

U. S. USES RUSS TRADE TO EUROPE "Economic Vacuum" Is Full of Business

WASHINGTON, Jan. 6.—How the failure of the American government to recognize Russia is hurting American trade with that country is once more indicated by statements recently appearing in Commerce Reports, the official publication of the department of commerce, in which the chief of the hide and leather division of the bureau of foreign and domestic commerce says this concerning Russian foreign purchases: "Purchases amounting to \$20,000,000 of chrome and 344 leather have just been completed by the Russian state trading organization, according to an article appearing in Economic Life, Moscow, Oct. 5, 1934. These purchases were Germany's largest order of chrome and 120,000 feet of colored kid, France, 40,000 feet of kid, the United States, 450,000 feet of kid. Part of these orders had already been received and the remainder is in route. Terms of 2 to 3 months credit were obtained from the firms making the sales."

A contract has also been made for delivery of 3,600,000 pounds of sole leather from a leather factory in Esthonia in a year. The factory is owned by a Swedish firm. Gives Jobs to Swedish Workers. In the same issue, A. P. Pennington, chief of the bureau of foreign and domestic commerce, reports: "Conditions affecting the machinery industry of Sweden are marked by a general improvement during the first quarter of 1934, and to a less extent during the second quarter. As a result of this improvement increased 17.3 percent on July 1, 1934, as compared with same date in 1933. Machine building plants in Sweden are engaged in executing Russian contracts for machinery. Four of these contracts employ about 1,500 workers on these Russian orders and four others 250 hands until the end of the year. Three plants in addition to the eight mentioned are engaged in similar operations during the second quarter of 1934."

Germany, France, Sweden and Lithuania are also mentioned in connection with the Swedish Union. Takes Jobs From Americans. Meanwhile, the Federal Reserve Bulletin for July, 1934, has declared that production of basic commodities in the United States rose in May, 1934, than for May, 1933; that factory employment fell 4 percent during the year; that the largest reduction of working force occurred in the textile, metal, automobile and leather industries. Without diplomatic relations, American exporters of machinery, leather and other goods need Russia are compelled to take special difficulties to credit, insurance, shipping papers, inspection of goods, etc. All these work over the cost of this extra work if it is done by the Russian government trading corporation.

SHOE WORKERS REVOLT AGAINST NEW WAGE-CUTS

Bosses Attempt to Break Union Agreement

LYNN, Mass., Jan. 6.—At a meeting of the Stitches' Local, the largest of Shoe Workers in the country, it was decided to fight the new wage-cut. J. H. Donovan, local president, said that the new wage-cut would be considered by the union until April 20, 1935. It was declared emphatically that the time has come when the union will allow itself to be bluffed by the false benevolence of the bosses, and that the bosses would be allowed the free and full publicity that it gave them. Formerly it has been the custom of the union leaders and others to let themselves be interviewed by the local dailies, who made their reports, who made their friends of labor, who by a necessary entailment in wages saved the industry for the city and the jobs for the workers. Three years ago Donovan put his name forward and within a month a general declaration laid all over the city.

Gary, Rockefeller and "Cal" Talk Enforcing the Laws of Capitalism

By J. LOUIS ENGDALH.

TODAY, the White House in Washington is being got ready to give the Oil Trust a morning breakfast, at which it is proposed to discuss the question of law enforcement. The great capitalists, Elbert H. Gary, head of the Steel Trust, and John D. Rockefeller, Jr., head of the Standard Oil, billions, will sit down with the exploiters' president, to talk "law and order."

At the same time, C. E. Ruthenberg, a Communist, victim of the "law and order" of American capitalism's white terror, will breakfast alone in his cell in the Berrien county jail, at St. Joseph, Mich.

The White House discussion will not be directed toward effecting a sane regime of real "law and order" in these United States. It will merely take up the problem of fighting the enemies of the capitalist class, whether it is the poor and starving mother, who steals a loaf of bread to feed her children, or the Communist who unites with his comrades in the growing vanguard of labor's militant army fighting for all power. Capitalism must be protected against the Ruthenbergs.

The biggest profiteers are the biggest violators even of their own laws. Yet they will not discuss their own bankruptcy. The oppression of millions under the heel of the Steel Trust and the Oil Trust will not be considered. The breaking up of homes, the lobbing of men, women and children of the working class of even the barest necessities of life: thru low wages, recurring periods of unemployment and the increasingly high cost of living, these questions will be discussed under the table at Coolidge's breakfast discussion with Gary and Rockefeller.

Attorney General Harlan F. Stone, the corporation lawyer from New York City, who has been promoted to the U. S. Supreme Court bench, will be there. He will no doubt explain how the department of justice can enforce effectively used against the workers in the next big strike.

During the last railroad strike, for instance, in carrying out the edicts of capitalist "law and order," thousands were charged by the department of justice with violating injunctions, with being criminals against the capitalist state; the most dangerous kind of criminals, because they dared lead in the class fight against capitalism.

Hearst's purveyor of piffle, Arthur Brisbane, rises to suggest to the White House breakfasters that "crime can be reduced by increasing facilities in obtaining employment." If Hearst really believes that, he should start putting Brisbane's ideas into effect in his own huge publishing plants. The shorter workday will make more jobs. But Hearst always fights, most militantly, against the demands of the workers. In this he is like all other great employers.

Effecting a sane regime in capitalism, the exploiters use the huge armies of jobs to fight the demands and breakers and Coolidge will not discuss the question of getting jobs for the unemployed at Thursday's breakfast. If they discuss the question at all, it will be the problem of how to keep the hungry jobless in check if they protest their conditions and wage a struggle against them. There is no doubt that growing unemployment results from the ruling class's policy of forcing workers to work in a rising wave of so-called crime. But the question that would rather steal than starve, behind prison bars. The question of solving unemployment will not be touched.

The greatest crime in the world today is the continuance of the capitalist system, with the passive or active consent of the masses of workers and poor farmers. The only real drive against crime, that will bring results for the workers, is the drive of labor against capitalism, with the intention of completely wiping it out. This is a drive that workers alone, under Communist leadership, can organize and carry out. As labor turns to that direction, workers everywhere will strike at the breakfast in the strikebreaker, Cal Coolidge.

PARIS PARLEY TO MARK CRISIS IN WORLD RIVALRIES

Constant Conflicts Never Settled

(Special to The Daily Worker) WASHINGTON, Jan. 6.—On the heels of Paris coming to the communication regarding her \$4,000,000,000 war debt, administration officials have expressed the hope today that the meeting of the allied finance ministers in Paris tomorrow will result in such a general clarification of the international atmosphere that it will be possible to begin real negotiations for funding the debt without a few weeks.

No European conference in months has been so fraught with possibilities for peace or discord in world affairs as the Paris parley. It is the opinion of officials here. France's failure to submit a serious proposal for settling her debt is regarded as a sharp disappointment to Washington and in some high quarters there was expressed the hope today that a serious effort to question France's sincerity in the drive to pay. If the Cow Goes Dry—Or Bolsheviki. However, it was recognized that France may be less desirous of temporarily postponing a definite commitment on the debt until she determines the November election from the German cow under the Dawes plan. The allies hope that this will be determined at Paris. But if the cow goes dry from so many milkers?
