# PROVING HARD TO ELECT A PROBABLY

## State's Attorney's Kidnaping Stunt Bows Up

### A DREAM OF STATE'S ATTORNEY CROWE

## BEALIS FREED WHEN CROWE PLOT FAILS

### Witnesses Spoiled Frame-Up Against Strike Official

The state's attorney's office admitted yesterday that it had no evidence on which to either hold or prefer a charge against Morris Bealis, manager of the Chicago Joint Board of the International Ladies Garment Workers' Union, in connection with the alleged shooting at the home of Nicholas Kovler, garment manufacturer, last Saturday.

When Judge Frederick De Young ordered the state's attorney's men to bring Bealis into court on a writ of habeas corpus, State's Attorney Robert E. Crowe's dicks admitted they could not connect him in any way with the shooting and the judge ordered his release.

Witnesses Related to Frame Bealis. The detectives said that they had arrested Bealis in order to question him and that they were unable to get any evidence from him. They said they also wanted to have him looked over by persons who were certain to see the shooting. Two persons who came to identify Bealis were certain he was not the man they saw.

Bealis was arrested at 11:30 a. m. in his office on West Van Buren St. and taken to the state's attorney's office for questioning. When the lawyers for Bealis went to Judge De Young to ask for a writ, the state's attorney's men agreed to let him go within an hour. They failed to keep their promise and the matter went to Judge Voight and demanded a habeas corpus writ. Voight granted the writ retroactively yesterday at 9:00 a. m., and when the hearing was held Bealis was ordered released.

Bealis was held in East Chicago Ave. police station from Monday evening till Tuesday morning.

Bealis was held in East Chicago Ave. police station from Monday evening till Tuesday morning.

## Prosecution Pleads For More Time In Ruthenberg's Trial

ST. JOSEPH, Mich., April 1.—Charles E. White, Justice of the Court of Appeals, today granted further extension of time in the case of C. L. Ruthenberg, convicted in connection with the Bridgman convention for "assembling with the Communist Party."

The defense attorneys have had papers on appeal ready for six months but the prosecution has not yet had from month to month on the ground that other cases had interfered with their examination of the record of the Ruthenberg case submitted by the defense.

The present indications are that the court of appeals will not get the case before next fall.

C. L. Ruthenberg, when interviewed by the DAILY WORKER on the status of the case remarked "Daugherty who initiated the Red Raid in Bridgman, has lost his job and I am not in prison yet."

The present indications are that the court of appeals will not get the case before next fall.

## SMALL BACKERS FACE EXPULSION FROM F-L PARTY

### Fitzpatrick Is Placed in Unhappy Position

Contradictory statements, charges and counter-charges are flying around in the utmost confusion as the result of the endorsement of Farmer Small for the April 8th primaries, by the leading trade union officials and some of the executive committee of the Farmer-Labor Party. Those implicated in the inconsistent situation are trying to spin excuses to be used in the forthcoming campaign committee. All agreed, however, that the predicament of John Fitzpatrick, who violated the constitution of the Farmer-Labor Party by endorsing Small, is far from a happy one.

May Mean Expulsion. Two members of the executive board of the Farmer-Labor Party, Cook County branch, have allowed themselves to be used in the endorsement by the Len Small for Governor Farmer's Campaign Committee.

They are the executive board of a party whose constitution prohibits affiliation with any other capitalist politician or party, setting up a committee with other "labor leaders," which is in charge of the Len Small for Governor Wage Earners League.

Arthur Olsen, also a member of the executive board, acting as a committee of the executive board of the Farmer-Labor Party, admitted, when interviewed by the DAILY WORKER, that this situation will have to be thrashed out at the next executive board meeting, and may lead to the expulsion of some of those acting for Small.

The DAILY WORKER goes to press today with the news that the executive board of the Farmer-Labor Party can endorse Small or any other candidate. "Our constitution expressly states that no member of the executive board shall affiliate with another party. Certainly those endorsing Small are inconsistent with the Farmer-Labor Party constitution."

By common consent, Thomas McCabe, secretary of the Cook County Farmer-Labor Party, seems to have been made the goat in the frantic efforts to save the face of John Fitzpatrick. E. Noelske, and the others who have allowed their names to be used by Small in the primary campaign.

Despite the fact that John Fitzpatrick admitted to the DAILY WORKER that a newspaper clipping intimating as a signer of the endorsement Small, was correct, those who are trying to save the situation declare Fitzpatrick has not violated the ruling of the Farmer-Labor Party against participating in the primary.

But it was definitely stated at the Small campaign headquarters, 30 North Wells street, by Ike Vols, secretary of the campaign, that "John Fitzpatrick, Noelske and the other labor leaders of the city have come out for the Farmer-Labor Party."

Libert Ernest, of the Rodriguez-Ernst, Illinois Farmer-Labor Party, secretary of the Cook County Farmer-Labor Party, his efforts to impugn the motives of all the leading trade unionists who have warned the people against the possible nomination of Eastington in the Republican primaries and who are therefore

## MANY ELECTIONS HELD THRUOUT U. S. YESTERDAY

### Hot Municipal Fight In Milwaukee

Several elections took place throught the country yesterday. The contest that held most interest for the workers is that which took place in Milwaukee between the present Mayor Daniel W. Hoan, Socialist, and David S. Ross, so-called nonpartisan, but actually candidate of the open shop and big business elements.

Fight On In Milwaukee. While the Workers Party of Milwaukee severely criticized the Socialists there for their aim of compromise and omission against the working class, it at the same time supports Hoan against the out and out anti-labor reactionary Ross. The DAILY WORKER goes to press today early to be in a position to give the results but will publish for our readers' information the centers which the main political battles are being waged.

The State of Wisconsin is balloting today in the primary elections with all indications pointing to an overwhelming victory for La Follette over Coolidge in the Republican contest.

Civil War In Cicero. A small civil war raged in Cicero, Illinois, over the town elections, between the democrats and republicans. The democrats are running on a free speech platform which the present office holders have treated with contempt. The radical elements among the foreign population, according to reports, are for the republicans who have unlimbered their heavy artillery and are trying to shoot their way to victory at the polls. It is also reported that the Poles, the majority of whom are our servative, are lined up behind the republicans while the Lithuanians are the democrats.

Last night gunmen climaxed a day of beatings by attacking William K. Pflanz, democratic candidate for town clerk; his wife and Clem Kopstein, a printer. Other destructions were committed. The gangsters are making a systematic patrol of the voting precincts in four automobiles. Carl M. Garver was re-elected mayor of Des Moines, Iowa, by a margin of 2,000 over his opponent, both republicans.

Firey crosses were lit up throught the city of Council Bluffs, Iowa, (Continued on page 2)

## DAUGHERTY SNIPEL MILLER BROTHERS IN \$500,000 LAND FRAUD

### (Special to The Daily Worker)

WASHINGTON, D. C., April 1.—Charges that former Attorney General Daugherty has been in the prosecution of a conspiracy case were made to the senate investigating committee today by H. M. Peck of Oklahoma City. Peck, who was formerly a United States District Attorney in Oklahoma, said that he had been charged with failure to prosecute the Miller Brothers, owners of the famous "Oil Well," for conspiracy to defraud the government of 10,000 acres of public lands.

Altogether telegraphed to Daugherty that Peck had been charged with failure to prosecute the Miller Brothers had been continued from the investigation of Daugherty. Peck said that both Peck and Joe Miller pleaded guilty to the fraud and paid a fine amounting to \$7,000.

Peck said the plan of guilty to obtaining the 10,000 acres of public lands by fraud, Peck said no Indian had been killed or injured by them. The land, he said, was valued at \$50 an acre.

# WORKERS PARTY URGES ALDERMEN TO PROBE POLICE BRUTALITIES IN STRIKE ARE CITED IN STATEMENT.

Calling attention to the aldermanic investigation of police brutality during the great garment strike of 1912 the district organization of the Workers Party asked the 50 aldermen now sitting in the city council to get busy and probe the brutality now taking place on S. Market street.

The call was sent to every one of the 50 members of the city council and is accompanied by a citation of acts of violence committed by uniformed city policemen against members of the International Ladies' Garment Workers' Union.

**Police Probe Demanded.**

The city council will meet in regular session tomorrow afternoon at 2 o'clock in the city hall. The Workers Party statement, which the council members follow, is as follows:

**TO ALL CHICAGO ALDERMEN:**

Sir: We are enclosing herewith a statement of brutalities committed by Chicago police and hired slugs, during the strike of the "International Ladies' Garment Workers, for your information and consideration. We believe that such actions are a disgrace to the city and should not be allowed to continue unchallenged.

We wish to call your attention to the fact that during the strike in the Amalgamated Clothing Workers in 1915 in this city, an aldermanic investigation into abuses of police authority conducted through public hearings, took place, with the result that the city adopted a resolution condemning the police for causing the strike. Chief Schuster was compelled to remove the special police and hired slugs, during these public hearings, which resulted in great suffering to the public, the police admitted using spies within the union ranks.

We are of the belief that the present situation constitutes on a scale similar to that which existed in 1915. We further believe that the city council should make an investigation with a view of taking proper action against those who are violating their oaths and the law. We urge you to use your office for this purpose.

Sincerely yours,  
Arne Swoback,  
District Organizer,  
Workers Party Dist. No. 8.

## LIST OF BRUTALITIES

Strike lasting police brutality is cited in the following statement which accompanies a letter to the aldermen:

The assault committed by Police Officer O'Rourke, who numbered 3181, on Sophie Altshuler, on the evening of March 11th stands out as one of the most heinous and disgraceful recorded. Sophie Altshuler was picketing along South Market street, and was arrested by Officers Patrick Collins and S. Roeder, both of whom were attached to the 2nd Precinct, and placed in charge of Officer O'Rourke.

What Officer O'Rourke did to Sophie Altshuler during the course of the patrol was of the most brutal. Upon being called to her attention, the critical condition of Miss Altshuler, revived that missing need be done for her because the officer's head was not broken.

Miss Altshuler, after being held in a Hotel and examined by Dr. James Sullivan, who reported that she was in the afternoon Miss Sophie Altshuler, who had been seriously beaten about the head and face, Her wrists were twisted and badly swollen.

On the same day Fannie Varnis, 2222 Iowa street, was arrested by Officer William Hankin in front of 228 S. Market street. She was arrested on a charge for not wearing a coat. As a result of the blow she received her mouth bled and her teeth are still loose.

Another Girl Attacked.

Tuesday, March 19th, 1924, 5150 and 3609 assaulted Ethel Spink who was not at that time on strike. She was on her way to work and she looked like one of the striking garment workers who had been assaulted by Officer 5159 and Officer 3609 then, stepped on and assisted by the police officers. A reporter for the DAILY WORKER was present and arrested and charged with disorderly conduct.

# THE PARTY AT WORK

**By C. E. RUTENBERG, Executive Secretary, Workers Party**

WHAT kind of an answer to that question from the standpoint of practice and tactics, our principles, our program are Communist?

But that does not answer the question fully. What sort of a party are we organizationally? Can we answer that question as proudly, we are a Communist Party?

The question which we go to show that organizationally we are still far below the standard of a Communist Party. Our membership policy fully realize what Communist discipline is and the standard of work which is expected from the members of a Communist Party.

Take the question of dues payments: In a party fully impregnated with a Communist spirit and discipline the question of regular payment of dues by all members should not require special organizational action. Yet it seems that such is the case in our party.

**Payment of Dues.**

We have counted the number of members in our party at 20,000 during the past year. The actual dues payments during the last quarter of the year were about 18,000 per month. The first indication that we have of a drop in dues payments is not actually show the membership of the party during the last quarter of 1923 taken in November. This reports from the branches showed some drop in dues payments of 18,000 who were paying dues.

There are many reasons why there has secured more facts about the situation. A new system of monthly reports from the branches to District Organizers was established. Each District Organizer has responded to the call for these reports in itself a dual commentary on the membership on the rolls in place of the party organizations. All party branches have been asked to report on the first of each month. Out of the thirteen hundred party branches which are on the rolls in Chicago, March 1, reports from 156 branches were received. This shows that we do not know how many branches actually sent in their cards to the district organizers. Our lines of District Organizers cannot fill out a simple report on the rolls in place of month, eight of them having failed to send in the tabulated statement of their membership to the National Office requires of them.

The reports which have been received, however, throw some light upon the question of membership and dues payments. Here is a table showing the facts:

Branches	Members	Members	Members	Members
120	50	2,241	1,479	1,479
57	20	2,442	1,479	1,479
6	97	138	200	200
6	55	44	112	112
7	38	22	306	306
15	40	3	22	22
	417	156	4,682	3,903

Here are 156 out of 1,300 branches which are on the rolls in Chicago, and their rolls. If the same ratio of membership held good for the remaining 1,144 branches, we would have 35,000 members on our rolls. This is probably not far from the average membership per branch is lower than in the branches reporting, but it is a fair estimate of the method of computing the membership on the rolls. The payment and members on rolls. The table shows that one-third of the branches probably are not paying their dues regularly. They are from one to three months in arrears in dues payments. If this ratio holds good for the whole party then, since we are paying dues monthly, we have 27,000 members on our rolls. This would be the best we could collect dues from only 18,000 out of 27,000 members monthly.

Certainly we cannot proclaim ourselves a Communist party in our organizational work so long as such a condition exists. We must find ways and means to remedy this situation. We would up a stronger spirit of responsibility to the party organization and greater pride in seeing that our organization for getting the numbers of the officers. Miss Spink was arrested and charged with disorderly conduct.

The same day Officers Collins and Schroeder referred to above in connection with the arrest of Sophie Altshuler arrested Gusie Cohen, 1113 N. Larkin street. After they placed her under arrest they carried themselves by taking hold of Miss Cohen's hands and dragging her the face with them. This happened about 4:30 or 5 o'clock p. m. when Miss Cohen came from work. She is not on strike as her boss has notified with the union. After hitting Miss Cohen with her own hands Collins and Schroeder dragged her to the patrol wagon.

**Cop and Thief Beat Girl.**

On Saturday morning, March 22, Officer Levin 355 E. 19th street was assaulted by a man named Sam Goldin, who is employed by Lipson Corp. at 225 W. Adams street. The presence of Officer 3401, Officer 3402 and Officer 3403 to arrest Goldin but assisted him in escaping Miss Levin.

More than 700 arrests have been made of men and women peacefully walking the streets in the strike zone, while the officers, who have become a danger not only to the community as a whole, continue to be detailed to the strike zone.

Not only does our party not function well in collecting dues from the members of the party which means that the members on our rolls do not function effectively in the party for a member who does not pay dues regularly is a member who does not work effectively for the party, but we are not making full use of our opportunity to build up our party membership.

There are thousands of workers who are members of our party organization, but they are not working for our press and public meetings and they are not taking part in the party. We have no machinery, however, to reach these workers. We have no organized, consistent effort to reach them and to induce them to work for the party. We cannot wait for these workers to come to us. We must create the means to bring them into the party. We must create the means to bring them into the party. We must create the means to bring them into the party.

**Membership Committee Needed.**

To meet the situation which has been outlined, every branch should immediately create a membership committee. This committee should consist of three members and should be charged with the duty of bringing new members into the party. This committee should also be charged with the duty of bringing new members into the party. This committee should also be charged with the duty of bringing new members into the party.

The membership committees in the branches should also be charged with the duty of bringing new members into the party. This committee should also be charged with the duty of bringing new members into the party. This committee should also be charged with the duty of bringing new members into the party.

As the to enter this strike existence, Ludendorff and his henchmen are providing a tragic sort of a lesson, namely, that the use of force calling the kettle black, and a nasty military dictatorship and of having a permit of the reparations commission. It is being sharply attacked all along the line by the Communist Party. The Democrats are neither fish nor fowl.

The Reichstag has been ordered dissolved. In fact, the Reichstag was really hanging on chiefly because the Reichstag was the only first-class travel anywhere in Germany for a while longer and draw their money, and the president of the Reichstag, Schacht, has obtained permission of the reparations commission to travel to Hitler, and to take all the money he can get.

Ludendorff's Ruse Count.

As the to enter this strike existence, Ludendorff and his henchmen are providing a tragic sort of a lesson, namely, that the use of force calling the kettle black, and a nasty military dictatorship and of having a permit of the reparations commission. It is being sharply attacked all along the line by the Communist Party. The Democrats are neither fish nor fowl.

**Russian Agricultural Workers Pledge to Forward Lenin's Work**

The following communication was received by the Third Group of the "German Agricultural Workers' Union" from the Russian comrades of the "First Russian and American Agricultural Workers' Union" who are peopled for mechanics, millers, carpenters, bricklayers and blacksmiths who are willing to go over to Russia and help build up a commune. Information can be secured from Joseph Hill, secretary, 1236 N. Bodine street, Philadelphia, Pa.

**The Resolution.**

A special general meeting of the comrades of the "First Russian and American Agricultural Workers' Union" (formerly the "Rhevo") was held on the 22nd day of January 1924, and after learning by telegram and thru the speeches made by Comrade Milnebo and Kowatz of the unexpected and sudden death of our great teacher and guide, "Vladimir Illyich Ulianov" (Lenin), who on the 21st day of January 1924, at 6:50 p. m., in Hojze near Moscow, passed away. The commune mourns together with the world proletarians this heavy loss.

The commune pledges before his fresh grave to continue his work with renewed vigor and energy to break the way towards Communism. On the 15th day of July, 1923, Comrade Lenin was honorably accepted as a member of our commune, and although he is dead, his ideas live in the hearts of all Communists and honest workers.

Our commune resolves: To donate to the "First Russian and American Agricultural Workers' Union" for the "Lenin Institute" to help further the progress of his ideals and periodically one day's income each month for the help and maintenance of the "Children orphan Home."

G. SCHILLER, Secretary.

## Russian Petroleum Production Gains In Baku District

MOSCOW, April 1.—It is reported that the output of oil in the Baku fields during the first quarter of the current working year (October-December, 1923) reached 63,888,000 pounds. These returns compare favorably with last year's 51,244,000 pounds and 41,853,000 pounds in 1921. The improvement is partly due to the considerable amount of technical work done, but also to the fact that the output of oil in the Baku fields during the first quarter of the current working year (October-December, 1923) reached 63,888,000 pounds. These returns compare favorably with last year's 51,244,000 pounds and 41,853,000 pounds in 1921. The improvement is partly due to the considerable amount of technical work done, but also to the fact that the output of oil in the Baku fields during the first quarter of the current working year (October-December, 1923) reached 63,888,000 pounds. These returns compare favorably with last year's 51,244,000 pounds and 41,853,000 pounds in 1921. The improvement is partly due to the considerable amount of technical work done, but also to the fact that the output of oil in the Baku fields during the first quarter of the current working year (October-December, 1923) reached 63,888,000 pounds. These returns compare favorably with last year's 51,244,000 pounds and 41,853,000 pounds in 1921. The improvement is partly due to the considerable amount of technical work done, but also to the fact that the output of oil in the Baku fields during the first quarter of the current working year (October-December, 1923) reached 63,888,000 pounds. These returns compare favorably with last year's 51,244,000 pounds and 41,853,000 pounds in 1921. The improvement is partly due to the considerable amount of technical work done, but also to the fact that the output of oil in the Baku fields during the first quarter of the current working year (October-December, 1923) reached 63,888,000 pounds. COMUNIST STRATEGISTS; WARE FOR CLASS WAR

Case Explained by Y. W. Leaguer

By HARRY GANNES. (Member of National Executive Council of Young Workers League) Compulsory military training is the object of the present anti-peace campaign...

The war department of the United States government has issued orders for a mobilization of the navy...

These war preparations are the basis of the hatred evinced from the militarists in the mobilization of an army of eight to nine million men...

These war preparations are the basis of the hatred evinced from the militarists in the mobilization of an army of eight to nine million men...

The Struggle Within the Russian Party

Being the continuation of the report given by Comrade Gregory Zisov...

VI Comrade Trotsky's 'New Course' We HAVE before us an article written by Comrade Trotsky...

Who can fail to appreciate Comrade Trotsky's authority in the Party? We re-read an agreement...

What will be known to you? This was the reality of the strife at the time when Comrade Trotsky issued the newspaper...

It is possible for us to adopt the line of the 'currents' now, as then we were of the 'currents'...

Before entering our Party, Comrade Trotsky fought with the whole of his character and passion for the idea that the labor party...

Drugging the American youth into the military and high schools is able to train a trained body into action at the call of war...

These war preparations are the basis of the hatred evinced from the militarists in the mobilization of an army of eight to nine million men...

These war preparations are the basis of the hatred evinced from the militarists in the mobilization of an army of eight to nine million men...

These war preparations are the basis of the hatred evinced from the militarists in the mobilization of an army of eight to nine million men...

At that time we employed a special term, invented by Vladimir Ilyich: 'currents,' as a designation in collaboration with Comrade Trotsky...

Many old comrades will recollect these words on the 'permissible gradation,' which I here adduce exactly as they were used...

Even at that time we replied: No, we cannot adopt this formula of 'live and let live' as a rule of conduct...

BILL BOLSHIE'S DREAM OR THE MACHINES THAT TALKED

The clock had barely struck the mid-point of the factory whistle, and almost in a second the whole of the factory was in a state of commotion...

By that time he had closed his eyes when the big factory dynamo walked out between the benches. It was ever such a proud looking dynamo...

Just then a smaller voice joined in and an oil can started arguing. 'Now it's no use any of you talking. It is I who am the most important thing here...'

Other things in the factory heard it too and round they all came running, each protesting in its loud-voiced voice that it was the thing that counted most...
