NAACP Parley Gives Boost to Sit-In Campaign

Southern Student Leaders Take Spotlight at Convention

ST. PAUL, June 26 — The fifty-first annual convention of the National Association for the Advancement of Colored People, which ended here today, gave unqualified endorse-

The Truth About Cuba -

Ninth in a series of articles.

It is difficult to find an article about the Cuban revolution or even a dispatch from Havana nowadays in the capitalist press that does not include wringing of the hands or frothing at the mouth over the "advance of communism" under the Castro government. In Cuba, on the other hand, most of the people you talk with indignantly dismiss the charge as slander.

Is all that smoke in the press about "communism" just a Wall Street smudge or is there, perhaps, some fire behind it? To answer this question, we had best begin by attempting to discover what is meant by "communism."

To some capitalists, and they happen to be among the most powerful, any public measure that puts limits to "free enterprise" signifies "communism." They consider it "communism," for instance, to prevent them from plundering our natural resources, or from raiding the public treasury. A lot of Wall Street's clamor about what is going on in Cuba refers to restrictions of this type.

Confused with Stalinism

Among many radicals and even socialists, the term "communism" refers to something quite different—it means the antidemocratic practices, including one-party slates, blood purges, frame-up trials and similar manifestations of dictatorial rule that have occurred in the Soviet Union under Stalin and his heirs.

This is also pretty much the popular view. When ordinary people today express fear of "communism," what they think of is the lack of democracy and civil liberties in the Soviet bloc countries. They say quite rightly, "We don't want concentration camps in America or the cult of an individual like Stalin." Thus they find it depressing to hear about Cuba going "communist." Why would the Cubans want a regime like Stalin's?

Among Marxists, "communism" has still other meanings. First of all, it is the name of the society toward which all countries are clearly evolving, a society of complete freedom based on a co-operative, planned world economy that has achieved unlimited abundance and thereby brought the painful class differences, the wars and depressions and hatreds of our time to an end. Secondly, it is the name of the international political movement organized under the leadership of Lenin and Trotsky in 1919 to fight for and hasten the inauguration of this abundant communist society of the future.

In the early twenties and even into the thirties this was the splendid meaning of the word "communism" and that was the way most people thought of it, even opponents — when they considered it honestly.

Clearly enough, the Stalinist displacement of Leninism brought "communism" into evil repute, converting the word in the popular mind into the opposite of its real meaning and offering reactionaries an invaluable propaganda advantage. But all this is another story. For our present purpose we need consider only two possibilities that people think of when they ask about Cuba going "communist": (1) inroads on capitalist property relations; (2) a shift in government that would give power to Stalinism. The two possibilities are not at all synonymous or dependent on each other.

powers. Class collaboration, scored since the time of Marx Dobbs, presidential candidate of and Engels as betrayal of the interests of the working class, the Socialist Workers party, was given new packaging and labelled the "popular front." | gave the following talk today at

Stalin began to make this turn about the time Roosevelt recognized the Soviet Union in 1933. One of the services which Stalin offered Roosevelt in the negotiations leading believes that the rich have run up to recognition was help in stemming revolutionary this country - and run it into unrest in Cuba. That was how the Militant analyzed it as the ground — long enough. The can be seen from an editorial printed November 25, 1933:

"Cuba may very well turn out to be the Achilles' heel of the Wall Street monster. The contradictions between its domination by U.S. imperialism and the life interests of the masses are at the explosive point there. For many weeks now the struggle has been blazing into a conflagration which the whole world could see. The workers on their own initiative have been taking possession of American properties and have even, in some instances, proceeded to the formation of local Soviets.

"The island is small, but the uprising of its people has an enormous strategical importance and moral power. The Wall Street bandits justly regard it with apprehension as the peoples of Latin America and the conscious workers in the U.S. look to it with sympathy and hope. The U.S. bandits stand ready to crush the revolt with the brutal force of armed intervention. The workers and the peoples ought to be shown the way to unify all their efforts with those of the Cuban workers for the frustration of these designs. . . .

"In the present instance, filled with such great potentialities, the Comintern of Stalin remains as silent as the grave. And as for Stalin himself, the 'best disciple of Lenin,' his mouth, as the saying goes, might be filled with water he cannot utter a word of advice, encouragement or hope on the grandiose events in Cuba.

"Is this 'nonintervention' in the Cuban revolution a deliberate policy? Was an express promise to keep 'Hands off Cuba' a part of the Washington agreement for recognition? If not, please explain the precise meaning of the following clause in Litvinoff's letter:

" '(4) Not to permit the formation or residence on its territory of any organization or group - and to prevent the activity on its territory of any organization or group - which has as an aim the overthrow of, or bringing about by force of a change in, the political or social order of the whole or any part of the United States, its territories or possessions.'

This treacherous pledge, which brings the blush of shame to every revolutionist, does not refer to some territory on the moon. It refers, directly and concretely, and at the present moment, to Cuba.

"In our opinion, and we say it with blunt and brutal frankness, it was explicitly so discussed and understood in the negotiations. . . ."

The "Popular Front" in Action

Batista's rule was so bloody, as the Cuban dictator aped some of the practices of Mussolini and Hitler, that it was not easy for the leaders of the Communist party to overcome the revolutionary sentiments of the rank and file and get them to support the dictatorship. But by 1938, the party was following Stalin's "popular front" line as assiduously as its American counterpart which was now, under Browder's guidance, helping to spread the cult of "FDR." In August of 1938 the Plenum of the Central Committee of the Cuban Communist party openly resolved "to take a the abandonment of any refermore positive stand towards Colonel Batista since he has ence to socialism by the German ceased to be the center of reaction and now professes Social Democratic party and the democracy.'

Batista reciprocated by immediately legalizing the Communist party. Blas Roca, general secretary of the growing strength of the rightparty, explained the Cuban "popular front" on a visit to wing reaction over the continent New York: "It must be remembered that Colonel Batista of Europe. himself comes of the people. For this we need control. Grau's Minister of Labor, Carlos Prio Socarras, began a government witch-hunt of "communists" in 1947, the same year that Truman issued his infamous decree requiring a "loyalty" oath of government employees. Prio sought to oust trade-union leaders under Communist party influence and replace them with officials selected from his own Autentico party. In 1948 he ran for the presidency and won on an "anti-Communist" plank. In office he continued the witch-hunt in imitation of Truman.

When Batista seized power again in 1952, he kept up the Cuban emulation of McCarthyism, breaking off diplomatic relations with the Soviet Union on April 3, 1952, and outlawing the Communist party on October 31, 1953. However, the Communist party never suffered, even in the industrialization in that country, worst final years of Batista's murderous rule, as did the and the extension of the colonial July 26 Movement and similar revolutionary-minded groups. Colonial Revolution

The colonial revolution, which has now spread from Asia to the continent of Africa, upset the equilibrium of imperialism to the extent that permanent stability is well-nigh impossible. But great movements led by revolutionary Marxist parties in the advanced imperialist countries.

To faint-hearts whose opinions are formed on the basis of superficial impressions, it appeared that the construction of such parties was something to be ruled out for the next period. They looked for political gimmicks to answer difficult problems.

It was suggested that the de-Stalinization process in the Soviet Union, the rapid tempo of revolution were a sufficiently ensure the restoration of democracy in the Soviet Union. From might lead the working class to power and thus obviate the need for the construction of revoluendangered by these revisionist tries of imperialism, where the ionary parties was hardest.

Two Great Events

importance for the future of the tries have taken place.

Gerry Healy is national Labor League, an organization of Marxists in the British Labor party. The article printed here first appeared in the June 25 issue of The Newsletter, weekly publication of the SLL. The reference to Transport House in Healy's article is to the Labor party leadershp, whose national headquarters are at Transport House, London.

First, the great Japanese demonstrations where tens of tions from the Socialist Labor ranks of the Kishi police and created a situation where the arch-representative of imperialism, President Eisenhower, was unable to visit Japan.

It would be quite inaccurate to speak of the struggles in Japan as an extension of the colonial revolution. Japan is an advanced industrial country with a modern proletariat. It is the home of a ruthless and brutal imperialism. These great demonstrations have, therefore, much more specific weight than the extension of the colonial revolution, important though that is. What is being posed over the next period in Japan is a social revolution.

This is the beginning of a great movement in the imperialst countries which will provide irm foundations on which the Marxist parties of the future will be built.

Crisis in Labor Party

The second event is the crisis n the British Labor party. In ts editorial of Monday, June 20, the Times described this crisis

"The present disarray in the Labor party is tragic. It is not so much a struggle for powerthe lines of fission criss-cross in the most bewildering manneras a desperate flurry by a great party threatening fragmentation. Were this to lead either to Conservative rule for a generation or to the ultimate victory at the polls of a newly oriented Opposition, our society would make a decided shift. The possibilities of a satisfactory compromise seem remote indeed. A new stage in the long process of revolutionary change opened up by the election of the Labor government in 1945 is now on the agenda.

The Youth

What forces will supply the recruits for the new Marxist leaderships in the imperialist countries? In our opinion these will undoubtedly be drawn from the youth in industry and the universities. Was it not the tens of thousands of student youth who pioneered the Aldermaston narches in the fight against the I-bomb? Who made a powerful contribution to the creation of great anti-H-bomb movement?

Is it not also a fact that these youth, who started out from universities and colleges are now more and more being joined by the big battalions of labor, the trade unions? Is it not the great change which has sparked off the present crisis in the Labor party and prompted the thoughtful editorial in the Times?

Compare these events with the role of student youth in the recent Japanese demonstrations. The News Chronicle correspondent, Bruce Rothwell, writing in that newspaper on June 20, described an interview he had with two Japanese student leaders, Onda and Kurodi. They both "bitterly denied Premier Kishi's charge that they and 30 other committee members leading the Zengakuren are Communists...

"The Zengakuren, covering 130 universities and schools and nearly a million students, was broken up by pre-war military officers. Banned during the war it was revived by MacArthur in 1948 as a contribution to teaching Japan democracy.

"The Communists quickly infiltrated it. But last Novemberwhen Kishi tried to legislate wide police powers and students broke into the Diet in protestthe Communist party officially denounced them.

It is the student youth of Britain who organized themselves under the slogan of unilateral abandonment of the H-bomb, who pioneered the way in the mobilization of the trade unions behind this demand.

> It is the youth of Japan, also backed by the trade unions and workers' organizations, who are paving the way for a resurgence of Marxism.

This does not mean that Stalinists have not participated in these movements, but unlike pre-war Europe, the Stalinists have been unable to utilize these movements for their own ends. In Britain the influence of the Socialist Labor League is at present enjoying a modest growth in the universities. A resurgence of Labor's Young Socialists and the great apprentices' struggle, taken in conjunction with the anti-H-bomb demonstrations, are drawing many thousands of youth in the direction of Marxism.

That is where the great confidence of the Socialist Labor League comes from. We are not unduly bothered about the desertions to the extreme Left or the extreme Right. Our task is to look reality straight in the face. The new crisis in the British Labor party will have decisive repercussions on the evolution of the struggle against imperialism in the days that lie ahead. It is a great omen for the construction of the Marxist parties of the future.

Jim Crow and the Conventions

The Negro leaders, A. Philip Randolph and Dr. Martin Luther King Jr., have called for marches on the national conventions of both major parties this month to force them to insert forthright declarations against racial segregation and discrimination in their platforms. This proposed action is sparked by the flaming resentment of the Negro people against the, way these parties have been frustrating their demands for justice and equality.

As Randolph and King point out: "School integration has virtually ground to a halt. Six years after the Supreme Court decision, only 6 per cent of Southern Negro students attend integrated classes. Congressmen of both parties this year conspired to deprive the Negro of his right to vote, for the 1960 Civil Rights Bill obstructs the voting process by placing overwhelming burdens of prosecution on the Negro rather than on those who oppress him. Both parties must be held responsible for this sellout, not only of the Negro people, but of American democracy as a

In view of this record, what sense is there in asking the Negro people once again to turn toward these upholders of the Jim Crow system for an end to racism or for the repudiation of the white supremacist elements in their leadership?

Suppose - and this is in itself unlikely — that by such means the opponents of discrimination do succeed in pressuring the Democratic convention at Los Angeles into adopting a strong plank on the civil rights question. How much would this really mean in furthering the struggle against racism?

To collect enough votes to insure victory for their candidates, the Democratic and Republican politicians are capable of making the most sweeping and seductive promises in their platforms and campaign speeches. These declarations are conveniently shelved once they get into office.

Liberal Democrats specialize in this runaround. In 1948, for example, Truman Bucharest. The congress was atinsisted on a strong civil rights plank in tended by top CP and governthe platform and even broke with some diehard Southern Bourbons who didn't see the need for this kind of deception. After the Soviet and Chinese Combeing returned to the White House, he did nothing to implement that promise. Last spring when the Southern students set out to do away with segregation at lunch counters, the ex-President condemned them as "Communists" like any other Mc-Carthyite-minded defender of Jim Crow.

The Democrats have given the same raw deal to the labor movement. In 1948 and 1952 they promised to work for repeal of the Taft-Hartley Act. Instead, their leaders helped draft and pass the still more vicious Kennedy-Landrum-Griffin Bill in 1958.

Such was the payoff the Negro people and labor got from the capitalist parties.

"How do we move against the bipartisan chicanery that reigns in the halls of Congress?" ask Randolph and King in their

Well-Heeled Delegates

The five thousand delegates and alternates who will choose the Democratic and Republican candidates at Los Angeles and Chicago this year will pay heavily for the privilege. They do not come from the poor sections of the population.

According to a Brooking Institute study, the average income of the delegates to the 1948 Democratic convention was \$10,150. That's equivalent to about \$15,000 in 1960 depreciated dollars. More than 9 per cent of the GOP delegates in 1948 had a yearly income in 1960 dollars of \$75,000 or more. Four per cent of the Democrats were in the same high brackets.

ranged from \$200 to \$500. But that was only a small part of the overhead. Wouldbe Republican delegates from Indiana in 1952 had to pay a \$500 assessment each. Iowa Democrats were taxed \$150 each for

\$100-a-plate dinners and cough up other contributions. They have to pay state filing fees of \$50 or more. It is not uncommon for friends of presidential hopefuls to finance some delegates' trips. Wagner Hands Rockwell an Issue

George Lincoln Rockwell, the American Nazi who advocates Hitler's gaschamber way of ending "the menace" of "Jews and Negroes," announced June 27 that he is calling off his plans to stage a rally in New York's Union Square on July 4. At the same time he is pressing the New York Civil Liberties Union to protect his right to speak.

"The New York Civil Liberties Union hates my guts," he is quoted as saying, "but they have a terrific stake in protecting my right to speak. They can't afford to protect the rights of Communists and Jews, and look the other way while my rights are being denied."

Mayor Wagner is to be blamed for handing this grievance to Hitler's American admirer. At a court hearing June 22 over an injunction to bar city officials from issuing a permit for Rockwell's rally, a crowd expressed its opposition to Rockwell's provocative statements in such vigorous fashion that the police intervened and rushed the Nazi out of town. Utilizing this incident as a pretext, Wagner denied the permit for the rally.

The groups that first took notice of Rockwell's plan to stage a Nazi rally in Union Square, did not question his right to free speech. The Committee to Protest Racial Defamation, for instance, did not seek to stop Rockwell from speaking. The New York Local of the Socialist Workers party likewise did not question his right to address a crowd in Union Square. What these antifascist forces proposed was that everyone interested in the issue should come down to Union Square on July 4 and exercise their right of free speech, too, by expressing their opinion of Rockwell's racist views.

Conrad J. Lynn, representing the Committee to Protest Racial Defamation, put it like this in a letter to the Department of Parks in which he pressed for a permit for a public meeting in Union Square on July 4 to answer the Nazis: "We believe that evil thought must be allowed to express itself as long as truth is free to combat it."

The New York Post, after first publicizing the Nazi rally, closed its columns to further news until the court incident of war as long as imperialism exclude the Russian and Chinese ers' democracy. There are many occurred. Then, in an editorial, it advocated a policy of silence toward Nazis like Rockwell. The logic of this view is ganized by the capitalist class conform to the tradition of stage of the revolutions in the that opponents of would-be American Hitlers should not exercise their own right of free speech in the form of rallies-or even discussion in the press!

The latest moves are to illegalize the American Nazis and put them on the socalled "subversive" list. New York State ation of 1957, to which the So-Supreme Court Justice Louis L. Friedman viet and Chinese CP leaders signed a temporary injunction June 28 both subscribed, did not prevent restraining the party and its commander the struggle between Moscow "from engaging in any subversive political activities in New York State," according that the Bucharest statement to the press. Are Moscow and Peking Now in Accord? By Murry Weiss

(Second article in a series.)

The latest occasion for the continuing debate between Moscow and Peking on what attitude to take towards the imperialist West and on the meanwas provided by the third Congress of the Rumanian Communist party held June 20-25 in ment officials from East European and Asian Soviet bloc countries and by delegates from munist parties.

In a speech June 22 Khrushchev submitted the criticisms of the Kremlin's foreign policy, voiced by the Chinese CP leaders over the past two years, to coarse abuse, ridicule, denunciation and gross distortion. One after another-all the delegates, except the Chinese, took the floor to support Khrushchev and repeat after him that Lenin's analysis of imperialism and war was outmoded and that it is childish to think that nothing has happened in the world since Lenin died.

It was obvious that Khrushchev was speaking with the confidence that his power is firmly entrenched in the Kremlin - at least for the time being.

The delegate of the Chinese CP, Peng Chen, who is the Mayor of Peking, also spoke at sion to the hopeful speculations in the world capitalist press concerning a break in the alliance of the Soviet Union and the Peoening the united front against imperialism and particularly the need for unity of the "international communist movement." He declared that, "Agression by any one of the brother countries would be agression against reiterated the main points of the Chinese CP's differences with Khrushchev's conduct of

in the struggle against imperial-

The term "bureaucracy" is not an epithet. It is employed by Marxists to describe a social formation which arises and gains domination over the labor movement in capitalist countries and which, under certain historical circumstances, fastens its rule on workers' states.

Clearly, labor bureaucracies can be as different from one another as the specific historical developments and social pressures that produced them. Within a single bureaucratic formation, too, there are different strata and antagonistic groupings often reflecting contradic-

Differ in Features

We shall in the course of these articles return to this subject. For the present it is sufficient to note that the debate between Moscow and Peking has disclosed not only essential similarities between the two bureaucratic formations but what is even more important, their considerably different features.

The most important difference at this point is not in the basic outlooks of Peking and Moscow. Both are bound by the Stalinist dogma of "socialism in one country," which so clearly expresses the innermost nature of their bureaucratic regimes; by their consequent rejection of revoluionary struggles in the capitalst orbit as the main, strategic means for defeating the imperialist war drive; and, yes, by their common acceptance of the Stalinist concept of "peaceful coexistence.

Khrushchev's claim, echoed by uninformed capitalist commentators, that those who hold the position of the Chinese CP eaders are opposed to "peace-'ul coexistence," is completely false. The Chinese themselves repeatedly invoked the 1957 Moscow declaration, with its reaffirmation of "peaceful coexistence," throughout the debate. During the stage of the dispute that marked the occasion of Lenin's ninetieth birth- mation will be published. A day in April, practically every article written in the Chinese Communist party press quoted extensively from the Moscow

What the Chinese leaders have agree with "peaceful coexistence," but we can't agree with the sacrifice of the Chinese revolution; we can't agree with bartering China's interests across the table in the course of the Kremlin's negotiations with Western imperialism; we can't agree with the idea that what is good for Moscow is good for the whole Soviet orbit including us; and we don't think China's needs

Actually, this is a contradicory position. Peaceful coexistence as practised by Stalin and Khrushchev following him has meant precisely to sacrifice revolutions for the sake of an agreement with imperialism to

reeze the status quo. It is beside the point in this context to argue that to "freeze" revolutions is to remove the decisive obstacles to war and that, moreover the Kremlin isn't always able to put revolutions in

The Socialist Workers party upports the proposed rule, Himmel continued, but warns that it is not adequate and must be accompanied by legislation against segregation in housing and in all other fields.

Resulting from an intense organizing drive, launched last year by the Agricultural Workers Organizing Committee and supported by the AFL-CIO, the strike began last month in the vast cherry orchards surrounding the city of Stockton. Since then it has been spreading

Such has been the unity of the State Department of Employment was forced to refuse the growers the use of its office for recruiting Mexican nationals as scabs.

Strikebreakers, both Mexican nationals and native born, have been herded into the area in an attempt to smash the fast-growng union which now claims ,000 members among the cherry pickers alone. However, many scab deserted the growers when they learned of the strike. For the most part the fruit has remained unpicked.

"For years, California's corporation farmers have used imoorted Mexican labor to depress the wages of American agricultural workers," commented the Oakland-East Bay AFL-CIO Labor Journal June 24. Now they want to use them "as strike breakers."

The AFL and CIO, however, have never worked out a program for uniting the Mexicannational and State-side workers in the struggle against the growers, although this has become an issue in every strike: in the South and Southwest.

Some of the growers have settled on the unions' terms, at least temporarily, but most of them have been busy in another direction. At their instigation a State Senate Fact Finding Committee on Labor and Welfare has been established to investigate the strikes. The Oakland AFL-CIO Central Labor Council on June 17 described the committee as a "vehicle to advance . . . anti-labor ourposes.

Testifying before this commitee, Thomas L. Pitts, president of the State Federation of Labor, said: "What is transpiring in the harvesting of crops is much less a reflection of union organizaional activity than it is an irepressible uprising by workers gainst the miserable conditions hat have been so long in the making."

Farm workers "should get a decent wage, just like everybody else," the East Bay Labor Journal declared. "For too many fear of the youth. But have they eradicated any of the social causes of juvenile delinquency: slums, crowded schools, inadequate food and clothing, absence of recreational facilities, lack of jobs? Have they made it possible for the present generation - the "war babies" - to find any of the good things of life? Is there any prospect for this huge army — millions on a national scale - to get adequate education?

New York City schools are so crowded today that most children go only half a day. Educational standards have dropped as a result of both the overcrowding and the inadequate salaries paid to teachers. Only exceptionally bright children can qualify for colleges. Colleges are also overcrowded, or they would be if the present situation did not allow them to "flabbergasted" by automation Fourth St. Questions, discussion, be very selective in admitting

And even one visitor said.

What home life can a New York City adolescent have in one or two rooms which is 'home" for the entire family, no matter how large? You have only to live in this city a short while to recognize that most young people live on the streets. A boy and girl holding hands in a doorway; kids playing cards on a stoop; roving gangs of teenagers hunting trouble; in the heat of summer entire families sitting on kitchen chairs on the sidewalk, late at night, because it's too hot to sleep indoors.

What then is the answer to the problems of this generation of young people - and this generation's parents and grand parents? An economy that is not

based on profit - socialism is the only answer for them. Take the profit out of renting slum dwellings at middle-income rentals; tear down the rat-ridden holes which now pass for human dwellings and replace them with modern. clean apartments large enough for human beings to live in: build more and more school buildings and train teachers to TEACH and not to act as custodians of the young people they now live in fear of; give youth a chance by eliminating war and fear of war.

New York City's administraion, and its citizenry, live in itself in war; but an even greater | ness is different. As a result, fear of being left behind to grub they were born, raising unwanted children to carry on this hopelessness. Franklin Delano Roosevelt, a

very famous demagogue, told the American people in his first inaugural address that "The only thing to fear is fear itself." Under capitalism youth is

condemned to endless fear. Let us build a new society and give our children something to live for, something to hope for. Then and only then will we conquer this problem of "juvenile delinquency." A delinquent social system cannot do the job.

WHY THAT NAVAL BASE IS NEEDED-A Treasury Department investigation has revealed that "hundreds of thousands of dollars' in federal liquor taxes have been evaded by an organized ring of 1,000 officers engaged in rumrunning from the Navy's base at Guantanamo, Cuba. The officers use military planes to fly loads of undeclared liquor into the U.S.

A PENNY FOR PREVENTION - For every dollar that disease and disability costs the American people, the federal government spends slightly more than a penny for prevention. According to the National Health Education Committee, disease and disability costs average \$194.44 annually for each man, woman and child. Research appropriations average \$2.22 per person. The committee also reported there are 17,000,000 people in the country suffering from mental and emotional disorders, 15,800,000 afflicted with heart and circulation diseases, and 11,000,000 suffering with arthritic and rheumatic diseases.

PRINCIPLES AS WELL AS TALENT-British star Alec Guinness has turned down a \$1.4 million offer to do a television series for a beer company here. "I would rather die of poverty in the gutter," he said. "It was advertising, and I would have despised myself," he explained.

KEEP 'EM GUESSING - Dr. Herbert Ratner, a leading Catholic physician, says that church premarital counsellors should segregate men and women during discussions. He' told the National Catholic Family Life Convention in San Antonio that doing so would help "to preserve the mystery and excitement of sex for each partner." Msgr. Irving DeBlanc told the gathering that recent surveys have shown that Catholic couples use contraceptives "in about the same measure" as their Protestant and Jew-

DIGNITY A CRIME? - A Memphis cop arrested a nineteen-year-old Negro for refusing to pick a quarter off the street that the cop had tossed him in payment for a soft drink. The cop said the youth was "arrogant and smart' for explaining to him that "he didn't pick up money pitched at him by anyone." The case was dismissed.

HENDERSON FREEDOM FIGHTERS -With the Henderson, N.C., textile strike now in its eighteenth month, more than 200 have been arrested. Some fifty have already served time in jail, with twelve currently in state prison. Others are awaiting the outcome of appeals. Scores have been given suspended sentences which forbid them to join the picket line. The Joint Strike Committee of the Textile Workers Union of America reports that the victims go off to jail singing, "while those left behind stand solid, determined and angry."

Rita had oriented towards socialism since her college days at Smith College and the University of Illinois, and she and the Socialist Workers party finally found each other in 1957. In the SWP, she also

found her husband, Geoffrey. At the time of her death, Rita, at the request of William F. Warde, was working on an article for the International Socialist Review. This article was to be a factual account of the ideological con-

flicts in the educational field. In her correspondence with Warde about the article, Rita indicated the road that had brought her to socialism.

"I am looking for tools ofthought for working on necessary tasks in reality. When a set of tools accomplishes as much in my hands as socialist thought has in helping me to deal with professional prob-1ems which I found previously insoluble, then I am far more confident that the ideology has been 'proved' . .

"What is exciting to me in your writings and in your recent letter is the cross-validation which we have in effect achieved: I started with no particular interest in a socialist solution to the pressing educational problems . . . and eventually had to develop socialist methods. ('Learning through struggle' doesn't always mean getting hit by a cop while picketing.)

"You started with a commitment to socialist thought arrived at through different fields of experience, and when you worked on problems of educational philosophy you developed ideas similar to those which I and others before me had developed within the education profession."
