Wall Street Picks Its Candidate in Fight For Presidency of Germany

By J. LOUIS ENGDALH
TODAY, the international bankers in Wall Street tune in on the German election campaign, pick their candidate, and dare the German working masses to vote for anyone else.

Under the Morgan-Dawes plan, the great financiers of America become just as interested in an election in Germany, as the American sugar trust is concerned in Cuban or the Hawaiian electoral struggles, or the American fruit trust in the German election campaign...

Washington says it has heard nothing about Wall Street's declaration on the German elections. It also feigned ignorance originally of the negotiations that resulted in the Coolidge made it known that the republican administration had been heartily in favor of what the Dawes commission had accomplished...

Not that Wall Street objects to Hindenburg! Perhaps it will back him in the next election, if the workers can be held in leash to the monarchist's political chariot...

American workers should study carefully the fact that there is one candidate in the German elections toward whom Wall Street casts no flitting glances. That candidate is Kurt Thielsmann, the dockworker from Hamburg, the great German Communist candidate.

COOLIDGE PLANS STRICT BAR ON FOREIGN WORKER

State, Labor, Treasury Officials Confer
(Special to The Daily Worker.)
(WASHINGTON, April 22.—A complete revision of American immigration rules, with virtual elimination of all immigration outside along the Pacific coast in an effort to further restrict the admission to the United States of foreign-born workers was considered today by a meeting of state, labor and treasury officials.

The conference considered plans for the establishment of an immigration inspection service in all American consulates abroad, the assignment of immigration and medical inspectors to all trans-Atlantic lines and the tightening up of visa regulations, particularly in regard to students. It is under this designation that many Japanese are admitted to the United States.

# WORKERS PARTY ASKS FOR CONTROL FOR EDUCATION

## Proletarian Schools for the Class Struggle

(Continued from page 1)

servants of the employing class of this country and are being turned into robots, into helpless tools at the beck and call of the industrial lords of present day society.

Workers' education faces this insuperable fact at the very outset. Workers' education has for its purpose the awakening of labor to the consciousness that as a class of wage earners it is doomed as long as capitalism exists, to labor under its yoke as a mere chattel.

Workers' education must lead the workers to an understanding of the nature of the system under which labor works, so as to conduct a more intelligent and a more aggressive struggle against the ever increasing capitalist oppression with a view to their complete liberation from such conditions.

Workers' education must teach the workers the necessity of following independent political action. Workers' education must expose the institutions of capitalism, in addition as well as political agencies for the suppression of discontent and the perpetuation of the power of the capitalist class.

What Policy Has the W. E. B. Been Pursuing.

The W. E. B. is entirely failing to meet these fundamental requirements of workers' education. In fact, he has made under his present leadership, the W. E. B. is only another instrument to suppress any idea that the position of workers rises or falls as a class; it systematically misrepresents capitalist oppression with a view to their complete liberation from such conditions.

An examination of the activities of the executive of the W. E. B. fails to show any realization of the fact that the capitalist class profits more by the more reactionary and are combining to do ever greater extent for the suppression of the labor movement. They are not only not doing this but they are doing the opposite.

The leadership of the W. E. B. ignores the menace to the life and future of the working class that has been the imperialist war-brooding policy of American capitalism. The W. E. B. leadership has failed to teach labor the necessity of unity against this menace to its future.

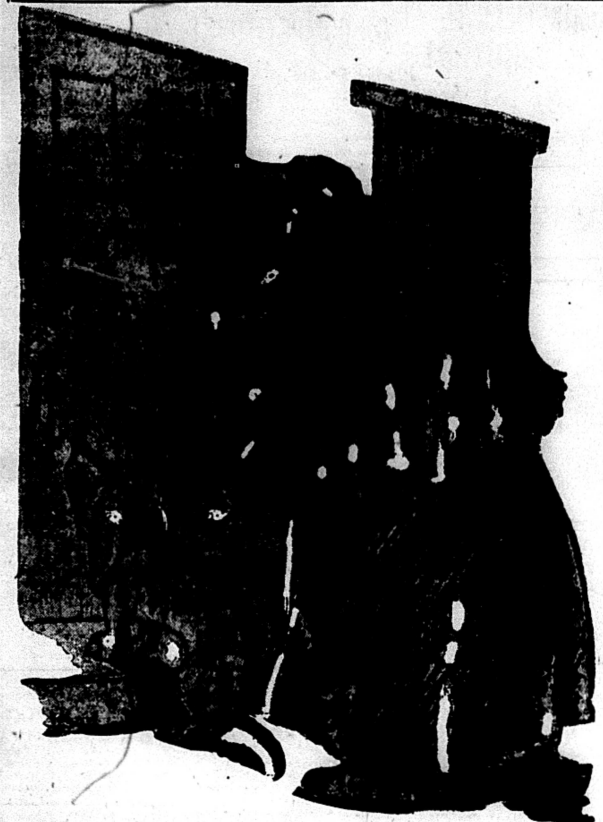

The literature issued by the W. E. B. tends both in point of view and selection of subject to support the policy of feeble reformism. It is collaboration with the employers under the guise of imperialism. It in many cases assumes a definitely capitalist reactionary leadership of W. E. B.

This policy of education is pursued by the W. E. B. today, because it is the policy of the capitalist and reactionary group of the labor movement of this country, who pursue in the field of education the same path that they have taken in the field of politics. On the far right, the field the Matthew Wolla, Perkins, Owens, follow the reactionary policy of Gomper, eschew any militant class policy and help the capitalists to chain labor firmly to the wheels of exploitation. These reactionary officials have entered the field of education with the same purpose of making out of every spark of class consciousness which the growing oppression of the present system makes inevitable and thus they make of workers' education a reactionary and a tool to maintain their policy of rule or ruin to the trade union.

The labor bureaucrats have entered into the agreement to sponsor the W. E. B. at the price of the complete subjection of the W. E. B. to their reactionary policies. These officials see that the existence of an organized workers' educational movement might lead to the dissemination of ideas more in harmony with the interests of the working class; that might furthermore lead to the creation of groups of trained workers who challenge their stagnant and oppressive attitude in the labor movement and they made speed to get this movement safely into their hands.

Policy of Exclusion. In the course of the establishment of the control of the educational officials excluded such large bodies of labor as the Amalgamated Clothing Workers. They eliminated the midly radical and the militant workers' affiliation to the militant Workers' Educational Association of Detroit and to the Boston School of Social

## Communist Education Kicks This Hound Out.

Science and upon the eve of the convention, refused affiliation to the Workers' School which for the past two years has been conducting a true working class education with a student body numbering several hundred. In its efforts to make the W. E. B. absolutely air tight against any ideas of real working class struggle, it is not difficult to predict that these reactionaries will not stop here, but will proceed to complete elimination of all forces in any leading capacity who are not part of the official A. P. of I. bureaucratic machine.

The Bankruptcy of Socialists and Liberals. The Workers Party must also call to the attention of the workers to other groups participating in some position of leadership whose policies have contributed to the false program of education conducted by the W. E. B. to date. These groups consist of liberals, socialists and intellectuals. As a whole these groups have unconditionally accepted the policies and leadership of the reactionaries. The socialists have abandoned en-

tirely their original socialist position on workers' education, as education for the class struggle which even their European comrades still cling to verbally and have passed over entirely into the camp of yellow labor leaders or the futile bourgeois phrasemongers. They are ready to accept any program of workers' education provided it does not lead to the promotion of more aggressive class struggle.

The liberals and reformers, irrespective of their pretensions of freedom of thought, etc., serve as a helping mate to the reactionary leadership and themselves disseminate an ideology which serves for the perpetuation of the oppressive capitalist system. Among the intellectuals there are some who realize full well the hopeless future of the workers' education at the hands of the present reactionary leadership, but these take no steps whatever to combat the false policies of such leadership.

These intellectuals who have in many cases entered into labor education in order to avoid open spiritual degradation, which capitalist policies demand of them in the capitalist educational institutions, but they are still stalling into the position of spiritual servants to these yellow labor leaders.

# KALININ SEES RAPID GAIN IN SOVIET GEORGIA

## Visits Scene of Comic Opera Revolt

MOSCOW, April 22.—Since the adjournment of the session of the central executive committee of the U. S. S. R. recently held at Tiflis, Kalinin, president of the C. E. C. of the U. S. S. R., has been touring different regions of Georgia, visiting numerous towns and villages, in particular some of the villages where farmers had taken part in the menshevik rising of August last.

In conversation with a Rosta correspondent, Kalinin, while on his way back to Moscow, remarked that he believed the government of the Soviet Socialist Republic of Georgia had, up to quite recently, paid too little consideration to the initiative of the much larger part in the work of local administration.

Then, he said, the authorities must be more careful in regard to the question of religion. His profound impression, however, was—Kalinin's conversation left a deep and favorable impression on the Georgian rural population contained all the necessary premises for a successful economic development of the country.

After visiting Soviet Armenia, Dagestan, North Caucasus and also the oil works of Georgia, the members of the government and the local central executive committee of the Union journeyed to Moscow via the Ukrainian Soviet Republic.

# Y. W. L. MEMBERSHIP MEETING, LOCAL CHICAGO, PLANS INCREASE OF NUCLEI IN HEAVY INDUSTRY

BY VALERIA MELTZ.

The membership meeting of the Young Workers League, Local Chicago, last night at the Greek Hall, 713 Blue Island Ave., was one of the best attended, enthusiastic and constructive meetings ever held in Chicago.

Comrade Natalia Gores presided at the meeting. The agenda of the city executive committee was read and accepted. The report for the city executive committee was given by Comrade Melitz and in all its points showed improvement and increase in the activities, since the last city convention.

The dues payment are becoming more regular, branches are clearing up their debts to the city office. The Chicago League has a whole country in the sub campaign, some 120 subs have already been turned in. Literature sales have increased considerably since the Young Workers League came out weekly, all of the copies are now being sold and a greater percentage is being sold at the shops than ever before.

A quiet, slow but definite growth and proletarianization of the league can be noticed. Half of the executive committee are already workers from the shops and another half are from the streets. Specific work is being worked out for the industry and through the fractions the comrades will conduct a real fight for these issues.

Comrade Melitz reported on our work at a conference of all workers employed in this industry. In the clothing workers captains were elected for two Amalgamated locals, one international and military workers and instructed to immediately call a meeting of all members in those locals, organize them into fractions, set out a plan of work for each fraction and have them working together.

On the same night, the city committee is being proposed to the city central committee to take charge of this work and a mass meeting scheduled on anti-fascism, covering also the recent Hawaiian affair. Work among the Juniors and our sports activities were touched upon. The Juniors were urged to send in the weekly Young Workers League form for publication, announcements of activities were made, collection taken to pay the cost of the rent and the meeting adjourned at 10:30 p. m.

With the organization of working area branches covering territories of Pullman and South Chicago and the establishment of two nuclei in this territory, and with the campaign which is being contemplated by the city executive in the clothing industry, the percentage of members in the heavy industry will be considerably higher.

The branch committees were urged to pay more attention to the organization of all possible nuclei within their territory, so that as quickly as possible, the working area branches may cease to exist and nuclei branches take their place.

On the trade union economic activity, Comrade Harver reported of holding a meeting on the clothing industry, one of mail order houses and department store workers and another in the clothing trades. Committees were elected to supervise the work of the branches in the mail order houses and department store to see

They are all in the same boat and when their fangs in the same way when circumstances force them to extreme measures. The working class of the world could very quickly call a halt to the murder reign in Bulgaria.

SECRETARY OF COMMERCE HOOVER, in an interview to a capitalist reporter expressed his displeasure with the Soviet government over the arrest and imprisonment of several "workers" who accompanied the American Relief Expedition to Russia during the famine period. Hoover declares that they were not spies, and that even the Soviet government does not believe the charges preferred against them. Until those people are released, says Hoover, there cannot be any talk of Soviet recognition. This is almost amusing.

NOT so very long ago, one never heard of such trivial obstacles standing in the way of recognition. It was dictatorship, refusal to recognize the czar's debts, Communist propaganda. Perhaps this is a nice way to break the ice. However, Hoover's pretensions of leadership concerning his "workers" will be taken with grain of salt by those who remember the boasts of his agent Gregory, who called the Soviet government of Hungary was overthrow by means of very same Hoover by means of his relief organization.

BUILDERS AT WORK RUTH REYNOLDS OF DETROIT—YOU ARE CHALLENGED!

FOLLOWING the splendid example set by Comrade Builder-in-Chief Ed Shklar of Milwaukee, who learned the trick from our comrades in Russia, Comrade Gregory Prodnich also of Milwaukee, huria a wicked challenge at Comrade Ruth Reynolds of Detroit, with this letter:

I am sending today thru Comrade Shklar one subscription to the DAILY WORKER and I challenge Ruth Reynolds, 5513 Maybury G. D. Detroit, Mich., to secure a subscription to our paper.

Since Comrade Reynolds' brother is a builder by profession, I hope that Comrade Ruth Reynolds will also join the Builders' Trades by hurling several bricks to the DAILY WORKER office.

But we warn Comrade Prodnich of Milwaukee, that he has here attempted to take unfair advantage of Comrade Ruth Reynolds. If he really wants to have the right to hope that Comrade Ruth Reynolds will hurl a brick at him, he must first hurl a brick at her.

WHITE RUSSIANS IN POLAND ASK END OF TORTURE

Resolution on Terror Argued in Sejm

(Special to The Daily Worker.) VIERNA, April 25.—The following news arrives from Warsaw. In its last session of the sejm the White Russian fraction presented a motion dealing with the maltreatment of White Russian peasants in the frontier districts.

In another case an officer and sergeant of the frontier guard had maltreated the teacher Bogdanoff on his sister. The teacher was constantly undressed and beaten with sticks. His sister was tortured to terrible fashion.

In their opinion the White Russian fraction demand the immediate appointment of a commission of investigation for the maltreatment of peasants in the Polish White Russia and they demand from the government measures which will make any tortures impossible in future.
