N.Y. Unions Urge Aid to Steel Strikers

AFL-CIO Council Calls Labor Day Parade to **Demonstrate Solidarity**

By Tom Kerry

Moved to action by the nation-wide employer offensive against the unions, the New York City Central Labor Council AFL-CIO for the first time in 20 years, has called upon its affiliates to turn out for a demonstration- conditions are not the real sub-

parade on Labor Day. The last Labor Day parade in 1939 highlighted the struggle for

the six-hour day. With the union movement on ing called to demonstrate labor's solidarity with the striking Steelworkers and labor's unity in the fight for survival against

employer-government attacks. In its call to action the Labor Council stressed the gravity of the issues confronting the unions in the following words:

"The labor movement in our country is in grave peril. Five hundred thousand steel workers are on strike, fighting not only for a raise in wages, but to preserve their union against monopolistic corporations determined clares that the parade can set an to break the union.

"In Congress, punitive measures against Labor are in the process of adoption on the extrade unions. All over the country the employers are on the offensive. Strikes are more and settle since wages and working

Louisville **Prosecutor** Suicide

LOUISVILLE, Aug. 4-State's Attorney A. Scott Hamilton, 48, has committed suicide. His death followed a series of professional and political reversals which began in 1954 with the "sedition" conviction of Carl Braden who, along with his wife Anne, had helped a Negro family buy a house in a previously all-white neighborhood. The conviction was set aside after Braden had quarter is a snare and delusion. served eight months.

"In almost every case the employers are trying to break the union or reduce it to imposence. If the organized labor movement the defensive, the parade is be- is to continue and make gains it must pass from the defensive to the offensive. . ."

> The July 31 New York Times estimates that, "150,000 unionists are expected to march up Fifth Avenue on Sept. 7 with bands, floats, flags and-banners."

Matthew Guinan, Council vice president and parade committee chairman, states: "We expect this to be the biggest parade New York has ever seen."

Hotel, weekly newspaper of the. Hotel workers of New York, deexample for the rest of the coun-

"The Labor Day parade," af-firms the editorial, "is designed cuse of assuring democracy in as an answer to this [employer] attack, as a show of resistance, of unity, of strength by the united labor movement of the bigmore frequent and harder to gest city in the country. An effective demonstration in New York," the paper stresses, "will echo throughout the land."

The steel workers are now aimed at the entire labor movement. Spokesmen for big business make no bones about the fact that the employers are lined up solidly behind the steel corporations. The Republican administration has been playing the employers' game from the beginning. The Democratic Congress, in the words of the New York Labor Council communication, is busily engaged concocting additional "punitive measures against labor."

Under the circumstances, the appeal for government interven- ed despite the lack of any subtion, under the illusion that jus- stantiated criticism of their tice can be expected from that work. The steel moguls are playing a sly game. Their ostensible opposition to intervention lends cred-

ECONOMIC AND PHILOSOPHICAL MANU-SCRIPTS OF 1844, by Karl Marx. Moscow: Foreign Languages Publishing House. 1959. 208 pages. (Available from Pioneer Publishers, 116 University Place, New York 3, N.Y.

This is the first complete translation into English of a work by the young Marx which occupies a highly important place in the evolution of his criticism of the capitalist system and the working out of his socialist ideas. Marx wrote these manuscripts primarily for his own clarification when he was 25 years old. They were not published during his lifetime. They have been edited by the Marx-Lenin Institute in Moscow and translated by Martin Milligan who has provided useful notes on the difficult Hegelian terminology

In this initial inquiry into the mysteries of capitalist economy, Marx uses two different sources as his points of departure. One is the writings of the classical political economists of England and France, who are copiously quoted and interpreted. The other is the contributions of the classical philosophers of Germany, notably Hegel, the idealist, and Feuerbach, the Humanistic materialist.

Marx proceeds from these two sources, he explains, because they represented organically related expressions in different fields of thought - one in philosophy, the other in economics - of the basic relations of production in bourgeois society. Both the economists and the philosophers, he points out, grasped and formulated in their ideas many of the significant aspects and decisive laws of capitalism. But their analyses and conclusions did not succeed in going beyond the narrow limitations of the bourgeois outlook on the

In these manuscripts Marx for the first time applied the dialectical method of thinking he derived from Hegel to the categories and conclusions of his predecessors in the study of economic phenomena.

The basic fact of bourgeois society he finds to be the "alienation of labor." This originates in the divorce of the laborers from the conditions and means of production which are owned by the capitalists and landlords. Thus both the process of production and the goods they produce, which pass into the market, confront the workers as alien and op-

The dispossessed, exploited, impoverished workers are degraded, dehumanized and denied the means of developing themselves as human beings.

"What, then, constitutes the alienation of labor?" Marx asks. "First, the fact that labor is external to the worker, i.e. it does not belong to his essential being; that, in his work, therefore, he does not affirm himself but denies himself, does not feel content but unhappy, does not develop freely his physical and mental energy but mortifies his body and ruins his mind. The worker therefore only feels himself to be himself outside his work, and in his work feels outside himself. He is at home when he is not working, and when he is working he is not at home. His labor is therefore not voluntary, but coerced; it is

Many an auto worker on the assembly line can testify to the truth of this observation. Marx traces out the operations and consequences of this alienation of labor in many of the relationships and departments of life under capitalism.

This manuscript represents a transitional stage in the intellectual and political development of Marx from the Hegelian idealism of his university years through the radical democratic Humanism of Fuerbach to revolutionary socialism. His approach to the problems of capitalist economy in these early manuscripts is still heavily influenced by Fuerbach's Humanism which was soon to be replaced by a fully fledged dialectical materialism. Marx often analyzes social relationships, not in terms of opposing classes and the development of their antagonistic interests, but in terms of a generalized human species which has to reintegrate the splits within itself.

The work is, nevertheless, invaluable both for the materials it provides for understanding the genesis of Marxism and for its valid insights into the inner workings of the capitalist system and its effects upon the human personality and the life of the working class.

The book includes as an appendix the "Outline of a Critique of Political Economy" written by Frederick Engels in 1843 before he met his lifetime collaborator. Marx learned a great deal from this essay which he regarded very highly. Among other things, Engels' article contains an attack upon the overpopulation theory of Malthus which has been revived in a new form in our time.

These two landmarks in the history of nineteenth century thought are well worth close study by everyone interested in the birth process of Marxism.

Leon Trotsky 'Psychoanalyzed'

Why did an important publishing house decide to do a major promotion job on Bernard Wolfe's novel, "The Great Prince Died," which purports to psychoanalyze Leon Trotsky? Does Wolfe create a valid psychological portrait of the late revolutionary leader?

In a critical review of Wolfe's novel, Joseph Hansen, Trotsky's secretary at the time he was murdered in Mexico in 1940, describes the real personality and views of the revolutionary exile.

A Welcome Thaw

The thaw in the cold war signalized by the Khrushchev-Eisenhower visits is a victory for the forces of peace over the warmongers. It demonstrates once again that the most effective program for world peace coincides with the promotion of the struggle against capitalism. That struggle has proved powerful enough to force the big business diplomats of the U.S. to back down in their war plans.

The partisans of both Eisenhower, the chief executive of the American profiteers, and of Khrushchev, the leader of the Soviet bureaucracy, are seeking to claim credit for their respective champions for this welcome change in the international atmosphere.

The change, however, was not brought about primarily by the heads of either government. It is an achievement of the oppressed peoples throughout the world, the result of their mighty and irrepressible efforts since the end of World War II to sweep aside capitalism and colonialism and drive forward to a better life.

The Yugoslavs who fought a national and civil war to liberate themselves from foreign domination and domestic capitalism; the Indians who broke loose from British rule and the Indonesians who

threw out their Dutch masters; the 650 million Chinese who got rid of Chiang and the shackles of imperialism and set out to build a modern society without landlords and profiteers; the workers and peasants of Iraq still in the flush of revolution; the freedom-fighters of Algeria; the black masses of Africa pressing toward self-rule; and, at the very doorstep of the dollar empire, the people of Cuba who overthrew the corporation-favored Dictator Batista and are moving forward along revolutionary lines; the peoples of the Soviet Union who, despite the curse of Stalinism, have accomplished miracles of construction; the popular resistance in America to another Korea or a nuclear war-these are the real powers, the formidable forces that have upset the imperialist plans for world conquest and created the conditions for a thaw in the

Further successes in the fight for peace do not depend upon the progress of any discussions or any deals the "summits" may make.

They hinge upon the continuation and development of revolutionary-minded movements seeking democracy, national independence, the abolition of capitalist rule and the benefits of a socialist world.

What About China, Mr. Nixon?

In his address on Moscow television at the close of his visit to the USSR, Vice President Nixon asked for an end to suspicion between the U.S. and the Soviet Union, despite "some very basic differences between us.'

The very lack of progress in the past, he stated, "is the strongest reason for us to redouble our own efforts to create better understanding between our two countries to remove fear, suspicion and misconceptions where they exist, and, thereby, to pave the way for discussions and eventual settlement by agreement of some of the basic conflicts between

For this purpose Nixon proposed such practical steps as exchanging students, visits by high officials, free exchange of information, ending the jamming of broadcasts.

These suggestions for improving communications and relations between the U.S. and the USSR are all very well. But why restrict them to the Soviet Union? Why not extend them to Asia, and especially to the People's Republic of China which has three times the population of the USSR?

Isn't it about time the Washington diplomats did something about regularizing relations with China?

For a hundred years American capitalists and their political agents took part in an international plunder of China. They helped carve up the country into areas ruled by rival warlords. They supported landlords and money lenders against the peasants and big merchants

and bankers against the workers. After World War II they gave Chiang Kai-shek the weekly pay envelope, to what's cooking on the profit more than \$2 billion to help him wage a get at their meaning? most destructive civil war against the Chinese people.

CP Fight Against Registration

The political resolution adopted by the recent national convention of the Socialist Workers Party stated that, despite some easing of national political reaction, "the capitalist government can be expected to keep the witch-hunt laws and to enforce them."

This observation was pointed up last week by the U.S. Appeals Court decision upholding the Subversive Activities Control Board's order forcing the Communist Party to register with the Attorney-General as an organization advancing the aims of "the world Communist move-

Unless this ruling is again reversed, the party will have to file reports of all its income and expenditures and give the names and addresses of its members.

Extremely heavy penalties are imposed under the law. The party and its officers are liable to \$10,000 fines and five years of imprisonment for failure to register. Individual members are subject to the same maximum penalties. The law also provides that registered members cannot hold government or defense jobs or obtain passports.

The SACB has been harrying the CP since 1951. It has three times ordered the party to register as an agent of a foreign power. Its edicts have twice been remanded for rehearing, once by the Supreme Court in 1957 and again by the Appeals Court in 1958.

The Supreme Court voided the order on the ground that it was "tainted" by the perjured testimony of three govern-ment stool pigeons. The Appeals Court sent the case back with the demand that

the government make available for crossexamination the reports made by Louis Budenz to the FBI.

One of the three Appeals Court judges stated that the SACB and the government had still not complied with then the company pays less in the court's previous rulings.

"the facts are beyond dispute that there fact that for the 500 top com- the game. is a Communist Party in Europe, based upon Marxism-Leninism, and in power in Soviet Russia; and that our present \$3,000. petitioner was for years a member of the Communist International, and its separation from that organization was not accompanied by a repudiation, either of objectives or of methods."

This ruling, coming on top of the Barenblatt decision, ought to introduce a cautionary note into the chorus of enthusiasm induced by the Eisenhower-Khrushchev visits. Many radicals share the uncritical belief that the trips portend the death of McCarthyism.

However, the machinery of the witchhunt remains intact and is being vengefully applied. The SACB has been set up as the key agency for political blacklisting and thought-control. No instrument of legislation in the whole course of U.S. history has dared go so far in punishing parties and people for their ideas and associations.

The CP has announced that it will appeal the decision to the Supreme Court. Its nine-year fight against the SACB order ought to be supported by every in- and independence from the increase of 58 cents an hour maneuver of 30,000 picked dividual and organization concerned with Democratic and Republican po- over the first quarter of this French troops against a reported maintaining America's freedoms, whatever their opinion of the CP and its can be expected from all sections could U.S. Steel stand on the this impression are official state-

| headquarters in Algeria that the | could not save his life and he

geria claim Idir's burns resulted from his falling asleep in bed while smoking. The Premier of Morocco has bluntly declared that the Algerian labor leader was assassinated by the French. Abdelhamid Mehri, Minister for North African Affairs in the rebel Algerian government, asserted that Idir had died as a result of "vindictive tortures" by

French paratroopers. There has been long and growing evidence of the systematic use of torture by French police and army authorities, especially the paratroopers, in Algeria. Authenticated cases of torture reveal the widespread use of all the bestial methods perfected by the Nazi Gestapo, including use of special electrical machines to

shock and burn the victims. The spread of such torture methods to Paris itself has become a major scandal in the recently revealed case of six Algerian students tortured by the police there.

Also protesting the death of Idir and demanding an official investigation into the circumstances of his death was J. H. Oldenbroeck, Secretary General of the International Confederation of Free Trade Unions.

Inflation in Chile

The Alessandri regime in Chile is being forced to control the prices of meat and potatoes tional diet, because of the terrible inflation. In the seven months since Alessandri's "business the peso, prices have risen another 27%. In working-class districts potatoes are being sold under the counter at black market prices; beef has risen 75%

Cuba's Class Bias Against Cadillacs

The Castro regime in Cuba has ruled that Cadillac buyers will really have to pay for the snob status that goes with the car. Whereas the tax on Fords, Chevrolets and Plymouths will be about \$36, purchasers of cars ferred to a military hospital for with a factory price over \$3,500 treatment of extensive burns will have to pay an import tax How much of a pay boost all is not going well. Reinforcing which the French said had been of \$5,000 the first year and an-"accidentally" incurred. Blood other \$2,500 the second year.

ST. LOUIS

LEWIS ON STEEL STRIKE - A group

of congressmen from the coal and steel districts were all set to make a joint appeal to Eisenhower to halt the steel strike. According to Washington columnist Robert S. Allen (July 29), this move had the blessing of Steelworkers head, David J. McDonald, Then one of the congressmen checked with John L. Lewis. The militant miners' leader exploded: "Why, this means Dave McDonald is so anxious to end the strike that he's willing to invoke the Taft-Hartley Law to do it. If that's so, then he has nothing to strike for. This thing would be a glaring admission of weakness. I'm going to talk to him right away and find out what it's all about." According to Allen, an hour later the peace through T-H move had been abandoned.

TEACHERS WITCH-HUNTED - The House Un-American Activities Committee has

subpoenaed 110 California teachers to appear before it in September; i.e., at the opening of school., A Teachers Defense Committee has been formed and has issued a pamphlet entitled "The Courage To Be Free," explaining the despicable role of the House Committee and the meaning of its heresy hunt against teachers. For copies of this pamphlet and to make contributions, address Florence Stoat, Chairman, Teachers Defense Committee, 617 North Larchmont Blvd., Los Angeles 4, Calif.

RACIST VIOLENCE IN BROOKLYN - A gang of 25 white youths from another neighborhood invaded an integrated street in the Bushwick section of Brooklyn, N.Y., and attacked a tenement building inhabited by Negroes. Rocks, bricks and gasoline were the weapons. Though the gasoline was thrown against wooden shingles and lit, the fire failed to do much damage. Five Negro youths were driven to the roof where they fought back. Police arrived and arrested four white boys and one of the Negroes.

DELAWARE BOMBING - Racists àgain bombed the home of Mr. and Mrs. George Rayfield, Negro parents, who had bought a house in Collins Park, a lily-white suburb of Wilmington, Police had tried to blame a bombing last April on "leaking gas." The high velocity explosion which virtually demolished the house on Aug. 7, however, is admitted to have been produced by high explosives. The Rayfields and their daughter were away for the weekend at the time of the outrage.

"HOW MUCH FOR CIGARETTES?" -The question most frequently asked of the electronic "brain" machine at the U.S. exhibition in Moscow is about the cost of cigarettes in the U.S. Those puzzled by the Russians' interest in tobacco should recall Europe

* * *

during the war and immediate post-war period. The outstanding fact then was a shortage of consumers' goods and cigarettes became a Companies as to Negotiations general medium of exchange, Even prices of with the United Steelworkers things to be exchanged directly or for the in- of America." flated currencies were first reckoned in terms of cigarettes.
