goal for the Hungarian and Polish masses.

What these masses now lack is a revolutionary party of the kind the Russian workers had on Nov. 7, 1917. AN UNSOLVED QUESTION

This is the basic fact underlying the whole problem. It shows olution in the domain of national relations, the isolated proletarian Ukrainian question which is, in its very essence, international in character.

The Thermidorian reaction, crowned by the Bonapartist bureaucracy, has thrown the toiling sses far back in the national and wish to change it drastically. It is this fact that the revolutionary politician must, in con-

ROAD TO UNITY

The slogan of an independent Ukraine does not signify that the Ukraine will remain forever isolated, but only this, that she will again determine for herself and of her own free will the question of her interrelations with other sections of the Soviet Union and her western neighbors. . . .

A small item appeared in a national magazine this. month taking note of an important anniversary in the civil rights fight of the Negro people. Fourteen years ago,

on Oct. 27, 1942 in the port of o Los Angeles, a 10,000-ton Liberty ship called the Booker T. Washington was turned over to the command of a Negro, Captain Hugh Mulzac, the first of his race in modern times to become master of a United States ship. Also this month, in Washington, D. C. a hearing was held in the Federal District Court on an important case in the fight to defend civil liberties. The hearing involved a group of seamen who asked that the U.S. Coast Guard be required to prove its charge that by going to sea they would jeopardize the security of the United States. One of these seamen is Captain Hugh Mulzac, former skipper of the Booker T. Washington.

The first Negro in modern times to command a United States ship commands her no longer, and is forbidden to sail,

Negro Neighbors Look to Socialism

There are many indications today that a large number of people are thinking seriously of Socialism as an antidote for the present two party system.

This thinking has not yet crystalized, in many cases, in a well defined and coherent manner; but the question of Socialism is certainly uppermost in the thoughts of the American workers and Ne-

Especially is this true after the people have witnessed the betrayal of the civil rights issue by the conventions of both the Democrat and Republican parties.

My wife and I live in the Negro and working class district and until recently were on the Democratic "band wagon" trying to sell Stevenson and his cohorts to our fellow workers. We were getting considerable resistance to the Democratic Party program by many of the people in our community, plus a lot of apathy and indifference. After the Democrats' convention, which we witnessed on TV, we too became disgusted with them and decided we would wait and see what the Republicans came up with. After also witnessing the Republicans on TV, we were convinced that neither of the old parties had anything to offer us. Therefore, it became very easy for us to see the propriety of voting socialist

With the election coming closer, I am still faced with the problem of voting for a Congressional candidate of socialist sympathies.
